## PRESIDENT'S MESSAGE SEPTEMBER 1966

As President of Northeastern University, I welcome you to our campus as young adults in pursuit of advanced education - charge you to do well in your classes, but even more, I urge you to absorb every aspect of education that is found here. Success in your academic studies is important, but in this day and age, the even greater task before you is that of finding yourselves as individuals and developing a sound philosophy of life.

To find yourself socially and intellectually as an adult, you must ask yourself, "Who am I? and What am I?" - then have the courage to face an honest answer. Seek to gain a better understanding of your own social and religious background. Think for yourself. Learn to discern true intellectual leadership. Seek to blend the culture of the old world with the culture of the new world.

Read and contemplate. Learn that there is much to be gained from observation outside the classrooms. Partake of the cultural resources that abound in Boston. Become familiar with great music, great theater, and great art. You have chosen an urban university. Avail yourself of its advantages.

Yours will be the generation in which 80 percent of the population will reside in urban areas. As a college student in an urban institution, you will have an unexcelled opportunity to gain an understanding of the problems surrounding urban living. Do not hesitate to put your finger on the pulse of urban society. Feel the Beat! This is the complete education for which you should strive and I urge you to accept the challenge!

I came to Northeastern from California and getting to know a lot of people quickly by being in a dormitory eased the burden of being far from home and a close family. I was forced to become more extroverted to get to know people and I spent a lot of time going places with a small mob that had gathered together.

As a sophomore, though, I found that most of my freshman friends had flunked out, quit, transferred, got married or gone into apartments. Only a few of the once large circle remained. I began to spend my time outside the dorm.

I stayed partially due to the convenient location. More important, for lack of an alternative. Not only where else could I live, but with whom? I have this habit of losing roommates and friends to marriage. Since I live in Boston year-round, I would have to find someone else that did too, or roommates in each division. They would have to be people I would be confident to be comfortable living with for a long period of time.

I remained in the dorm. Roommates were a joy and a nightmare. I've been a bridesmaid and the first one to know about three engagements. I've also had to demand that my underwear not be borrowed, hint at the virtues of bathing, and been slandered to dorm councilors. The rules, which regulated us like infants freshman year, have become almost non-existent. Even ways of enforcing common courtesy - ending the constant noise - is disappearing.

I found the food often fattening, sometimes unedible. I've found hair in the ragout and tomato bugs in the salads. When I got to my upperclass years, though, the rule that co-op students could cook for themselves helped a lot - when someone didn't steal my dinner.

One of the most serious problems in the dorm has been the drug question. It has stopped me from a number of possible apartment ventures. Most of my friends smoke marijuana. I do not. I have not wanted to risk getting busted due to a roommate, unlikely as that may be. People smoke in the dorm but don't get busted, and wouldn't endanger you even if they did. Most dorm councilors fall into two categories - those that smoke themselves and so wouldn't bust anyone,

and those who wouldn't recognize a joint if you handed it to them. Precautions against getting caught run from wedging a wet towel under a door to spraying the room with deodorant, hair spray or cologne. Consequently, a straight dorm dweller doesn't run the risk a grass-smoking apartment-mate brings.

Freshman and senior years in the dorm the black-white problem wasn't very evident. But in between, things were kind of tense. During that time a lot of blacks became black-power oriented and it seemed they thought it was beneath them to associate with whites.

They demanded (and received) a lot of special privileges that some of the whites resented. A lot of them became loud and rowdy. By senior year though, it seems the mixing has resumed. I think a lot of the blacks have put their militancy into perspective and now aren't so afraid to be themselves.

By senior year I've come to wish I had an apartment. I've become more intolerant of the freshman - they seem so childish. The dorm has become less my world and more just a place to go back to at night.

Dorming has combined a few convenience for me during my life at Northeastern that living elsewhere would not. The proximity to school, relative cheapness, freedom from roaches and rodents. The dorm student also has an advantage of never being alone. Living with four hundred people, someone is always available to talk to or go somewhere with. But at the same time, there are always places to go to be alone.

I've learned a great deal about myself by being placed in an almost independent situation, surrounded by people whose lives and backgrounds, so different from my own, I would have never experienced unless I lived with them. I hope I can take the lessons I've learned and use them in teaching little kids, since I'm an elementary education major. Things about differing cultures, environments and attitudes they can benefit from. Just like Northeastern, the education from the dorm comes not from the buildings, but from the people inside.

## Bill Curran Barrels Way Into Starting Fullback Slot

By ROBERT COHN

Add a little courage to a tremendous football attitude, blend some dedication and hard-nosed running ability to a 6'0" 210 pound muscular frame. Result — you have now produced Northeastern's star sophomore fullback, Bill Curran.

To see if this new product really works, put a No. 30 on its jersey, and let loose on a football field. You then may see it gain 104 yards in 21 carries, or 21 yards in 22 carries.

If this does not yet give you enough proof about Bill Curran, maybe his past football record will help you. Playing for North Quincy High Bill gained just under 3000 yards in 3 years of varsity competition.

He was an easy All-Scholastic choice and was also selected to the High School All-America team. He had 65 college offers for his standout performance, but he "wanted to stay around Boston." Last year on the freshman squad Bill averaged 150 yards a game. Not convinced yet?

Would you believe he's got his coach saying that "he's a complete football player?" "He's a blocker on defense as well as a ball carrier on offense," Coach Zabitski, in describing his running ability, said, "It's pretty good. He gained over 100 yard against Bridgeport. We're very happy with him."

About his second effort, Coach Zabitski said, "He doesn't go backwards when he's hit. He's got the right Northeastern attitude—he always goes forward."

Coach Zabitski is exceptionally high on Bill's attitude. He's got a real high morale. He has the will to make sacrifices. He's a real fine and outstanding football

player, and can't miss with this kind of attitude." In both of Northeastern's victories against Bridgeport and Colby, Bill

CURRAN

scored a touchdown in each game, and was a leader of the ground attack with gains of 104 and 94 yards, respectively, averaging 4.7 yards a carry. Not bad for a sophomore.

Bill knows that many experts have

picked him for the number one choice to fill the fullback position. "I've done a lot of thinking about it," Bill said. "I worked all summer on construction, and ran two miles each week. Before the season started, I took the week off to do some extra running. I've got some 30 years ahead."

Coach Zabitski says, "Curran needs 20 more pounds and more experience to be another Cope. He's experienced as a sophomore, but not quite a Cappelletti. He's the next thing to him, though." He also added that "Bill has a different style from Cappy."

Bill says that his style is different from Cappy's because "I go at the ends more than he does." Knowing that he is picked to replace Cappelletti, Bill modestly says, "I haven't thought much about it, only hope to."

Coach Zabitski further elaborates on the different styles of both players. "They both have styles all their own which are effective in different ways."

If Bill's style is carrying two on his back into the end zone, he did against Bridgeport two weeks ago, then his style is indeed effective. Convinced yet?

# ANOTHER PROWLER!

## Stetson Hall Invaded: Officials Evade Queries

Another prowler has invaded yet another women's dormitory. Reports are numerous, but official responses are evasive.

It is however a fact that someone—a male—did enter Station Hall Friday night, Oct. 21, and made his way to the fourth floor of the new housing facility.

He managed to escape from the dormitory.

Evans has said that he can remember some incident involving an interlocker escaping recently in one of the women's dormitories but he would have to check the letter to be sure exactly when it did occur.

Last week, a male began preparing him, standing and talking. Hall construction is continuing.

The higher the water is, the more the ground will be bearing support by soil.

Security's night desk officer said that all mothers of this nature are to be discussed with James Kyriakos, the head of the campus patrol.	One dormitory housemaster hedged for a while before admitting that someone had entered Stetson Hall.	Last week after a round in court on the University was to hear again that it was, but managed to escape very out of danger.
	She then said she knew nothing else about it.	I would estimate that

**Best;**

**Title** "What is disturbing is the responsiveness and lack of response of campus officials when we tell what is being done or what can be done about getting more protection," she continued.

Mr. Mike D'Addio told the people apples from the water in-

## AEPi Dunks Best; Takes Apple Title

It was a close contest, right down to the sopping wet wire, but Alpha Epsilon slipped and stumbled its way over a fruit-strewn course to capture the First Annual Apple Dunking contest in the Quadmales yesterday.

The object of the contest, as Husky Key President Mike D'Addio told the crowd of 250 onlookers, was to "get as many of the little apples from the water into that little receptacle in two minutes."

**YOU'RE ALL WET**—One participant, shown here, in yesterday's fuzzy Key "apple dunking" contest digs for an apple in trying to

## 'Sex Plot'

BY KRISTEN KINGSBURY

Say, kids, are you tired of getting stuck with those blind dates... that come complete with white cane and German shepherd? You say you're sick of the date with the "great personality" who they hide in the back seat where it's dark, and send in a decoy to get you?

Girls, how many times have you said you prefer the playboy type and wind up with a guy who has the build of Hugh Hefner, only with a filthier mind and hands like Van Cliburn?

Guys, when was the last time you wound up with a "sporty" girl... the Russian women's dogsled champion who can press 475 pounds, and you have to keep telling her to watch where she's pressing?

## SURCEASE FROM SORROW

Well, for those of you who have wearied of this sort of thing, try Operation Match, the computerized dating system. It's what's happening, baby. You simply apply for a form, fill it out, send it in with a few beans (\$), and BAM!, in a few weeks you get a letter with five names on it.

Hopefully, they are the names of members of the opposite sex, who have been matched by an IBM machine to you and your personality. This is what the brochures say. What really happens is that the people who send in the forms, lie on the questions (Who would admit they are helplessly oversexed, have vilevolent acne and

## ROTC Questioned At SDS Forum

By JON WILL SOPER

Reserve Officer Training—its nature, purpose, and its place in campus life, and the question of accreditation—were discussed in SDS forum yesterday. Means said the Student Council, which also took up the ROTC question, presented to the Faculty Senate review the 1965-66 year as a basis for key of granting academic credits for ROTC courses.

A statement of policy issued with the Student Council proposal indicated that the Council members intended to accredit ROTC courses for those who wish to participate.

FORT DEVENS, NOV. 28 — Saigon 30, said the signpost at the dirt crossroads. Ben Hoa, 90. Can Tho, 100. Phu Bai, 360.

The mission sounded easy: Sweep and clear the Vietnamese village of Hai Don, build a perimeter defense while examining its extensive tunnel system, then evacuate before the enemy could counter attack.

A CAPTURED GI gets the shock treatment by Viet Cong interrogators at the Army Security Agency's Vietnam Village at Fort Devens.

## ROTC Learns To Take It From Viet Cong

## Drinking - Sex - Drugs Investigated By Stearns Study

By PETER LANCE

Dean of Chapel, Charles W. Havice, Chairman of the Russell B. Stearns Study, has announced the publication of "Campus Values," the study's second handbook for students concerning campus morality.

The handbook itself, which investigates in detail sex, drinking, cheating and use of drugs on the American college campus, has been designed to stimulate discussion and aid students in solving personal problems.

The Stearns Study, endowed by Russell B. Stearns, a member of the Northeastern University Board of Trustees, was founded in 1963 with the purpose of investigating the ethical and social behavior of

# Dean of Students Issues Intimidation Charge Denial

By JON WILL SOPER

Dean of Students Gilbert G. MacDonald has decided not to answer specific student charges of intimidation because the charges stem from conversations which he regards as confidential. He did issue a blanket denial of intimidation being against his policy, however.

"These were in the nature of counseling situations and I am professionally bound not to discuss them in public. It would be unfair to the students."

The intimidation charges were made by John DeWitt '68LA, now a Ph.D. candidate at Univ. of Conn., and Michael Berman '67ED. Both accused Dean MacDonald of trying to force them into disassociating themselves from the off-campus magazine

not regarded by him as a chance to defend himself against accusations.

"I don't think I have to defend myself. The fairness I attempt to show is well known among students," said MacDonald.

## Threats Denied

The dean categorically denied that he had threatened anyone. "Use of threats or intimidation is not the policy of this office," he said. The dean said he

"He didn't get it at graduation because there was a mix-up," MacDonald said. "With that many (2000) diplomats we usually make about a half-dozen mistakes. It just happened to John — of all people."

"If a student doesn't get it, he comes to the director of finances or writes, requesting it be mailed to his post-graduation address." I saw it there the other day," Dean MacDonald said.

According to his affidavit of

## EDITORIAL

### ROTC Training

Recent student activities here and earlier at Boston University have brought up a question that may not have been paid serious attention otherwise: is ROTC training on campus compatible with the educational process of an academically concerned university?

Yesterday the BU faculty voted on abolishing credit for military courses as a result of a proposal supported heavily by students and faculty. A similar action has been suggested by the Northeastern Students for a Democratic Society.

While the NEWS does not agree with all of the assumptions the SDS brings to the argument we feel that not only should academic credit be eliminated for these military courses but that the entire Reserve Officers Training Corps program should be withdrawn from Northeastern.

Withdrawal of the course credit from the ROTC brigade, the largest voluntary corps in the country, at nearly 3000, could be justified simply on grounds of the "gut" characteristics of the basic courses. Almost automatic high grades in courses that rank educationally with basket-weaving are unfairly inflating the averages of legitimate courses, an advantage female students, for example, cannot option.

# Present Pro-ROTC Petition

By JOE RICHARDS

A petition supporting the ROTC program at Northeastern which was signed by over 1500 students, was presented to Asa Knowles, President of the University Wednesday.

It was presented by Robert Drongowski, ERA, the individual responsible for the conception and circulation of the petition. A veteran member of the Seaboard and Blade Drongowski first thought of the idea after reading an editorial in the NEWS that suggested the phasing-out of ROTC at the University.

"I believe," said Drongowski, "that the NEWS has tried to give a fair picture of the situation by presenting both sides of the issue. I feel, however, that the majority view should be presented as the official policy of the student body."

The petition states that "we support the stated policy which recognizes the place of the military Reserve Officers' Training Corps program on the Northeastern campus."

"We further believe," it continues, "that the use of a campus for the education of men for peace

shows of trust and responsibility in our Armed Forces is in keeping with the principles of civility and the principles of the military."

According to Drongowski, there was no formal motion or endorsement made in any campus organization. Several of his fellow Seaboard and Blade avoided him by talking to students and gathering signatures here and at Burlington, where 113 names were collected.

I wanted to do this, said Drongowski, "within a week. I have never done anything like this before and I had no conception as to how it would work. After a week, though, I saw that I had not allowed enough time. So I extended it and stopped when the total passed 1500."

"I also wanted," he continued, "to present it during this term because it was started in this term."

I feel it is an accurate reflection of the feelings of the majority of students here at Northeastern, can say this for two reasons.

By the nature of Northeastern's crop plan, students here tend to be more military than the average college student. There fore their decision to sign was in most cases carefully thought-out.

In addition, he said, perhaps 90 to 95 percent of all the people I recommended signed. Most persons who refused to sign did so because of the second paragraph which stated that "We believe that any attempt by any individual(s) to abolish ROTC (here) is a violation of our academic freedom."

Drongowski said that others merely refused to read or did not want to get involved. It was made it a practice never to sign anything.

UNIVERSITY PRESIDENT Asa S. Knowles, Jr. (right) receives the petition from Robert Drongowski, ERA.

# LA Nixes Credit For ROTC

By MICHAEL J. DORFSMAN

Freshmen entering the College of Liberal Arts in the fall of 1967 will not receive credit for advanced courses in the Reserve Officers Training Corps.

The change in policy, adopted Wednesday afternoon by the faculty committee, will not affect any of the students presently enrolled in ROTC.

The advanced course is not given until the middle year so in effect the change will not be initiated until 1969 when next year's freshmen reach their third year.

The recommendation, handed down by the faculty committee, reads: "The College of Liberal Arts will reduce the amount of quarter hours given for participation in Advanced ROTC from ten quarter hours to no quarter hours."

The action was initiated by a faculty member who referred it to the Curriculum Committee. Assistant Dean of Liberal Arts Norman Rosenblatt would not reveal the faculty member's name.

After for Curriculum Committee

DEAN LAKE

tee split in half over the issue, it was sent to the faculty for a vote.

The decision had nothing to do with the Vietnam war, and was

made solely on academic grounds.

Dean Rosenblatt said: "This was not an attempt by the faculty to weaken ROTC or divorce it from the campus. ROTC will still be taught."

"As the comments at the meeting pointed out, the discussion was based only on academic control. The instructors felt it would be better to take other courses in lieu of ROTC."

The vote of the faculty committee to drop ROTC credit was 44 to 22.

Wilfred S. Lake, Dean of Liberal Arts, was only mildly surprised by the vote, and would have favored a reduction of two quarter hours instead of the complete elimination that was adopted.

Dean Lake does not believe the change will seriously harm the Corps.

"I don't think this will be catastrophic," he said. "We have good students here, and I'm confident they'll be able to carry the additional load."

He felt that the only ones who will be affected by the change

My name is Fred and I'm in the class of '71. I'm a student in engineering and I am also in ROTC. Five years is a very long time to go to school and in the past five years many things have happened: Kent State, Jackson State, the Cambodian Excursion, the deaths of Dr. Martin Luther King and Robert Kennedy. Due to some of these events, my personal ideas have changed. In spite of some of them, my ideas have remained the same.

Northeastern has improved a great deal I think, in the time I've known it. Freshman year, right on through, I was forced to carry six or seven different courses, to work my butt off just to get by. Some academic changes - an expanded computer center, tutoring and the four-by-four course set-up - have now been put in that would have saved a lot of misery on my part and allowed me a better education. Some of the courses I had to take were a waste of time and had nothing to do with my major and it was not until senior year that I got really into it.

When I first came to Northeastern, I really didn't know what ROTC was like. I came from a very quiet, uninvolved high school where the loudest noise was made on Saturday during the football game. I joined ROTC because almost everybody did, and if you didn't like it you could always get out of it after two years.

My attitude toward ROTC changed from one of extreme agreement to tacit respect. I have come to think of the Vietnam war as a mistake, a costly mistake that has drained dollars and sons from the United States. I think that the two main problems with the war are that the military cannot fight (and end) it the way they want, and the American soldier is incapable of fighting an irregular conflict. I hope there will be no Americans left in Vietnam after 1973. However, my disagreeing with some of the army's policies is not different from the many officers in the service now who feel the same way.

But I do believe that ROTC has a definite place on the college campus - so that both sides of the picture may be presented; not only the radical left but also the so-called "fascist" right. If ROTC is kicked off the campus the student caught in the middle has only one way to turn and is offered no choice. Also, the trained officer with a college background will prove very important with the prospect of an all volunteer army, for it is this kind of officer that may question any order that seems to him unreasonable.

As I have changed in my political views, so has the army changed its views of the ROTC student. I've gone from being a member of a vast majority to a small minority of students on campus, and the army has gone from being more rigid to more understanding toward me and my group, understanding the pressures on me and the others that has come from the growing number of people who have become anti-war and anti-draft. They, and those who want the campus free from government influence, have combined to make staying in ROTC very difficult for me and the others.

At this stage of the game I am committed to the army and I really have no regrets about it. If I had it to do all over again I would do the same thing and join ROTC. Activities in it - and in the NU Band have produced some of the highlights of my college life. As things turned out, I made a fairly good choice since in the lottery system for the draft my birthday was the 11th number drawn.

All in all the past five years have been very interesting, very difficult and very long. I've stated a number of ideas - about my education and opinion on the military in it - that may or may not be agreed with. However, it shouldn't cause anybody any worry. To the class of '71 seniors - good luck in whatever you do.

# Afro-Assoc. Wants Black Hist. Course

By PETER LANCE

The Northeastern Afro-American Association recently petitioned the administration for the addition of a fully accredited course in "Black History," to the curriculum of the History Department.

The Association, which operates under the auspices of S.N.C.C. called for the "further understanding of the Black Man through education" in identical letters sent May 4, to Pres. Asa Knowles, Norman Rosenblatt, assistant dean of Liberal Arts and Prof. Raymond Robinson, chairman of the History Department.

Submitted by Delano Farrar and Frederick Johnson, chairman of the Association, the letters petitioned the administration to follow its avowed purpose of "discovering and meeting community needs, by pioneering new areas of educational service."

Farrar and Johnson did not give specific details as to course content, but they observed that courses in "Black History" would help to eliminate confusion, misunderstanding and misconceptions which not only rack, but make a mockery of the democratic

we feel that courses dealing with the dispersion of the Black Man, his heritage, culture, and contributions to both eastern and western civilization, would be beneficial in changing his modern day plight."

"The University of Massachusetts, Brandeis, and Harvard have already successfully instituted such courses," Farrar said. "We feel that Black History courses would not only give the Negro at Northeastern an in-depth familiarity of his heritage, they would foster understanding among whites as well."

Prof. Robinson said that his department "had been considering the addition of a course on the American Negro for quite some time."

"Our major problem is adopting such a course, results from the great deficiency of educators in this field," Robinson said.

Northeastern 100 W., May 12, 1967

## "Casino Royale" Riot

### Theater Never Expected Even Full-house at 4 a.m.

The crowd of 15,000 youths that erupted into a dangerous mob early last Saturday morning in downtown Boston at a preview showing of "Casino Royale" had never been expected by the promoters.

Sack Theatre's General Manager Alan Friedberg told the NEWS, "No one who was involved with the promotion—unless he enlisted the aid of a clairvoyant—could have anticipated the crowd that materialized."

"In fact, because of the early morning hour, we seriously contemplated no one being there. We even held a meeting with the intent of changing the hour to midnight or 6 a.m."

The decision to show "Casino Royale" early came when the police department insisted on it to avoid injuries, Friedberg said.

Friedberg went on to say, "Additional showings were contemplated but it was decided that they would only aggravate the situation. The crowd would be diminished by 3000 while other 9000 waited outside."

He thought the majority of those who were there were well behaved and came with good intentions.

He added that he took offense at those who charged the crowd of mostly college students who were being immature and hoodlums.

"I talked with some of the arrivals," Friedberg said, "and found them to be extremely well behaved and there only for good time. They weren't looking for trouble at all."

He said that in any crowd that size there are bound to be a few that will ruin things, but they were the exception.

The promotion, sponsored jointly by radio station WRKO, Columbia Pictures and Sack Theatre was termed an unfortunate incident by Friedberg.

# Council Bans Protesters

By PETER LANCE

Rich Smith (DRA), President of Northeastern's Students for a Democratic Society said Thursday that his organization will "sorely" defy any attempts by the Student Council to take dissent within the University.

Smith's statement was prompted by the Student Council's passage of a motion forbidding demonstrations within University buildings.

The motion, proposed by council member Clark (DRA), resulted from last Friday's S.D.S. demonstration on the commons concourse and was carried by the Council 15 to nine.

"The new resolution forbids all demonstrations of whatever nature, by any individual or organization, in the five lanes of the buildings of the Northeastern campus."

According to Clark, violators of the resolution will be subject to the following disciplinary action:

—First offense: A letter of warning from the Student Council.

—Second offense: Restriction from the use of University facilities for a period of at least six quarters.

—Third offense: Forfeiture of use of University facilities and loss of reputation as a recognized organization on campus.

Smith questioned the Council's power of enforcing the resolution, "it was merely to control with Mr. Barry Mankins of the American Civil Liberties Union of Massachusetts and he is forced me, in light of his past

dealings with the university, that the Council is merely a representative body for the students and has absolutely no power to enforce their resolution."

"The resolution itself is most antagonistic," Smith said, "it gives no definition of free lance."

"The Boston Fire Department defines free lance as any person or person known of police from police," he continued.

According to this definition, the Student Council would prohibit all demonstrations, orderly or otherwise, carried on inside of outside university buildings.

Council President Roy Wheeler subsequently responded to Smith's charges.

"Although we haven't the power to restrict transgressors of this resolution from use of University facilities, we will strongly recommend their restriction to the administration and the Student Activities Committee on which we have two seats."

"The Council's lack of enforcing power, makes their resolution meaningless," Smith said, "it does not choose to sacrifice one right to demonstrate at the mere request of the Council."

"Any suspension of free lance that has occurred has been the result of curious endeavors or boisterous self-demonstration, and the S.D.S. demonstrates themselves," he continued.

Also questioning the resolution was Councilmember Peter Eckland (DRA), "if the Council wishes to prohibit all demonstrations, they should have the power to restrict transgressors of this resolution from use of University facilities, we will strongly recommend their restriction to the administration and the Student Activities Committee on which we have two seats."

"I have to think what the consequences would have been if a few bad apples had had Friday down in the commons concourse area, during the

S.D.S. demonstration," Clark said. "The purpose of this legislation is to protect the student body."

Dean of students, Gilbert G. MacDonald, said he would refer the matter to the Student Activities Committee.

"The Student Council acts as a liaison between students and the administration and has authority as powers of enforcement as its powers of the nature," MacDonald said. "The proper body to restrict the motion is the Student Activities Committee."

Made up of students administrators the Committee exercises power over student activities and could recommend programs to organize

actions violating the resolution if it is advised, according to MacDonald.

MacDonald did not say the non-affiliated demonstrators would be dealt with, as the new resolution was adopted as a permanent University regulation.

"I appreciate the Council's interest in the rights and safety of students; at the same time, we must protect the rights of other students to demonstrate what they think is best," MacDonald added.

Asked if he favored the motion, MacDonald replied "I have no opinion, at the present time we will have to wait for the decision of the Committee."

DEAN MACDONALD

## Masque Presents "How to Succeed"

By BARBARA HARMON

The Silver Masque will present "How to Succeed in Business Without Really Trying," next Friday and Saturday in Alumni Auditorium.

It is one of the few musical comedies to be awarded the Pulitzer Prize, and one of Broadway's longest running and most giving successes, by the time responsible for the libretto "Gipsy and Dolly."

They told the story in terms of an experience which was unimagined. First, who reads (Shirley) Mandy's book on business success and transparency puts in practice its business suggestions for corporate climbing.

The American hero first off up-

3. Student Council proposes a Distinguished Speaker Series.
4. NU YAF to attend Birch Society meeting.

Roxbury, Northeastern's scarred neighbor, has undergone a serious decline in recent years. But, the school is not expanding in that direction. A look at another large, urban university may give some insight into the potential of Roxbury for Northeastern.

A DISCARDED CAR MUFFLER marks the once beautiful park which City Hospital. This street, passed by those going to Northeastern during a shortcut, was once a garden spot in Roxbury New to the school.

By DAVID N. STERN  
Special Assignments Reporter

Roxbury is the oldest section of Boston.

The successive migrations of humanity through this section—the white Anglo-Saxon Protestants, the Jewish and the Negroes—have left an indelible mark on the area.

## LITTLE REMAINS

Instead of the once incredible beauty of the Roxbury residential area, all that is there is a slum—an eye-sore. And barren earth where rat-infested houses once stood.

But she still hangs on, waiting for that day when she will be revitalized, beautiful again.

Northeastern University moved into the Roxbury area innocently enough one day in 1898, while the section was still "Boston's Bedroom." Then, the school

became a neighbor, moving into the Back Bay.

The University's holdings grew through the years until today it is what has been called "the sleeping giant."

But is it?

Many critics of the University building programs—especially in the past two years when a great flurry of construction activity has overtaken the school—have said that expansion is much too fast.

"Our bodies are growing faster than our minds," they add. And then they cite the intellectual atmosphere of such universities as Harvard and the University of California at Berkeley.

Not too much mention has

been made of Temple University in Philadelphia.

The situation at Temple University is analogous to that at Northeastern. It is a commuter university in the heart of a blighted section in Philadelphia.

But, Temple is taking another way out in its expansion program, which began 11 years ago.

That university is buying entire areas of slums, tearing them down and then rebuilding. There are now four campuses in the center of Philadelphia and a fifth only a few minutes away in the North Philadelphia section.

The total area which Temple University presently controls is more than 380 acres—in the big city.

What they are constructing is also similar to what Northeastern is building—a sciences complex, a gymnasium with two swimming pools, and many other buildings.

## 18 NEW BUILDINGS

Eighteen buildings have been constructed at Temple since its expansion program began in 1956. More are presently on the drawing board.

Another analogous situation there is the commuter problem. Temple now has only three dormitories. Many out-of-state students are being accepted there provisionally; they must be commuter students.

This means they must find

6. Distinguished Speaker Series launched with Harrison Salisbury.
7. WNEU planning more shows dealing with issues.

## To Live The Impossible Life Campus Co-ed Apartments

By NEDDA YOUNG

The residents at 122 St. Stephens St. have one thing in common — they all enjoy living there. The reason is very simple — the apartment building is co-ed. Girls occupy the first and second floors, boys the third and fourth.

This phenomena happened purely by accident. In September, 26 transfer girls were inadvertently left with dorm rooms, so with the permission of the administration, they became a Northeastern "first."

### REAL FEMALES

For some of the boys, however, the situation is an innovation. As Dean Hasseman GLA explains, "A lot of boys don't have sisters, and seeing these girls walk around sloppy, just as they would around their home, makes them

rules. "The girls have the same curfew as in the Dorms. Since they are all upperclassmen, they are on the honor system." The boys and girls, however, are restricted to their own floors, and there is no inter-room visiting.

### RESIDENT VIEWS

Meanwhile, representatives from the dorm have been meeting to discuss the situation. Dominic Meo III GLA, spokesman for the dorm, gave their positions.

"First of all," he said, "the entire dorm and the administra-

er rooms until 12 p.m. weekdays and until 2 a.m. weekends.

But perhaps most important is the issue of responsibility. The girls were told by the administration that they were expected to act in a responsible and mature manner. But with the rules and regulations now in effect the administration is being hypocritical. Meo complained. The girls instead are told what to do.

The girls are enjoying the luxury of the apartments. "We love the apartments," Marilyn said

I came to Northeastern with expectations, anxieties and prejudices - so did my peers. That strange intangible bond initiated an infinite series of experiences that have taken me where I've been and will lead me where I'm going.

People, human beings, that's why I chose Northeastern. I wanted diversification and I wanted the challenge of making myself more than a number. I succeeded by getting active. I got to know the right people - I was a name not a number - and it made me nauseous. I was elected Homecoming Queen. Lucky me! But what about my fellow student who hates me now because she needed that recognition but didn't get it?

I was very disappointed in my search for maturity and individuality. I was in for a rude awakening. The people I built friendships with weren't really committed to anything, including the people they associated with. They were unwilling to give a part of themselves for fear they would receive nothing in return. I was very impressed with the Greek way of life - the fraternities and sororities - but the people I associated with had no interest. Then, I got tired of listening to the unsupported theories that sororities were only social crutches.

I was a junior when I pledged Alpha Omicron Pi and I was a fool for waiting so long. The Greek system isn't a social crutch. After

pledging, I didn't automatically become popular once I became a full-fledged sister, but I became free to develop as a person and an individual.

Homecoming Queen is a title which automatically includes the pertinent subject of school spirit. My experience as queen showed me that school spirit at Northeastern is dying and now I've found that, sadly, it's taking the Greek system with it. I don't think that students want organizations for social reasons anymore. Everything and everyone else has taken priority. But I think that the students are missing something.

I'm apolitical. I was five years ago and I am now. My immediate needs as a person living with other people still have priority over my position in this so-called democratic society. Four years of living in and working for a dormitory proved to me how ludicrous it is to expect to accomplish anything positive for a large group of people in a limited amount of time to the satisfaction of the majority.

I can't imagine not being able to look back at the relaxing social life of my college years. To me they represent a time that will never exist again. Northeastern has really been an experience. Through it and in spite of it, I've learned to question, to listen, to understand, to be critical, to be warm - to be me.

## Black Berets Stage Mock Assault On Cape

By ANDY DABILIS

### Operation: Beach Green.

The 80 members dressed in military garb, complete with black berets, life jackets, field packs, M-1 rifles and paddles climbed down from the USS Reedbird, a Navy minesweeper, on Jacobs ladders into the 15-man rubber rafts, a mile and a half off the enemy beachhead. Silently, because there might be observers on the beach, Green.

Once all the rafts were ready, the order to give way was given and the journey toward the unknown beach began. The first raft to hit the beach was unloaded quickly. A perimeter defense was set up to secure the beach for the other rafts which soon came sloshing through the frigid ocean waters.

Rapid arm movements and whispered commands began the motion of assembling the teams in the brisk morning air. Less than an hour after leaving the ship, the teams were ready. "Where are we going," one nervous youth asked of a battle-hardened combatant.

"Don't know," he replied, "no body does. Only thing I know is that there's supposed to be some missile sites inland that we have to take."

### Zero Hour

The trek began. For two hours they moved through the woods, avoiding well-travelled trails. "Must have gone almost six miles," the rookie turned back to the veteran and said plaintively.

Suddenly the silence was broken by the burst of a machinegun volley. Quickly everyone dove in the brush at the side of the narrow trail and held their breath. Were they discovered?

### Spotter Reports

"I see them," he gasped to the team leader. "There's about 20 of them at the bottom of the ridge around a burned out bonfire."

The leader squinted into the early-morning sun, thought for a minute then surveyed the terrain. "We'll have to set up a machine gun at the bottom of the ridge, out of their sight and send assault teams around their perimeter and force them out into the open where the machine gun can get them. Be quiet and move low; there's a lot of dry underbrush."

Within minutes, the team hid the aggressors guarding the missile site surrounded. Quickly, a round sounded and two members of team A broke from the underbrush yelling, with M-1's blazing. The startled aggressors fled in panic, some right into the blazing crossfire of the machine guns, most with their rifles in the air firing as they ran.

**BEACH LANDING**—A Northeastern Counter Guerrilla team lands on a beach on Cape Cod near Otis AFB as part of a training exercise. Their mission is to capture an "enemy" missile site ashore, manned by another CGG team from Northeastern.

(NEWSphoto by Irving Stowers)

### Attack on mock SAM missile sites.

The landing force composed of Division A and a few from Division B, from the Navy minesweeper left Boston Harbor about 10:30 p.m. Friday night and arrived offshore nearly five hours later.

Aggressors from Division B and some new members from Division A left Boston at 8 p.m. Friday night and prepared the missile sites waiting nearly 10 hours for the forces to attack.

While most agreed that it was

cold, and in the Division A case, wet, nobody regretted the training.

### Valuable Experience

"It was very valuable, something I couldn't get in the classroom," one CGG member said. "I'm not very confident," another said, "but this CGG has really showed me a lot of military skills. One of the new members had trouble getting his clip in the rifle and I was able to fix it in seconds, because someone showed me the same thing last year," he ended.

The confusion of mock battle—the cramps I got while rowing and noise of rifles and machine guns startled some of the new members.

Training in preparation was held in July at Northeastern's Ashland physical education facilities and included compass training for night traveling and swimming tests.

Every precaution was taken to insure safety during the amphibious part of the operation, since fatalities have been recorded in U.S. Army Ranger school training.

### The Worst Part

"The worst part of it all was the cramps I got while rowing," another added. "We had to sit on one leg on the spray rail of the rafts and it hurt so much I

- 10. Mariner flight to Venus for first pictures.
- 11. Con Thien bombing assault by VC.
- 12. Yaz wins triple crown of AL.

1. Dr. Martin Luther King planned Winter Carnival speaker.
2. Pres. McClellan blasts apathetic Student Council.
3. GPK and SDS meet to discuss Vietnam views.
4. Bed races sponsored by Student Union.
5. International Relations Club gets good speakers.
6. Blood drive for men in Nam.
7. IFC holds war poll of students.
8. Soak-a-Prof for United Fund.
9. Students buy church keys for King Husky.
10. 83% of students non-druggies.
11. Silver Masque performs "Street Scene."
12. Sanctuary at colleges for draft resisters.

## Rights leader King next in top speaker series

Martin Luther King will be the second speaker in the university's Distinguished Speaker Series January 11.

King's appearance will kick-off the 1968 Winter Carnival week.

Tickets for the speech in Alumni Auditorium will be priced at 50¢ for members of the Northeastern community and \$1.00 for all others according to Leroy C. Wheelock '68Ed, chairman of the Distinguished Speaker Series Committee.

Dr. King founded the Southern Christian Leadership Conference.

## GPK-SDS meet in peace

By MARTIN BEISER and LORETTA ERRICO

With a view toward promoting increased intellectual activity at Northeastern, Gamma Phi Kappa invited members of the Students for a Democratic Society to discuss the concept of fraternalism last Sunday evening at the GPK frat house.

The meeting came as a result of the brothers' deemed unwarranted hostility towards fraternities on the part of SDS.

"We felt that the fraternities are at fault for not responding to these criticisms," said Tom Alvin, '68Ed, a GPK brother. What resulted was an organized and unscripted discussion consisting of five representatives from each group. The discussion centered on the pros and cons of fraternities on campus.

active Lapoint defended Mayoralty as an example of the value of diversion. He pointed out that diversions were characteristic of both groups, citing alcohol, sex, and drugs as means of evading important issues.

Continuing, he stated many individual benefits, such as teamwork, organization, and involvement, are derived from activities of this nature.

Greek selectivity, and the power of fraternities on campus.

One interesting aspect of the debate was many of the differences between the organizations stemmed from the erroneous image projected by each group.

After the formal debate, it was apparent that members of both organizations felt that the exchange proved enlightening and displayed enthusiasm for a continuation on an expanded basis. A GPK spokesman indicated if other political and religious groups would be invited to participate.

## Rally to be held supporting War

A rally to support American policy in Vietnam will be held at Boston Common, Sunday, Nov. 19, at 2 p.m.

The rally, sponsored by the Student Committee to Enlist National Effort, is designed, according to the organization, to counteract those demonstrations in recent months against the war.

SCENE hopes, "by a show of strength and spirit," to "send the word to our servicemen that will give them the moral boost they so richly deserve."

## NOVEMBER 1967

## Green Re-Resigns; Horn Is Banned

By M. DORFSMAN

The Student Council banned the sale of HORN on the campus today, and accepted the resignation of Jack Green (TILA). John Weisman (TILA) made the announcement about the underground magazine, which reads, "Be it advised that HORN is not a recognized student activity. There-

fore we, the Student Council of Northeastern University, terminate the privilege of HORN to sell on campus until they are recognized as a student activity."

Weisman added, "HORN can be sold on the sidewalks in front of the school, but it cannot be sold within the buildings as it was in Division A."

He did not believe the resolution would affect the sale of TIME and LIFE magazines in the university bookstores.

Both magazines are sold in the bookstores although they are not student publications or recognized student activities.

Prof. Nathaniel C. Raymond, of the sociology department, represented HORN at the Council meeting.

"This will only prove to the students the Council's inability to enforce policy," he said.

He said that the magazine will still be sold even if it is off campus.

Council president Leroy Wheelock (SEED) said that he believed HORN was seeking to become a recognized student activity. He added that he did not think the HORN would have any difficulty being recognized at which time they would be permitted to sell on campus.

Wheelock said the HORN can be distributed free. "Our resolution only stops them from selling on campus," he said.

Green Resigns

In an unrelated incident, Council member Jack Green announced

his resignation.

"I decided," he said, "I must do what I originally came here to do. I have to devote more time to my school work."

His post as corresponding secretary will be filled by Bruce Chalmers (SELA).

A controversy arose about Green last spring when he resigned supposedly at the request of the executive board.

When the rest of the Council learned that the board had asked him to resign, they voted not to accept Green's resignation.

The executive board did not feel that Green had fulfilled his duties to the council when he failed to

## Better Dead than SDS

A U.S. Congressman feels the Federal Government should deny funds to any college or university which permits Students for a Democratic Society to have an organization on its campus.

"SDS has been infiltrated by the Communists, and therefore I think all colleges throughout the United States should ban SDS from their campuses," said Republican Joe Pool, (D-Texas).

Pool, a member of the House Committee on Un-American Activities, said he is currently investi-

 Henry J. Kaiser 85, industrialist.  
 Clement Atlee 84, English government official.  
 John Masefield 88, poet.  
 J. Robert Oppenheimer 62, scientist, atomic bomb.  
 Gregory Pincus 64, birth control pill developer.  
 Siegfried Sassoon 80, poet.  
 Girls killed in National Park area by bears.  
 Thousands killed in Vietnam, Mid-East, Africa.

# ROTC Belongs On Campus

Under present world conditions it seems essential that the United States maintain a large and effective military establishment. Failure to do this would be to risk the loss of our hard won freedoms. Military forces such as are needed to defend our democracy today require substantial numbers of officers who must be trained in service academies operated by the federal government, in officer candidate schools, or in ROTC programs in civilian colleges. Students who complete ROTC curricula receive commissions either in the regular army or in the reserve forces at the time of their graduation from college. Choice of a commission as a regular army officer is at the option of the individual student provided that he qualifies.

Less than one quarter of the military officers commissioned each year are the product of service academies or officer candidate schools. The remaining three quarters of the total number commissioned are the product of ROTC programs conducted in some 250 civilian colleges and universities throughout the United States. This arrangement suits admirably the requirements of a democratic society not desiring to establish a dominant military class and conforms to the fundamental principle of having citizen soldiers controlled by the citizenry.

Northeastern University's Department of Military Science was established in 1951 and has been an integral part of education programs in the Basic Colleges ever since. Officers assigned by the Army to administer the ROTC program at Northeastern (with prior approval of the President of the University) have been carefully selected, well educated men, personally qualified for service in a university community, who have shared helpfully in student and faculty affairs. They have worked hard and effectively

for excellence in their Department and towards its integration in the overall program of the University. The ROTC provides opportunities of interest to students from different backgrounds and with widely varying academic interest, but no student at Northeastern University is required to enroll in courses offered by the Department of Military Science. The basic ROTC program is populated entirely by volunteers and is offered during the first two years. Students are free to withdraw from the ROTC at the end of the basic program if they so desire. Those who elect and are admitted to the advanced courses offered during the final three years of the baccalaureate curricula acquire a knowledge of military matters and a training in leadership which equip them to become officers in the United States Army. The Department of Military Science is an academic department of the University and appropriate academic credit is granted for the courses in Military Science.

The program has many specific advantages for students who are enrolled. They receive regular compensation at the rate of \$50 per month while they are in training. An extensive and generous scholarship program providing both 4-year and 2-year scholarships for ROTC cadets has recently been established by the Department of the Army. Several Northeastern cadets have been recipients of these awards.

Since the program is wholly optional and valued highly by many members of the Northeastern community, there would seem to be every reason for sustaining it. The concept that a majority of the officers in the armies of a democracy should be educated in the nation's colleges and universities is in the best time tested tradition of civilian control of military forces in our nation.

# 89%—OPEN RECRUITING Referendum Results Decisive

## Blacks Charge Racist Policies

Members of the Afro American Society listed a series of eight grievances against the administration Wednesday after a heated confrontation during which Edward W. Robinson, dean of men, was called a racist and a liar.

The complaints were read by Deloris B. Farmer (WLA) co-chairman of the Black Power movement working in the department. He said discrimination is not a recognized student activity as practiced by the present advisors.

Farmer read the campus Security Police should "quit acting as Black students by making them their own identification cards when on campus."

He listed the financial aid department, administrators of Ford Foundation Grants, "a bunch of craves" and charged the department staffers with "double dealing and pocketing funds."

Farmer leveled additional charges of racism on the department and called for the listing of a "Black advisor" for the duties of all groups.

He also added that 30 per cent of the students on Ford Foundation Grants—mostly Blacks—have "limited use" reflecting "double pressure on the part of the administration. Farmer also charged Blacks were being intimidated by the Student Council.

And he said, "The freedom of speech has been denied to us. No administrative or professor has the right to tell us what is right or wrong in our own words. The university has no control here upon us."

MAKING A POINT—Edward W. Robinson, left, dean of men, met with Deloris B. Farmer (WLA) and Rick Johnson (DPT), co-chairmen of the Afro-American Society, Wednesday afternoon to discuss what Farmer expected to be a disciplinary probe. He said Johnson is steering a point to the dean while Farmer listens attentively. (NEWSphoto by Mike Dorfman)

Dean Robinson's office under the disciplinary board so that I am sure that he was taking our message to you."

The meeting, which was motivated by the problem to the appropriate apartment where Farmer lives developed into a discussion of Black Power and of Black student rights on campus.

According to Gilbert S. MacDonald, dean of students, "there was no disciplinary meeting to take place when Robinson and they and I should have, I do not know, I do not know, I do not know."

# LSD Fad Replaced By "Speed Craze"

By CURT LEVINE

Boston hippies and LSD, long thought as inseparable as Batman and Robin or the Smothers Brothers appear to be breaking up after a whirlwind courtship.

LSD users in the Boston area are switching from their psychedelic diet to heroin and other narcotics, according to Boston Police Capt. Joseph W. Jordan, head of the vice and narcotics division.

This decline in acid use is one explanation for the new-found popularity of methamphetamines, commonly referred to as "speedy." Speed, like its sister drug, STF thrives due to its newness to the

Jordan, who is enrolled at North-

Jeffrey Smith (70 ENG), Division B referendum head, said 83 percent voted for total intensification and 37 percent for temporary bombing halt followed by negotiations.

He said 13.8 percent advocated intensification while 10.8 percent called for immediate and total withdrawal from Vietnam.

Smith said 2359 undergraduate and 12 faculty members cast

Division B participation in the first campus poll in Time magazine's Choice '68 presidential primary. Another 2038 students voted in Division A.

"It seems no matter how much publicity and advance notice the student body is given, the same number will vote," Smith said. "We feel, though, that the vote was pretty representative of the student body."

"If the vote had been today, the senior class, especially, would have been more dovish in its vote because of the recent suspension of occupational and graduate school deferments."

According to Smith's figures

Of the seniors who voted, 38.9 percent favored a bombing halt and negotiations as compared to 35.3 percent of freshmen.

While only 8.9 percent of the freshman class favored immediate withdrawal, 13.5 percent of the seniors made that choice.

About 43.3 percent of the freshmen voted for an intensification of the effort in Vietnam. That percentage decreased steadily among upperclassmen, as 34.8 percent of the senior class favored escalation.

While 14.6 percent of the freshmen favored a continuation

**MIKE DUFFMAN**  
of Tex. (TREA) and one other were suspended for six weeks beginning in March by the University's Regulations and Discipline office.

Official charges went to the courts read: "The University hereby expects each student to observe the rights and privileges of others and to adhere to acceptable standards of personal conduct. Students should exercise freedom with maturity and civility. Students are expected to obey the regulations of the University; to observe the structures of and respect the University officials."

The charges were the first since the start of the year. On campus, its first trial told the courts, could do so easily.

Four other students on disciplinary probation received a warning.

The two suspended were on disciplinary probation for their roles in the riot. The most ill in last week's

However, of probation since their return to school.

During the RAD committee meeting excerpts of the editorial were read by Dean Gilbert G. Smith, who said that the students in the official charges of absence. They were before the committee and the "offending" manuscript on campus.

The students immediately felt it a speck, but at first, no date has been set.

**PROTEST**

A petition is currently being circulated in the commons area concerning the charges were made and asking for the board of appeals to reverse the disciplinary committee's decision.

The incident began when student ID's were picked up by Dean MacDonald the morning the first class was on site.

The student ID's were returned the next day and the official charges followed a week later.

discipline committee member was described as "harsh" by a member of the committee, on Christopher F. Kennedy, chairman of the committee said details are always correct. "It's all right for the student to give out information, if used."

He said that it was the first a court stenographer was present to provide a transcript.

The student council petition written by Vin Div. A president, which asked the council administration upon the lack of available for determination of the type of voting system.

**DRAFT**

Eck said he was not Deep Kennedy of the board and that his draft board was notified.

He also said the Thon was an answer to the Thon that read the council's letter.

Eck called the Thon "a waste of time" and "a waste of money." After the school's instruction told the student council could only read and its decisions were binding.

**MacDONALD**

professor John Martin was on Monday.

Dr. Martin, an assistant professor, was released from the hospital until this week. He said he would not make any future decisions the university would be making according to regulations established by the American Association of University Professors, is not going to give a reason for resignation.

A former advocate of improved development in the Department of English and through the university, Dr. Martin expressed regret that he had been released, but offered no explanation.

BY STEPHEN WILLIAMS

JOHN Martin was declared not eligible for tenure by the Department of English and the university administration Monday.

Mr. Martin, an assistant professor at Northeastern for six years, applied for tenure last year, but the decision was made by an ad hoc official review panel for the refusal by the English Department.

According to A.A.U.P. rules an instructor must receive a tenure decision within seven years of his employment at any one institution. Many colleges give tenure decisions in three years; Northwestern's policy is not to give a decision before a seventh year at the University.

Dr. Martin told the NEWS he will submit a written appeal to the Administration for reconsideration of tenure.

Dr. Martin has been the subject

In early 1966 the topic of academic freedom came under Martin's attack. The controversy arose in November, 1965, when a student at Dr. Martin's writing class read an original story containing a four-letter word. Some students in the class claimed the story was "obscene."

In a letter to THE NEWS (Feb. 5, 1966) Dr. Martin explained his position. "When I asked the Christian English department to investigate," he wrote, "I was informed that the story was not obscene."

and judge it on artistic merits," he replied, "I don't want to do it."

In addition, Dr. Martin stated better, "The Chairman also told me that, when I should come up for a tenure vote, that I would not favor tenure for myself. I would he vote it. 'Too many complaints about you,' he said. 'Complaints that he had never shown interest in investigating or trying as to truth, though many have been patently ludicrous.'"

The next week (Mar. 4, 1966) in a noisy and bitter debate involving

The United States is losing the war in Vietnam," according to Everett Mendelsohn, associate professor of History and Science at Harvard University. Mendelsohn, who returned to Southeast Asia, was one of a group of speakers who addressed the War Studies Institute's area-wide teach-in to the Northeastern's Alumni Auditorium last week. The teach-in with the theme "Disillusion or Revolt?" was jointly sponsored by the Northeastern University Teachers' Committee, the Students for a Democratic Society, the Northeastern University Faculty Society of Northeastern University and the Boston Area Faculty Group.

According to Teach-In chairman Ed Liebo, professor of physics at Northeastern, the teach-in was held in response to "widespread interest in the political and moral issues involved in the war posture in Vietnam."

# It to NU

My first recollection of college life was the way I felt about Boston people. Coming from New York, I thought I had the advantage of being on the inside track. I mocked anyone and everything that didn't speak and look like me. I soon learned I was on the outside. Massachusetts people have a thing all their own - never bragging, just producing.

That first year was incredible - I couldn't handle everything at once. I felt like I was submerged in a pool and everytime I swam to the surface, it turned out to be the bottom. I don't think it was the exams or the work. I think it was the fact that I didn't have the comfort of coming home after school and forgetting it all. It just stuck with me - that constant badgering of the mind - school, work and more school.

Money really became a problem. I soon learned I couldn't come and ask Dad for a couple of bucks. Vietnam was a million miles away then, and a million years.

Majoring in Physical Education gave me an opportunity to meet many different types of people. Different in many ways but people who shared one common likeness - they enjoyed competition and the joy of striving to show their ability. I found there was no difference between white and black on a basketball court. A person is respected for his ability to produce. Differences are lost somewhere out of bounds. As a P.E. major you have to produce with more realness than in most other fields. You are competing with your mind and your body.

My next year I laughed at the freshmen and their immaturity. I was a pro, or at least I thought I was. I thought I was secure. I think that is where my biggest realization took place - you are as secure as you

think you are. A lot of my security was illusion.

That year I did more, met more people and understood much more. College became a way of life instead of a trip away from home. Vietnam got closer and the streets bled with unrest.

I had a lot of part-time jobs while I was in school, most of which I really hated but did for survival - like washing floors and dishes. But I guess I enjoyed each of them at payday. Co-op jobs were a little better. They mostly dealt or were connected in some way with physical education - doing a little coaching and training with kids. Co-op let me see first hand the pros and cons of my profession.

During my last three years at Northeastern, I began looking at issues. Vietnam was getting closer and the Administration was cracking down on the students. It was hard taking sides, because I felt that the extreme left had as many faults as the right. But on current issues - the war, racism and poverty - the right seems more oppressive. College became important to me not as an intellectual or professional activity, but as taking part in an experience that began to share the head-lines with Vietnam.

I met and married Vicki. The yearbook asked for nominations for the most important people in the last five years and I put her name down.

Northeastern is a changing place. I feel the university has changed in proportion to the times. We can't close ourselves off from a world that asks so much of each individual. A person is not a free man to the world around him unless he is a free man to himself. The past five years, I think, have placed a greater burden of individual responsibility and decision on each of us. And each of us must take a stand.

## Wednesday on the Common, Scene of protest, resistance

BY NEDDA YOUNG

News Rewrite

Benches marking the entrance to Boston Commons were occupied Wednesday by elderly men and women who come often to enjoy the sun and routine conversation.

Some sat and listened to the music provided by Ray, the Friendly Organ Grinder, as they watched children hold their outstretched hands to waiting pigeons, and then back squealing to their mothers when the pigeons got too close.

Most, however, stared at the thousands who went to the Resistance Rally in the Commons to protest the war in Vietnam and the Selective Service System.

The majority were college students who again gathered to voice their opposition in a way they knew best.

There were hippies, girls with flowers in their hair selling "the Resistance", boys and girls in favor of the war, who marched around advocating the stopping of communism. Middle-aged businessmen were during their lunch hour to see "what

more than a jail term; it was the start of a radical vocation.

He challenged resisters to work in the poor sections of the city where help is wanted. Lynd urged more involvement of the draft resistance with political issues.

Everett Meudelson, a Harvard professor who recently visited Vietnam during the Tet offensive, termed this period of war the "winter of our discontent and the spring of surprise and confusion".

He told the audience that victory in Vietnam was impossible and defeat is not entirely unlikely.

"There is a change in the mood of our people. There is dissent in voting — and a resistance to illegal authority," he said.

Meudelson "watched Vietnam be destroyed so we can save it," and there is no sign of a letup he added.

"There is no mention of the National Liberation Front," he complained. "The NLF doesn't think they themselves are losing the

## Alumnus asks soap for Viets

A Northeastern alumnus has appealed to the community here to collect soap for the children in and around Bien Hoa, South Vietnam.

Lt. William V. McTaggart, 66LA, is stationed at Bien Hoa where the 101st Airborne Division's Medical Battalion Civil Affairs of. As such, he leads a team of

medical men into the areas surrounding the Bien Hoa base to set up health stations in the villages. According to McTaggart, skin diseases are the most prevalent malady among the children and many of these result from a lack of soap. The medical teams are usually given only enough soap to treat one village in the course of a week in which they may visit several.

McTaggart indicates the treatment given is, at best, only temporarily effective because without more soap the maladies return.

In letters to friends here McTaggart has indicated the desperate need for soap to arrest skin diseases "that could have been prevented with cleanliness."

Any soap or money collected will be turned over to the Catholic Relief Service, which has been the

McTaggart says, if each of the school's some 30,000 students get one bar of soap, there would be enough for not only the children around Bien Hoa but all those

philosophy of Mahatma Gandhi. In the days since his death, newspapers and public orators have spoken of King as the apostle of non-violence." But this tells only half of the story. In his books *Stride Toward Freedom* and *Why We Can't Wait*, King emphasized that his doctrine was non-violent resistance. He stated quite explicitly that both words were essential — in opposing the evil of racism or the evil of the Vietnam War, non-violence was not enough; withdrawal in the pattern of Thoreau was insufficient. There must also

be active, positive resistance. And so, for the last ten years of his life, until he was murdered on April 4, 1968 while planning a massive demonstration on behalf of the garbage collectors of Memphis, Tennessee, King organized direct confrontations between his followers and the forces of racial bigotry wherever they existed, whether in Montgomery, or Selma, or Chicago.

But non-violent resistance, to Martin Luther King, was more than a philosophy and a technique to defeat racial bigotry. It could, he

hoped, end the war in Vietnam and end poverty in the United States. It was his concern with the oppressed of all races which led him to direct much of his energy in the last weeks of his life in winning support for the forthcoming Poor People's March on Washington.

King, working individually and through the Southern Christian Leadership Conference, which he founded in 1957, achieved a great deal — civil rights legislation, a spirit of love within the hear

"The bullets of the false revenge have struck us once again." So wrote Phil Ochs when John Kennedy was cut down. Tonight, once more the spectre of American hate has sired another tragedy. Tonight, the body of Rev. Dr. Martin Luther King Jr., general practitioner of peace, lies draped in the darkness of a Memphis morgue.

Tonight, on indigent street corners, the strategy of insurrection is being prepared. Barroom groups of nervous whites roagulate to contemplate the crime. Outside, down in the street, students move and laugh in the magic of the April night oblivious to the pain.

Tonight the radios blare forth contrived eulogies from pressured politicians, exciting lofty prose, they decorate his image with garlands of cheap condolence and false pity. Only this morning they were scheming to confound all of his dreams. Tonight they elevate his memory on a platter of silver phrases scolding the nation with paper sincerity, pledging mock support for his life.

But Dr. Martin Luther King rests still tonight to some distant Memphis morgue, his body as cold as the moral climate that led to his demise; his personal dreams defiled by an angry young assassin, who slithers through the night, a study of insanity in red and white and blue.

Martin Luther King is gone and the nation reacts with mixed emotions. Coming at a time when hope

## Blacks make steady gains; ASK will act on 13 demands

BY PETER LANCE

Northeastern's Black Community won a quiet victory Tuesday when President Knowles accepted all 13 of their demands for increased Black student enrollment, scholarships and curricula re-evaluation.

"The university is in sympathy with the objective implicit in your memorandum," Knowles said of a list of demands received Friday. He emphasized the importance of "insuring full and fair treatment for members of the black student community at Northeastern so that their status shall be the same as that of white students."

Knowles' acceptance of the demands came on the heels of his announcement Friday that the university will more than double its financial aid to black students during the next academic year. About \$175,000 in aid will be added to the \$125,000 now provided blacks in graduate, undergraduate, part and fulltime programs.

The formal list of demands was filed by more than 200 black students at a meeting in the ballroom Friday and presented to letters by William L. Hazlewood, LA, Delano B. Farrar, 89 LA, Steven A. Williams 88 BB, Arnold Evans 70 LA, and Ralph M. Rice 70 LA.

"At a mass meeting of black students the president's replies are received with favorable response," a spokesman for the group said, "but the students are now waiting for definite action and implementation of the demands in conjunction with a watchdog committee as set up by the black students."

Students are withholding further action until definite results are made on the part of the university, the spokesman said.

representatives of the faculty, administration and black students will be instituted as one of the 13 demands to "institute, view, and report on the University implementations of these demands."

Knowles immediately appointed Deans Norman Edward Robinson, and Professors James R. Bryant, Juanita Long, George A. Strait, Sr. and Duane L. Grimes to serve on the Committee with a comparable number of black students.

Other demands to be met include:

—Increased Black enrollment enhanced by a stepped-up recruiting program and additional tutorial assistance so that by 1971 10 per cent of the incoming Freshman class will be black.

—A re-evaluation of all social science and humanities courses with emphasis on Western Civilization and freshman English. The West-

ern Civ. course will be expanded to include lectures on African, Oriental, and Islamic Civilizations, while

## All Hail Columbia students

The efficacy of student protest and power has never been more necessary than in these tumultuous days, as a people strive for equality and an unjust war in Southeast Asia drags on.

A large group of Columbia University demonstrators are using their power today in the face of police brutality to combat the evils and excesses of the Columbia Administration. The NEWS supports them and hopes their demands are met.

Student power, the right and obligation of the student to exercise power in order to influence or force university decisions that affect the student and the neighboring community are essential at Columbia, where the administration has not acted morally in issues of poverty but instead has chosen to suppress the needs of a community and the desires of its students.

The protest was sparked by three issues: (1) A project to build a new gym adjacent to Morningside Park, site of the University, overlooking Harlem. (2) Columbia's ties with the Pentagon, its affiliation with the Institute of Defense Analysis, a 12-university consortium that does military research for the Government, and an issue related to complicity in the Vietnam War. And (3) A demand that students who had previously demonstrated because of the first two issues be granted amnesty from disciplinary action.

One of the issues involved had been subject of much reflection by concerned students. For more than a year, they held rallies and circulated petitions to protest construction of the new gym. They considered it a callous affront to citizens, who did not want the gym located in Harlem.

Three groups, acting against Administration policies, physically seized control of five university buildings last week, bring-

barricaded buildings. More than 100 students were injured and 638 were arrested. The police acted brutally and clubbed and kicked people indiscriminately, but NYC Police Commissioner Howard R. Leary, who witnessed the eviction, complimented his men for an "excellent" job.

Students and sympathizers acted immediately in response to these developments. A coalition of 80 student leaders representing every class, club and political group called for a student-faculty strike, the resignation of University President Grayson Kirk and Vice President David Truman and an investigation of the trustees responsible for calling the police. A number of students and faculty said they will attempt to "close the university for the rest of the year, unless major changes are made in the administration. (GLOBE, May 1.)

The similarities found in the Columbia situation and the Free Speech Movement at Berkeley four years ago are striking and bear relevance to all students attending large impersonal urban schools. Columbia has a high percentage of commuters, after class they make their way through this nation's largest city. The campus atmosphere is not conducive to learning processes. The leaders of the university are remote and cold. The students have difficulty pinpointing causes of injustice. At Columbia and similarly large schools, the sources of the exercise of power are undefinable and unreachable.

Since this school is a large and impersonal one which lies close to ghetto areas, we urge that Northeastern students reflect on their own relationship with this school and the Roxbury community.

President Knowles has taken steps to expand aid to the Black community with a special policy for recruitment and several p

4. Separate orientation shakes university community.
5. UCAR attacks IFC for non-action.

## WHITE RACISM

## BLACK ORIENTATION PLANNED

## Separate Social Events Offered To Incoming Negro Freshmen

By MIKE DORFMAN

Separate black and white orientation programs evolved during the past week as the result of the 13 Black Demands made to President Ann S. Knowles in April. The Black Concern Committee, BCC, has prepared a program designed specifically for black students.

Dean of Freshman Christopher Kennedy outlined the program as including parties at a black student's home, visits to the Avant Garde Coffee House, two movies, "Cool World" and "Color US Black," and a dance at the Professional Businessmen's Club on Massachusetts Avenue.

The Freshman Orientation Board (FOB), concerned that a separate orientation program could lead to a split in the class, will meet with Dean Norman Rosenblatt, chairman of the BCC on Monday morning.

## ESTIMATED COST

The cost of the black orientation program was estimated by Dean Kennedy as \$600.

The sixth demand, made days after the assassination of Dr. Martin Luther King,

agreedable compromise.

At the Student Council meeting on Tuesday, a joint resolution offered by Jim Seldner (TIA) and David Levinson (TIB) proposed five guidelines.

The guidelines call for a joint freshman orientation committee administering all allocated funds.

All activities must be open to all freshmen with a black speaker invited to address the entire class.

## DIRECTION

The resolution said that it assumed if the black students will direct the program related to black orientation within the framework of the black committee.

Dean Kennedy said he does not know if white students would be allowed to attend the black programs as planned now.

He stressed that this is merely a trial. "I don't know what will happen in a future year," he said. "The black orientation is subject to modification and compromise."

A SENSE OF RESPONSIBILITY — Marc Trevis

## Racism at NU Fought on Two Fronts

## B. STEVE THORP

The April assassination of Dr. Martin Luther King Jr. has provided the impetus for the most detailed examination of the status of the black student at Northeastern in the school's history.

A new awareness of the black student, his history, his culture, his outlook, his particular needs at a large urban university are attracting the attention of several new groups who are devoting their efforts to make a new black voice heard at Northeastern.

## THE BLACK CONCERN COMMITTEE

The new emphasis is on facilities, how they can be used by the black student to further his interests or how certain institutions at Northeastern may impede the black student's efforts and be damaging to his interests.

The most noteworthy effort to define the precise relationship of black students to Northeastern was the May 3 formulation and presentation to

the administration of 13 demands by black students for the implementation of programs to serve their immediate needs.

One of the new groups concerned with black affairs grew out of these demands. The Black Concern Committee, a "weekend" group, is working to insure that the demands are implemented quickly and fully.

Meeting every week for ten weeks, on Wednesdays, the committee is composed of six black students and six faculty members and administrators. Dean Norman Rosenblatt of the College of Liberal Arts serves as chairman.

The work of the committee so far may be described as formal, but also that of the program outlined in the demands are very in the university.

Committee members are concerned with the accumulation of experience that may be used in the refinement of an existing program or better coordination of a future one.

For example, the preparatory program for blacks entering Northeastern in September has had to overcome a host of non-academic problems.

Internal problems, such as the need for more time for planning or the need to further consult the students about their reactions to the curricula.

Eventually, the knowledge gained could be used to coordinate a preparatory program into the academic year for students who have not participated in a period program before their Freshman enrollment.

Also connected with the demands, is a self-reflective movement to determine the extent to which racism exists at Northeastern.

## UNIV. COMMITTEE AGAINST RACISM

The University Committee Against Racism (UCAR) set up in the days immediately after Dr. King's assassination, was a concerned group of white students and faculty members.

UCAR is discussing none of the reasons contributing to the status of racism, and distrust which led to Dr. King's death.

Then, at once, the group was confronted with an, main agent of racial discord in the US is white racism; not only the racism that emerges black and white in day, but the racism of American socioeconomic institutions, such as the Vietnam War, the harassment of black students by police and inept police forces and reactionary school systems, and use of white supremacist curricula.

For the black students up through the university level, a whole new set of demands is being made. Realizing that black people are attempting to correct the adverse product of these institutions by themselves, UCAR decided that to meet the needs of Northeastern was to support black students rather than attempting to define and direct that struggle.

The last month of the Spring term, UCAR supported the black students' resolution's demands.

No help was asked and no help was given in the demands and presentation of those demands. UCAR has moved out of its state of opposition to a state of white racism.

With the acceptance of the demands and the beginning of the Summer term, UCAR has begun an intensive discussion of how to better implement the first half of the policy.

A primary consideration is self-education. UCAR members are constantly discussing and reevaluating their own feelings on racism. The group tries, with some degree of success, to promote this attitude in all its contact with the University body.

Students and faculty must understand. UCAR members are urged to attend the group workshops and general meetings at 11:30 on Tuesdays and the day, information can also be obtained at the group's booth on the Concourse.

## President Answers Demands

By MIKE DOREFSMAN

President of the University Asa S. Knowles Thursday gave the Student Council broadly based new powers in his answer to the 13 demands made by the Student Concern Committee.

This new power derives from a new commission, the President's Advisory Commission, which will be composed of administrators, students picked by Council, and faculty chosen by the Faculty Senate.

"The gist of the entire statement shows that the Student Council will have more authority," President Knowles replied.

His statement notes that he realizes students' impatience with the slowness of democratic processes, but he asks that the students avoid hastily conceived proposals and arbitrarily imposed decisions.

President Knowles refrained from specifically outlining the commission's duties in great detail because he felt such an action would be limiting.

"Their duties will become more apparent," he said, "when the members meet amongst themselves." His memo, which was released to the academic community of Northeastern, suggested that the advisory council open many of its meet-

ings for the free exchange of all viewpoints.

Going into the specific demands, his answers are:

(Continued on Page 3)

## Demands Week In Retrospect

By PETER SEREMET and MARGARET RHODES

Student interest at Northeastern not dead as was rather painfully evidenced by the more than 100 members of the student body who attended the four meetings in the past week raised the Student Concern Committee's SCC's 13 demands given to President Asa S. Knowles last week.

More than 300 students jammed the Student Center ballroom Tuesday night and about 350 Wednesday night. Members of the SCC spent several days urging them to "be concerned" and voice their opinions. As it turned out, the students needed little prodding once they got together.

The Monday night meeting was a preview of what was to come on a larger scale Tuesday night. About 50 students met Monday including members of the SCC steering committee, Student Council and representatives of several campus organizations. The meeting started peacefully enough but questions quickly arose over such things as the purpose of the meeting, who called the meeting, and who appointed the members of the SCC steering committee; and whether they were representative of the student body. The end result was flaring tempers and personality clashes.

Members of the steering committee seemed to be under the impression that the meeting had been called to further formulate a course of action concerning the demands.

(Continued on Page 3)

—Marc Stern

PROTEST ASHES — Skip Finley burns his copy of Pres. Knowles' reply to the Student Concern Committee's 13 demands. The gesture took place in

On Friday, September 20, a group of students submitted to me a list of proposed changes for improving communication with students and the recognition of student viewpoints in the operations of the University.

I have consulted with many members of the academic community, including members of both the Faculty Senate and Student Council, and I find that there is considerable interest in improving our methods of communication. There is also substantial support for increased efforts to enlarge the students' participation in University affairs.

We are in an era of widespread demands for change and reform in higher education throughout the country. The interest of modern students is a refreshing contrast to the relative apathy of certain earlier periods. Like other universities, Northeastern is challenged to recognize the need for possible reforms. At the same time, it must be recognized that at a university the process of change should be consistent with the institution's commitment to scholarly investigation, free and open discussion, and democratic procedures. In this process, the unique roles and responsibilities of students, faculty, administrators, and trustees must also be recognized.

In the past decade there have been major changes in the role of the faculty at Northeastern as evidenced by the creation of the Faculty Senate, procedures for granting tenure, and faculty participation in the selection of candidates for academic administrative positions. It is now in the midst of effecting comparable

changes in the role and responsibilities of students. Within the past few years student members have been added to university committees on activities, housing, discipline, planning, cooperative education, and curriculum study. In the current *Student Handbook* may be found a statement on the "Rights and Freedoms of Students" which has recently been accepted on a basis for determining the student's role in the University.

Within the context of a changing role for the student at Northeastern, I can readily identify with the spirit of the demands which stress greater participation in University affairs. Therefore, in order to insure fresh approaches to the problems of student participation and communications with administrators and faculty of the University, I will immediately appoint a broadly based President's Advisory Committee composed of students, faculty and administration. I shall seek the advice of the Faculty Senate, the Student Council and the Academic Council in making these appointments. I hope that the committee will hold many open meetings so that all viewpoints may be heard and properly considered. I can understand the impatience of some students with the slowness of the democratic processes, but we must avoid the alternatives of hastily conceived proposals and arbitrarily imposed decisions.

Let me discuss briefly each of the issues raised by the list of demands.

1. At fiscal policy and tuition — Last spring I agreed to discuss fiscal policy with the Academic Committee of the Faculty Senate.

and I would be glad to have students join in this discussion. I will ask the President's Advisory Committee how they should be selected.

2. Faculty dismissal and tenure — This is a responsibility vested in the faculty faculties by the Board of Trustees, and I will urge this matter receive serious consideration by the faculty.

3. Pass-fail electives — The decision to have pass-fail electives must be decided by the college faculties, since each has the final authority for both the approval of courses to be offered and the establishment of criteria for measuring the accomplishment of the students. Several of the Colleges have already voted a pass-fail option for their students. A Faculty Senate committee has the matter under consideration at the present time. I am already on record as favoring a pass-fail option whenever faculties find it acceptable.

4. Bookstore — The bookstore is truly non-profit and is operated as a service to the University community. As far as possible its operations are intended to be self-supporting and should not be subsidized out of tuition income. The operations of the bookstore have been explained to the Student Council on several occasions.

5. Food Service — I cannot accept the concept that the food service contractor be selected by a student committee because of the legal and financial responsibilities involved. The University already makes individual arrangements for students who have special food requirements for religious and health reasons. I shall request the existing student food service committees to meet immediately with the Vice President for Finance to review the whole food service situation. In this connection, I want to ask the Student Center Committee to give

particular attention to the Student Center Cafeteria.

6. Student Court — I am not opposed to a change in our present procedures. Various disciplinary systems are already under consideration by committees of the Student Council and the Faculty Senate.

7. Voluntary Dormitory Residence for Underclassmen — This matter is under investigation by the Committee on Dormitory Life, who will shortly conduct a poll among the upperclass women students. It should be recognized that major changes must be planned carefully to insure that the dormitory operation does not become a financial burden on the non-residence population.

8. Freshmen Residence in Dormitories — Given the shortage of housing in this area, together with the past experience when freshmen found their own housing, it seems wise at present to continue existing policies regarding freshmen housing.

9. Birth Control Information — The University has little option in this matter, since Massachusetts law allows the giving of birth control information to married women. The University cannot create a policy that would place the physician in the position of violating the law.

10. Choice of Coop Assignments — Under the Northeastern University Cooperative Program the student and the faculty coordinate for work together in seeking experiences best suited to the interests, abilities and aptitudes of the student. In recent years, considerable flexibility for the student has been introduced into the program. However, the degree of choice available to a particular student varies according to both his individual circumstances and the field in which he is studying. The Student Advisory Committee to the Dean of Cooperative Education, which was formed this summer, will be asked to examine the advantages and disadvantages of additional flexibility and make

# Students Support 12 of 33 Demands

By LENNY GAMACHE

More than 1,200 Northeastern student faculty and graduates voted on the Student Concern Committee's referendum of Friday, October 25.

The most significant demand of the thirteen was the final one providing for a Student Concern Committee, open to the study body for the negotiation of student demands. The vote was overwhelmingly in favor of the Committee with 827 votes for, 301 against, 63 undecided, and 51 failed to answer.

Through the referendum students and faculty alike expressed their desire for an established Student Concern Committee.

Phil Mandell (69BA), president of the Interfraternity Council which sponsored the referendum, considered the total vote to be a low one. He attributed this to be number of reasons including very poor publicity by the SCC and the extreme length of the referendum.

## LONG BALLOT

Mandell said, "The ballot was so extremely long and complicated that it did take a long time." He also added, "The SCC insisted that the ballot include both the demands and the replies."

Of the 1,232 persons who voted, 1,177 were undergraduates, 33 were graduates, and 22 were faculty members.

The undergraduates rejected only the seventh demand concerning voluntary freshman residence in dormitories, while the faculty disapproved of the first demand relating to faculty dismissal. The graduates voted in favor of all demands.

A number of demands received a decisive majority with at least 70 per cent of the voters in support. These demands concerned the formation of a student committee on tuition raises and fiscal policy, a pass-fail elective, a true non-profit bookstore, an all student court, choice of co-op jobs, a new library and its qualifications, observers on the Board of Trustees, excessive size of classes, and a Student Concern

# Black Freshmen --- On Guard!

By HENRY CABARRUS

Don't be caught off guard in the act of survival. That is, in the midst of a naive action, remark, etc. Sometimes it is better to be silent, and thought a fool, than to speak up and clear up all doubt.

This doesn't preclude that you must be a humble pick-over for you or anyone to think that one person or group brought about the many problems that confront Blacks in society today. Nor can you think that any one person or group brought about the great benefits that are available to Black students or Blacks in general.

Either it is the interaction between several groups that bring about changes, necessitating communication for this revolution.

Don't be caught dead thinking that appearance of a person can preclude their blackness.

Black to me means an affirmative attitude toward the upgrading of black power in all of its aspects. Don't think that Blacks are the only down race. Look around at all of the bruised knees! We are not the only race not standing up.

For power one must have communication. Black to me means an affirmative attitude toward the upgrading of black power in all of its aspects. Don't think that Blacks are the only down race. Look around at all of the bruised knees! We are not the only race not standing up.

Blacks don't have a formidable communication media yet. Neither oral nor written means. This is a deadly handicap, and it is up to you to help establish one.

Black Students' Union and Afro are two agencies set up on campus to overcome this handicap. Please go to both, and see what you can do for them. I am sure that they can do something for you. Afro meets on Tuesday and Wednesday on Thursday during activities period. Check in 134-EC for information.

You may wonder why I am emphasizing Black freshmen. Why should race be emphasized at all? It is the fact that race has become the core for the categorization of ideas about human differences.

Most people do not know the difference between race and ethnic groups, or between race and social class. Therefore it makes for economy of thought to ascribe peculiarities of appearance, custom and values, to race.

It is simpler to attribute differences to heredity (race) than to juggle all the complex social grounds for differences that exist.

In order to be specific in dealing with personal attitudes and representative group power, I directed this article to Black freshmen.

Getting closer to the home plate of education, if you feel that there are areas of the Black plight that you are not up on — there probably are. I would suggest that the quickest way to catch up is to gain first hand experience from someone.

I have found that Black autobiographies are one of the fastest and more economical ways — time, mental, and money-wise — to achieve this. It may be up to you to do this in order to get an authentic view of your major field, before you graduate.

Education, no doubt, is one of the few means left to the Black man to get his equality successfully through self-determination. But education seems to be the hardest thing for the Black race to obtain, even though it is the most vital tool necessary for his survival. It is found only by those who expect and probe for its productivity.

Education is most vital for survival because it has a direct bearing on economic and political endeavors. This is best pointed out in a quote by Horace Mann: "No educated body of men can be permanently poor" and the converse is that no uneducated group can expect to rise out of poverty.

THERE'S NO PLACE IN THIS WORLD WHERE I'M BEHOLD, WHEN I'VE DONE, AND I WON'T KNOW THE RIGHT FROM THE WRONG.

CABARRUS

## Explodes on Campus

minutes in which to make their first official campaign speech. Everett Nau, as Herb Acid, leader of the Marijuana Grass, came onstage with his band playing

### Campaign Trail

Last night two representatives from the Nixon-Agnew National Campaign Headquarters were here.

They conducted a question and answer period on the former vice-president's policies. They also collected questions which will be sent to Nixon, and will be answered by return mail.

There is speculation that Nixon may be here, within the next two to three weeks, under the auspices of the Distinguished Speaker Series.

Northeastern is one of three colleges under consideration for the Nixon visit. The other two are Harvard and BC.

"All Hail Herb Acid" to the tune of "All Hail Northeastern."

His companions, dressed in Mexican garb, carried signs with such statements as, "A pot in every chicken," "Push Herb Acid — he injects you with spirit," "Go Herb Acid — he's addictive," and "Push Herb Acid — he'll dilute NU's pupils." Herb was introduced as "the man who will give you a shot in the arm."

He sang "The Old Dope Peddler" and said that unlike Mayor Daley of Chicago, he would not attack the students of Northeast.

## Vicious Cycle of Racism

By JIM KILPATRICK  
UCAR President

Welcome Freshmen, not to Northeastern, but to Roxbury. What is Roxbury? It's a ghetto and it's one half mile, a five minute walk from your new school. You can see its periphery by looking out the windows from the back of the luxurious student center with the extravagant red carpeting.

The Kerner Commission report gives us some facts that are characteristic of the ghetto.

The crime rate in the ghetto is almost triple the national average. Vandalism, juvenile delinquency, shootings, knifings, dope addiction, prostitution, rapes, and theft are frequent occurrences in the ghetto.

Unemployment rates for ghetto dwellers are double those of whites. About two-thirds of the low income group are making insignificant economic gains despite a continued national prosperity.

Where there is employment, the jobs are generally low status, unskilled jobs involving substandard wages, great instability, and little or no chance for meaningful advancement.

The maternal mortality rates for non-white mothers in the ghetto is four times that of white mothers and the relative gap is increasing.

The infant mortality rate among non-white babies from one month to one year of age is 58% higher than for whites.

Over forty percent of the children born in the ghetto are illegitimate. The number of families with no father averages about thirty-nine percent.

These are facts, but why do they exist and why haven't they changed? I offer two words in answering: White Racism.

The reason the ghetto black can't get a job is discrimination, not just by white employers but also in the ghetto educational system.

The system gives black children inferior schools, with inferior, insensitive teachers and a

middleclass white curriculum that has no relevancy to the child's ghetto life.

Furthermore, because their families need the money, many children are forced to drop out of school before graduating. Either way, a poor education means a poor job which means poverty — right back where we started.

Faced with the frustration of poverty, discrimination, and powerless the black man is psychologically forced to turn to crime, dope addiction and alcoholism. Children with no fathers and mothers must often work and naturally turn to the streets.

Then the same white society which has psychologically caused criminal behavior physically arrests the ghetto "law-breaker." Then he is judged in a court by a double-standard of justice which differentiates laws by color.

Forced into poverty by white racism, the ghetto black can't afford a lawyer or a costly appeal. A criminal record ensues. Then white society says we can't give you a job, baby, because you've got a criminal record.

Since ghetto families are poor, they can't afford birth control devices, medicine or sufficient food for their children. This causes a high infant mortality rate. But all white society says is "Look at those babies they're having; they deserve poverty."

Poverty means below average income to pay for average priced food. But in the ghetto, local white merchants charge above average prices for lower grade or lower quality products. They do this, they say, to cover the losses due to crime in the ghetto.

The ghetto in Roxbury is not a black problem but a white problem caused and perpetuated by the vicious cycles of racism that pervade our whole socio-economic system. This is a problem only whites can change. I urge this year's freshmen students not to follow in the footsteps of their fellow upperclassmen who, by their apathy, have taken part in the cycle one-half mile from their school.

# OCTOBER 1968

1. Olympic Games begin with 7,226 athletes from 119 countries.
2. Bob Beamon breaks long jump record with incredible leap, 29' 2 1/2".
- \* 3. Carlos and Smith score "black-power" victories.
4. Wallace chooses Gen. Curtis E. LeMay as running mate.
5. Boeing 747 takes shape in secluded hanger.
6. Stock market rises to 930 after 825 low-point.
7. Agnew makes racial and ethnic speech-blunders.
8. "Laugh-In" becoming number one TV show.
- \* 9. Biafran War draws attention for starvation, not killing.
10. Teacher strike in NYC hurts children and peace.
11. Pueblo crew member gives world the "sign" in a photo.
12. Al Kaline erupts in fifth Series game to lead Tigers to championship in eventual seventh game 4-1.
13. Bob Gibson pitching record 22 wins, 13 shutouts, 1.12 ERA.
14. Blacks get more and more TV commercials.
15. Marriage of Jackie and Aristotle Onassis.
16. David (Shapiro) Frye starts doing great imitations.

- \* 1. Election of Richard Nixon stirs campus radicals.
2. \$1300 netted for new library books.
3. Prof. Grimes loses at polls.
- \* 4. Sixteen-story library proposed for 1970.
5. Frisbee "riot" in student center.
6. SC secretary quits; calls group politickers.
7. Student Court approval sought by planners.
8. WNEU-am seeks to become WRBB-fm for more power.
9. Silver Masque puts on "Detective Story."
- \*10. Coeds break rules and get own apartments.
- \*11. Football season.
- \*12. Olatunji and Drums of Passion perform.

the number of girls involved is rather impossible to estimate and there is no way to tell from their addresses how many of them are living in the dorms. They are leaving a housing risk which permits only those girls who are of age to live in an apartment unless they have special permission.

The number of girls involved is rather impossible to estimate and there is no way to tell from their addresses how many of them are living in the dorms. They are leaving a housing risk which permits only those girls who are of age to live in an apartment unless they have special permission.

According to most of the 16 girls interviewed, the fear of getting caught is a hazard that they would rather live with than move back into the dorm.

One girl stated, "It's easier to listen to your three roommates complaining than to the fifty on your floor." Saying out is a hassle most of the time, said another. Apartment life takes the pressure off you "was one girl who said. She also said that dorm life is stifling with the roommates watching you.

"You can invite your boyfriend over and make him dinner in your own apartment. You don't feel like a freshman, but other an adult, and that is what we are."

The lack of privacy in the dorm was a complaint from all the girls. One said that she has a lot of pride in living in her apartment. "You can invite your boyfriend over and make him dinner in your own apartment. You don't feel like a freshman, but rather an adult, and that is what we are," she said.

Independence is stifled in the dorm according to one girl who said that living in the dorm keeps one from growing up.

I could never cook and my roommates weren't too happy about hot dogs or hamburgers when I was in the room to cook so I bought a cookbook and learned, or rather tried to learn. Sometimes I think that my roommates would prefer to share me with the hot dog."

One girl said that she had reacted to living in the dorm as being "my period of stagnation I met people but I hated it. Having my meals ready for me, no matter how bad they were, on having someone cleaning the bathroom and my garbage collected every day. Now I want to do it all myself and keep a house, but it's nice to be able to know that I can do it."

None of the girls interviewed would ever consider moving back into the dorm.

on Vietnam  
FAR FROM THE MADDING CROWD A Northeastern student studies in the quiet of her off-campus apartment.

With Chung  
THERE'S NO PLACE LIKE YOUR OWN HOME and this girl can attest to the fact that living away from the dorms has many advantages.

With Chung  
THERE'S NO PLACE LIKE YOUR OWN HOME and this girl can attest to the fact that living away from the dorms has many advantages.

The apparent reluctance that most of the girls have about moving out is not true as they all admitted. Someone could easily sign and be over to their apartment and put their real name address. They fear having some "party girl" mention to someone in the dorm's office that the living off-campus illegally. Another study states that when the girl visits someone in the dorm someone says "how's your apartment?" while she is sitting in front of a householder.

For many of the girls moving out of the dorms was only that they could possibly stay in school by financial difficulties. By sharing an apartment, three or four girls, expenses were reduced and many have even rented four-bedroom apartments and have seven or eight girls share the costs.

But what are the disadvantages of living in a dorm?

Some of the girls felt that studying could be difficult if two of the girls were on campus and the other in school, but one girl said she had solved that problem by apartment by a rule that guests were not allowed before an exam or a paper must be done. The girls make the library and many felt that the dorm is not a place for studying.

"It looked like it hadn't been painted since World War II and the stove had been cleaned since then either. We had furniture from Morgan Memorial and it looked anything given or begged for."

Other disadvantages included decorating as apart. While in the dorm, it is only open room. One girl said her experiences when she first moved into her apartment.

"It looked like it hadn't been painted since World War II and the stove had been cleaned since then either. We had furniture from Morgan Memorial and it looked anything given or begged for."

With a little ingenuity, most of the apartments have been transformed from a pumpkin into a real one with the help of the magic wand of friends, while others are the garden patch.

Even the little mechanical difficulties that always seem to occur can be solved by the help of an apartment mate.

One girl summed up her feelings about apartment living as, "It may be a novel, but hell, it's home."

# The Librarian

## Construction Begins in '70

Construction is expected to start on Northeastern University's 16-story library-learning resources center in the summer of 1970.

The library will be built in two phases, with the first phase costing \$6 million and with completion scheduled for the fall of 1972.

When the second phase is completed, the library will be able to house one million volumes. After completion of the first phase, the center will contain 280 individual electronic study carrels scattered throughout the building, President Asa S. Knowles reported.

There will also be a seating capacity for 1,600 students, including 775 non-electronic study booths and 120 small study-conference rooms.

The \$6 million cost includes equipping the building with the latest electronic learning resources which will feed information using a variety of media from a central communications area in the first floor to the 280 electronic carrels.

The entire 16-story tower will be completed in the first phase, although six upper floors will not be finished on the interior until the second phase. The top floor will house the building's mechanical equipment.

President Knowles said the university has applied for a federal grant to help finance the building and an anonymous donor has already pledged a gift of \$1 million.

The library will be constructed around a central service core containing rest rooms, stairways, and elevators.

On the ground floor, in addition to the communications center, will be the library's processing area. The main entrance will be on the first floor, which will house a lobby, exhibit area, circulation desk, catalogs, reference area and periodicals.

President Knowles said the existing Dodge Library will continue to be used as a library when the new center is completed.

The center will be located between Churchill Hall and the railroad tracks, and will be faced with the traditional white-gray brick.

# Making of a President

By DICK MATTULINA

1960. JFK in a squeaker. "The press won't have..."

'62. Pat Brown relected. "The press won't have Nixon to kick around anymore."

11/22/63. Dallas. Noon. Black Friday. JFK assassinated by "lone gunman." Osgood/Osgood. Tippit, Oswald, Ruby. New Nixon born.

'66. Recrudescence Reagan beats Pat Brown. Kick in the former vice-presidential teeth.

11/30/67. Senator Eugene J. McCarthy of Minnesota (who?) to oppose LBJ on war stand. Split the Democratic party? Goodie, goodie.

Sometime, 1967 - Julie and David. How cute. A White House wedding? Ojoojoojoojoo.

## NINETEENSIXTYEIGHT

February... Romney's brain washed. On to New Hampshire. One down.

MARCH - White Knight upsets Johnson in New Hampshire. Moral victory. Fight it out, boys. Massachusetts wins. con-sinoregonnewjersey...

APRIL FOOL: "I will not seek, nor will I accept the nomination of my party for another term as your President." Noble gesture. Two down.

4/3/68. Bobby's candidate. Young upstart. Ruthless. Wiretap. Day of Pigs. Good Christ, not another TV debate.

4/4/68. Rev. Dr. Martin Luther King Jr. gunned down in Memphis. "Lone assassin." Oh, Christ. Horrible. Pity, love, brotherhood. Everyone's a liberal.

4/7/68. King hured. Scratch another nigger loudmouth. Three down.

4/8/68. Hubert Horatio Humphrey leaps into the fray. Surprise, surprise. No primaries. Backdoor politics. Too late. To hell with the people. Good.

4/30/68. Rocky decides at last. He'll run. Hey! What about party unity? Julie and David.

6/5/68. California Wednesday. Dramatic victory. Hurrah, hurrah, hu... shots, screams, blood. Robert Francis Kennedy fatally wounded in Los Angeles hotel. Tears, anguish, disbelief. Lone assassin. Hasn't this happened before? Four down.

Dr. Spock. SUMMER: Ike's coronary. Get one for the Gipper.

AUGUST: Miami. Reagan. Stassen. Goldwater? Sorry, Rocky. To hell with the people. Republicans rule. Right, right, right. Strom. Five, six, seven down. Spiro T... Julie and David.

SEPTEMBER: CHICAGO. Pogrom in the Park. "We love Mayor Daley." Up against the wall, mother. Eugene Who? Ribicoff and Unruh and young black Julian. To HELL with the people. Eight down. Humphrey-Muskie.

OCTOBER - Fat Japs. Polacks. Seen one slum... Spiro gets the bigots. Sincerest apologies. David and Julie. ... Debate? Whatever for? To hell with the people.

Bombing halt. My God. Commie dupes. Better dead than Red.

NOVEMBER. 290 Electoral votes. Vote with your feet. To hell with the people. Humphrey/cavegreedy down. Wallace Lemay. Last little indian. Vice President Agnew.

#### NOVEMBER 1968

1. Nixon-Agnew win election by less than 1% of vote. 29,565,052 to 29,539,500 to 9,181,466.
2. Riots in Tokyo by students and political people.
3. NYC hit by several strikes at once, Lindsay going nuts.
4. Shirley Chisholm wins Brooklyn election.
5. Womens groups demanding abortion reform.
6. Catholic Church reaping own kind of dissent.
7. Commercials against litter and smoking.
8. N. Vietnam bombing halt called for by LBJ.
- \* 9. Harvard and Yale tie in 29-29 fiasco.
10. Toomey wins decathlon event at Olympics.
11. Heidi Bowl on NBC. 32-29 NY lead turns to 43-32 loss to Oakland.

- \*1. Students fight for and get more vacation time.
2. Silver Masque schedules bawdy "Lysistrata."
3. UCAR plans sensitivity sessions for NU racists.
4. Experimental college folds for lack of funds.
5. Cars being pilfered from lot incite commuter protest.
6. Students spend first Christmas holidays with Nixon as president.

## Night before Christmas

By MIKE BROWN

*Twas the night before Christmas and all through the slums,  
not a Honky was stirring not even a bum;  
The villas were stocked by the chimney with care,  
in hopes that Brother Eldridge soon would be there;  
The children all starving and cold in their beds,  
while visions of Freedom danced through their heads;  
With you and your roaches and me and my rats,  
had just settled down for a much needed nap,  
When from the streets there came such a banter,  
I sprang from my bed to see what was the matter.  
Away to the window I flew like a flash,  
fore open the shutters and threw up the sash.  
The moon on the breast of a new fallen "Boy,"  
gave feelings of sorrow to those who sought joy,  
When what to my tear-filled eyes should appear,  
but one "Black Maria" and 12 men of fear.  
With a little ol'driver, so callous and slick,  
I knew in a moment it must be St. Dick.  
More rapid than eagles his millionaires came,  
and he whistled and shouted and called them by name;  
"Now, Order! Now, Justice! Now confusion and mix-ups!  
Gone freedom, gone protest, gone hopes for a shake-up!  
To the torch of our freedom, to the problems, unsolved,  
Now dash away, dash away, dash away all!"  
As problems before the people did fly,  
when we met an obstacle, we tried to reply.  
So up to the White House, the millionaires flew,  
with a mouth full of promises, and St. Richard too!  
And then, in a twinkling, I heard at my door,  
an officer telling me to open, "Or!"  
As I drew in my head, and was turning around,  
on my new T.V. St. Richard was found.  
He was dressed in a costume, from his head to his foot,  
with no trace of anger, but how his lists shook.  
A silk-like material hung from his back,  
and he looked like a demon, with no traces of black,  
His eyes, — how they quivered, his jaws how they fell,  
his cheeks were like caverns, his nose like a bell,  
His droll little mouth was drawn up like a bow,  
And the skin of his face, was as white as the snow;  
His complexion seemed one of much felt grief,  
yet the meaning behind it, was hidden quite deep.  
Behind his broad face and his fat little belly,  
that shook when he spoke, like a bowlful of jelly,  
He was dumpy and plump, a right jolly old elf,  
and I cried when I saw him, inspite of my self;  
A wink of his eye and a twist of his head,  
brought in the policeman and all I did dread;  
He spoke not a word, but went straight to his work,  
searching and yelling, then he turned with a jerk.  
And laying one finger aside of his nose,  
seeing my gun, out the door he had blown,  
He sprang to his wagon, to his team he did whistle,  
and away they all flew, like the dawn of a missile.  
But I heard him exclaim, ere he drove out of sight  
"Happy Xmas to Niggers, and to all a good night!"*

## DECEMBER 1968

- \* 1. San Francisco St. College disturbances, fights.
- \* 2. Chicago convention action called police riot.
- 3. Anders, Lowell, Borman . . . ready for moon ride.
- 4. 78 miners closed up in Mine No. 9 explosion in W. Vir.
- 5. Public television on rise financially.
- 6. Loch Ness monster draws attention, with "findings."
- 7. NYC cops accused of sleeping on duty, pictures taken.
- 8. Skyjackers plague all airliners.
- 9. Barbara Jane Mackle abducted for \$500,000 ransom.
- 10. Construction of Paris Peace-Talk-table irritating.
- 11. Arab commandos, Al Fatah gain strength in Palestine.
- 12. Joe Namath shaves Fu Manchu mustache for \$10,000.
- 13. Big E, Elvin Hayes, making baskets at San Diego.
- 14. Flu epidemic hits northeast area.
- 15. College students learning about police beatings.

## NORTHEASTERN UNIVERSITY

Editorial

### Prohibition must be repealed

Perhaps things have not really changed that much after all. Our parents' generation grew up contending with the Volstead Act of 1919, legislation prohibiting the use of alcohol in the ill-fated experiment the United States found to be completely unworkable. There are certain areas of human activity, the nation learned, that could not be controlled by the state or federal governments. People drank alcohol throughout the period of prohibition, organized crime took over the industry, and the act was finally repealed in 1933.

Much the same situation confronts our generation in relation to the use of marijuana. An ever-growing group of individuals, especially those of college age, have found the drug to be a harmless and desirable euphoriant, prohibited by ridiculous laws laced with barbaric and inappropriate penalties.

Organized crime has again moved into a position of control over an area of American activity. The laws have been largely ignored.

Eighteen years ago, according to United Nations statistics, there were 200,000,000 marijuana users throughout the world, a figure undoubtedly higher today. These people have found that the myths connected with the drug — those of its addictive power, its permanent physical and psychological effects, its leading the user to hard narcotics — to be without foundation.

Until 1937, hemp derivatives were legal in this country for prescription as a legitimate therapeutic device. An upsurge in the use of the drug in the 1930's, however, was opposed primarily by pressure groups within the newly revived liquor industry (one group with much to lose as the community of heads grew) and within the federal government.

Propaganda campaigns conducted by the Federal Bureau of Narcotics (an agency established in 1930) told the American public that grass was a "killer drug" triggering crimes of violence and acts of sexual excess and a toxic agent leading to insanity, depraved behavior, physical degeneration, and chronic psychosis.

At the 1937 congressional hearings which led to the passage of the Marijuana Tax Act that year, the marijuana myths were accepted by U. S. legislators as factual. But even at that time, proponents of the prohibition stated that marijuana "addicts" do not graduate to the hard narcotics (heroin, cocaine, opium, morphine, etc.). Eighteen years later, however, in the congressional hearings which led to the 1956 Narcotic Control Act, some of the same people who had testified in the earlier hearings that the drug was addictive but not dangerous to health, now testified that it had completely

In 1938, New York City's Mayor Fiorello LaGuardia requested a committee of impartial scientists from the New York Academy of Medicine to make sociological, medical, and psychological studies of the alleged marijuana problem in the city.

The summary of that report, published in 1944, stated, "Marijuana is not a drug of addiction . . . Smoking marijuana can be stopped abruptly with no resulting mental or physical distress . . . Those who have been smoking . . . for a number of years showed no mental or physical deterioration which may be attributed to the drug . . . Marijuana does not change the basic personality structure of the individual." It does not lead to addictive drugs.

Meanwhile, the Narcotic Control Act made the "crime" of possession of grass punishable for the first offense by two to 10 years in prison. A second offense is punishable by five to 20 years, a third, 10 to 40 — a ridiculous price to pay for what John Lennon accurately described as "a harmless giggle."

"Should the use of marijuana become anywhere nearly as widespread as that of alcohol," Dr. Alfred Landesmith wrote in *The Addict and the Law*, "it might be too late to talk of effective restrictions since the users command too many votes." This, we believe, will eventually happen. But in the meantime, the busts go on and marijuana users are sent to grass, a more effective training ground for criminals than are the streets.

We believe that the restrictions against the use of marijuana must be lifted, that no longer should individuals be prosecuted for the victimless "crime." Prohibition must be repealed.

Toward this end, we call for the establishment of a Marijuana Legal Aid Society with the following three functions:

1. To spearhead the drive for repeal of existing laws against the drug and to coordinate repeal efforts.
2. To educate the public as to the drug situation in general, publicizing both the harmlessness of marijuana and the dangers of the addictive drugs. Years of misinformation and absurd statements on the part of police departments, the press, and members of the medical profession must be overcome.
3. To provide legal assistance and bail money, at reduced rates, to grass smokers who have come into conflict with the law enforcement agencies. Most people are unaware of their rights and options under the law and may be subject to exorbitant bail fees, if arrested.

Hopefully, the need for an organization such as this will soon end; hopefully, the repeal of the anti-marijuana laws can be

"God is dead!" "There is no God!" "The Bible's just not relevant anymore!" "There are just no answers for society in religion anymore." "Religion is just a way the Establishment tries to keep young people from having fun."

In the last ten years, a growing number of people began to feel this way about God and religion. The greatest effect has been upon young people. Rejecting religion, kids have taken off in search of something to take its place - something they can believe in. They've tried just about everything they can think of - from money and big cars to sex and drugs. And very few, if any, have found what they were really looking for. In fact many just give up and commit suicide.

For the most part I have to agree that some of the traditional ceremonies are outdated. However, in God and the Bible - in the messages of His love, our free will and the burden of prayer - there is something to believe in. God's sending of His only Son - Jesus Christ - and His message of Redemption can never, especially in times like we're going through now, be called irrelevant.

I have accepted God's gift, and that is how I know it's for real. It's a personal thing each individual must experience for himself. And with the world the way it is, it's great having a true friend who provides real peace and security.

During the five years I've spent at Northeastern, I've had countless opportunities to do new things and to go to some new places. This was when I found my faith really worked. Instead of feeling low

because I wasn't having any "fun," I was happy because I knew I was doing what God wanted me to do.

I still do things I shouldn't do, but He is willing to forgive me if I'll ask Him to. He's a friend I can talk to about anything - anytime, anywhere. Without His help I'm sure I wouldn't have made it through school.

From what I've said, it must sound like I sit around all the time with my nose in a book. Well, my nose has had more contact with footballs and basketballs than it has with books. I enjoy just about every sport there is. I like to have a good time as much as the next guy. The only difference is the sources of my activities are different from those of most kids. This hasn't prevented me from having fun, though. There are lots of kids that share my beliefs and we have great times together.

The best part about faith in Christ, however, is that I have a reason for living - that is - to do what God wants me to do. I believe it was His will that I came to Northeastern and that I majored in Accounting. Now I'm seeking for His will in the future. Although there is a degree of uncertainty, I know I can rely on Him to guide me in the direction He wants me to go.

When you accept Christ, your life is changed. Of course, you're still human and you have the same emotions as before. But you become interested in the everlasting things of God instead of the short-lived pleasures of this life. And to me, there's nothing like it.

## Council, PAC Oppose ROTC Credit

Councilors Say  
It's Non-Academic

BY NANCY VOGELSON

The Student Council Tuesday voted to withhold all academic credit from Reserve Officer Training Corps courses in one of the most fully attended council meetings in university history.

More than 300 students, many of them members of Students for a Democratic Society, University Committee Against Racism, ROTC and other prominent campus groups, met in the Student Center Ballroom to discuss the subject. "It is resolved that ROTC is larger be considered an academic course at all credit be withdrawn" — with planned council delegates.

The final vote, closer than many had anticipated with 75 for and 18 against the proposal, followed nearly two hours of formal address and informal, heated debate by students and faculty, opponents and proponents of the ROTC course or opposing for abolition of ROTC for military courses.

(Continued on Page 4)

FOR THE MILITARY — Lt. Col. Richard Bentley argued for retaining credit for ROTC at the Student Council meeting Tuesday. Frank Gerry (left) held a microphone so the meeting could be carried live on WNEU. The sketches for the NEWS were done by Jack Gerry.

## Knowles Supports Campus Corps

President Asa S. Knowles strongly backed the Reserve Officers' Training Corps after the Student Council and the President's Advisory Committee voted to strip the corps of academic credit.

However, ROTC's credit, he said, is solely under the faculty's jurisdiction.

The faculty gave ROTC credit in the first place," Dr. Knowles said. "I can't see why there's all the discussion now."

Dr. Knowles, former chairman of the National ROTC Council, added that he favored the Track C ROTC program, where the students didn't wear uniforms, took regular courses in subjects like military history, taught by university professors, and drilled on weekends or at summer camps.

Only two colleges, Business Administration and Education still allow grade credit for ROTC. The other colleges, he said, allowed add-on credit when the hours were applied toward graduation.

The credit given here," Dr. Knowles said, "is nearly token."

ROTC in some form should remain on campus, he said, because a lot of students want it.

"The students who want ROTC should have it," Dr. Knowles said. "Taking it away would deny their freedom."

He added that the \$21,000 the university annually pays to continue ROTC, is more than made up in the \$50 monthly scholarships the advanced cadets receive from the Army.

(Continued on Page 3)

BECAUSE OF THESE

## SCATE Booklet Available

The Student Council Student Course and Teacher Evaluation Committee's (SCATE) booklet is now available to students.

The evaluation, which is the students' opinions on such things as the instructors' approach, stimulation and availability, was administered to students last winter during the Div. B. quarter.

The six areas of evaluation listed in the booklet are: course substance, classroom approach, workload, instructor's availability, instructor's stimulation of the student's curiosity in the subject, and student's recommendation.

Because of an incorrect transcription, the evaluation of Prof. Lawrence J. Blumack's classroom approach on Page 30 should read: 6 per cent never effective, zero

per cent rarely effective, 31 per cent generally effective, and 56 per cent effective, according to Robert Weisman (708A), chairman of the SCATE committee.

He also noted that Miss Carolyn Gartrell's name should not appear on Page 22 for Western Civilization. Miss Gartrell was the discussion leader for only one section of 10 students who she said were actually evaluating the lecturer of that course.

When asked to identify that lecturer Miss Gartrell said, "The evaluation by only 10 students out of the 1,000 who took the course is not significant." She would not mention the lecturer's name.

The SCATE booklet is available at the Student Council office and in the commons area.

## Klan Threatens UCAR Member

BY JAY COLEEN

The Ku Klux Klan is watching Vincent Lembo.

Lembo (72LA) has been under surveillance by the Klan since early this year.

Long active in civil rights work, Lembo is a member of the University Committee Against Racism, which is how the Klan knows him.

The group supports a housing project which would enable black and white students to attend suburban schools. Their campaign attracted a lot of media attention, which is a story as to which Lembo's name was featured.

Last January, shortly after the very war began, Lembo, a Student Council member, received an anonymous phone call from someone who wanted to represent the "Klan Youth Unit."

"He had read about our leaving," Lembo said, "and told me we were going to be shot. I was going to school in any but my own community."

The caller remained calm, however, and Lembo termed the call a "friendly discussion."

He said the conversation ended rather ominously when the caller, who still refused to give his name, said, "You'll be hearing from our organization soon," and then hung up.

"A week later," Lembo said, "I got a letter on printed stationery which read United Klans of America across the top. The letter said that my group was under surveillance and that I would be receiving some literature soon."

The letter was unsigned and there was no return address.

"About two weeks later," he continued, "I got a package in the mail which seemed to have about 10 bucks worth of stamps on it. It has no name or return address on it. Inside was a book, a small record and 10 letters."

Upon further examination, Lembo said he discovered that the book concerned the desirability of violent repression notes. He said it offered means of accomplishing this end, including the use of armored tanks and machine guns. The record offered an explanation of "Why Klan Burns Crosses."

All of the letters originated from either the Ku Klux Klan or the

American Nazi Party and were strongly racist.

Among them was an anti-semitic statement which alleged that Christians paid exorbitant prices for foods marked at higher, with extra money going to an organization called "The Union of Rabbits."

Also included was an attack on the television program "Julia" and the General Foods Corporation which sponsored the show.

The pamphlet stated, "Julia portrays race-mixing at its worst" and "The 'J' group could not get into New Haven in person, so General Foods thru 'Julia' are (sic) sending them via television."

Following was a list of General Foods products which the pamphlet said would be boycotted.

It was determined, according to Lembo, that the package came from P.O. Box 4, Dunstable, Mass.

Further investigation by the Boston Globe established that according to Robert Shelton, head of the United Klans of America, there is a chapter of the Klan operating out of that address.

Shelton is currently serving a prison sentence for refusing to produce Klan records for examination by a Congressional investigating committee. Local police professed no knowledge of the chapter.

All Hail

## Up My Tuition, Up Yours

By GIL PETERS

OK—hand over your wallet, all jewelry, gold fillings, and your complete set of 1957 baseball cards as a down payment—tuition is on the rise again.

Ah, freshman year—way back when—Burlington—\$270 for a 10-week term, \$945 for 35 weeks. Sophomore year—big time—Boston—\$175 for 12 weeks plus \$12.50 in activity sundries and \$18 more in sick pay. Then along comes \$500 plus extras, oops, \$550, by another quarter of a C-note for a disposable cap-gown degree combo and a chance to melt in the Boston Garden Sausa Circus on the hottest day in June listening to Louise Day Hicks talking on Afro-American culture.

Tuition in September of 1964 averaged \$27 a week. Next fall cost per week will rise to a little more than \$58 (\$1400 per term)—that's almost \$4 a cut, Jack. How—I can hear you logically mauling through the mashed coffee grinds lingering in the cracks of your cracked lower lips—(wait a minute. Where was I before I got started on that little image? Oh yeah), how can you keep up with inflationary tuition? How the hell do I know? But, having been around for lo these many years I can offer a few suggestions (you knew I would).

### IMPOSSIBLE DREAM

Approach your co-op employer and explain the money squeeze. After he pretends not to get the point for 10 minutes, come right out and ask for a raise commensurate with both your ability and your weekly tuition boost.

Upon being released as expendable to the corporation, you can apply for financial aid as a hardship case.

There must also be a balance and amount case with

it you can walk the Halls of Huntington the rest of your life free of charge on the G.I. bill.

Doesn't grab ya much, Leland?

I got it. Live at home with Mom and Dad on the estate and let them foot the cost no matter how high it goes.

Oh, the family's poor—may get welfare next month. Your mother and father are virtually penniless—both college professors without tenure. You can't live at home anymore because you get too much grief from the dog and even the goldfish turn tail on you. And besides, you couldn't commute from Chester, N. J., anyhow?

### IF AT FIRST

Still haven't found the solution, huh? Try this.

First day of school next term, take a paper punch and really do a job on your IBM schedule cards—being careful not to punch out obnoxiousities. Next cut your name and student number off the card and in the space provided state clearly your new name which is NAME LAST FIRST. On top of the schedule it says to print last name first, then first name and then middle name. Your monicker will then read FIRST NAME LAST. For class and division, write 1968C, then proceed to fill out the card with last term's schedule and room numbers.

### NOTHING VENTURED

It should take until the ninth week to figure out just what you have done. Of course, you still haven't paid any tuition by this time and have culled 45 days of precious Northeastern knowledge on the house.

• If, in the 10th week, the wheels start humming to

# Poile and Swett Named Captains

In a move that was really no surprise to anyone, Dave Poile and Paul Swett were elected captains of the 1969-70 Husky hockey and basketball teams, respectively.

The announcement was made at the annual basketball and hockey banquet held Tuesday in the Student Center Banquet hall.

Poile, winner of the Paul Hines Award for Most Improved Player as chosen by the New England Hockey Writer's Assn., figured in all of 11 victories this season.

The son of Norman "Bud" Poile, general manager of the Philadelphia Flyers, Poile scored the winning goal in six out of seven Husky wins and assisted on the other winning score for a season total of 10 points.

A tennis star in high school, Poile never played organized school hockey until he came to Northeastern, but that didn't stop him from beating out the more experienced competition for a starting place on the varsity.

This past season he was also named to the second line of the All New England team.

## 3.5 Billion and Still Rising

There have been times when World War II which means half the people on the world are 11 years old or younger. In there is a problem. The problem can be solved if we get off our backs and try to do something.

**NORTHEASTERN** — I think they're probably pretty good. The problem today is that we have never reached the point of a real environmental effort in which to live. We're so technologically-oriented that we haven't stopped to think about people. I've convinced that any people that can create a technology that enables us to send a man around the moon can learn to deal with this problem and can deal with it effectively.

**NORTHEASTERN** — Bill Baird, you're one of the few people in the country talking openly about the birth control problem and encouraging the free distribution of these devices to people both married and unmarried and to people of all ages without any stipulations whatsoever. Now we are attempting in this program to put your birth control movement in the context of the population explosion, a general effect on the world. You've been concerned about these problems for some time haven't you?

**BAIRD** — I came here a couple of years ago to challenge the Massachusetts law, not only to remove the law for the people of Massachusetts but to permit all people the right to birth control. People all across the nation. See, our nation cannot assume the leadership in this birth control problem across the world unless we can show it in our own backyard. Too often we've a very strong tendency to think about overpopulation in India or South America or Pakistan or Egypt, but I'm sure the professors and I are aware of the fact that in the ghetto areas, such as Harlem and Bedford-Stuyvesant, the birth rate among the poor is as high as it is in India, and the ignorance is every bit as acute. So what we must do is to remove the laws that we have on birth control. We must permit single people, the least birth control help. Those who are the moralists, who say that single people should not have birth control, let them moralize all they want. But the real world is that single people do engage in intercourse and single people are having babies, adding to the population crisis.

**NORTHEASTERN** — At the beginning of the program Professor Hacker mentioned that 5,000 births take place around the world every hour. What does a statistic like this mean?

**BAIRD** — Well, just go back to the World Series. Remember the tremendous throngs... the crowd of people above is almost? That is what the professor has predicted will happen. Unless we can cut down this birth rate, we will be standing alone to allow. Other forces also will come into play, such as famine and disease.

**OVERCASH** — This problem of famine, disease, etc. If we think that in this country alone today we have about 100,000 new people eating at the table, hoping to maintain the same kind of dietary standards in which the average person in this country perhaps is accustomed, we need a lot of food. We need a lot of food.

If we're going to meet this increasing population problem.

**HACKER** — Well, the problem of the population explosion divides into two issues: there are the physical problems and there are the psychological problems, which most people don't think about. It seems that as the number of people increases, the number of any product, the value of the individual decreases. You read in the newspaper that 100,000 lost their lives in an earthquake or something. It's just a drop in the bucket. What is human life when there's so much of it? The value of it goes down. There are 55 people today per mile, but they're not distributed evenly. Over 90 per cent of the population in this country live in a very small percentage of the land.

**NORTHEASTERN** — Three per cent of the land is that not correct?

**HACKER** — Just about. In the Netherlands there's approximately 935 people per square mile, but they're more or less spread out. Manhattan Island today has 65,000 people per square mile and that is not a healthy situation psychologically, nor is it healthy physically.

**NORTHEASTERN** — Isn't the situation on Manhattan Island one of the worst, where the density of the population is so high, something is a through-manifestation of the situation?

**BAIRD** — For a town home state of 500,000 people, the area has 220,000 living space. It's a little more space than it needs. What has to be done here is to see birth control to be done just as much as it is possible.

**NORTHEASTERN** — You mean, made a few more space and even for man to be in certain areas of the land.

**OVERCASH** — With the problem between now and I duplicate of our area, if we're going to have a life for the people, we'll have to live in it as the people for this. There's a lot of people that is being to be carried off. (Continued on p. 2)

**WESTERN** — I believe that the birth control problem is the most serious one. The United States estimates that right now we're 2.5 billion people in here with 4 billion in 2000. In 2000, there will be 5 billion. There's a lot of people now that the population is going to be 5 billion people every year, which is almost equal to Great Britain, all the people new living.

**Who Is Responsible?**

**Why Does It Happen?**

## Sgt. Pig Leads Troops To Different Drummer

BY KATHY KEPNER

It could have been the Battle of Bull Run all over again as 300 spectators swarmed to find good seats to watch the anti-ROTC demonstrators outmaneuver the ROTC drill team in the Fens Wednesday.

The confrontation came at 1 p.m. when about 300 ROTC cadets carrying rifles led by a police escort, marched into the Fens and met a small band of 13 gray clad troopers carrying a red flag with "American Death Co." printed on it.

### FULL FORCE

The police were there in full force, protected by their police dogs. However they were never called upon to perform and ROTC, seemingly unflustered by the additional drill company, ignored them and proceeded with their practice.

Following suit, the gray band

led by Sgt. Pig, wearing a pig's head showed the audience how well they learned their lessons in coordination. Perfectly in step they marched through the ROTC lines to the front of the bleachers.

Sgt. Pig called for a roll call. Militarism, Racism, Imperialism, Capitalism, and all the other issms were present and accounted for.

### PEP TALK

Giving his men a pep talk, Sgt. Pig told troopers that "this organization must be tight, tight like the Army. I want you to jump at my orders, like in the Army. You've been in the classroom too long."

In the background could be seen a mass of green uniforms obediently following their commanders marching around the field.

Sgt. Pig explained to his company that there are three faces: the right face, the left face, and the about face. Then they proceeded to practice these.

## Is This You

I am opposed to the Vietnam War (and any such war that is not based upon defense of our country). Please send me application to the Ministry of your church, as well as information as to its beliefs and membership throughout the world.

It is my understanding that if I am accepted to the ministry of your church, I can not conscientiously participate in any military involvement not directly concerned with the defense of our country or its possessions. I further understand that training will not interfere with my normal work or academic schedule, — and I can choose my own location of service to God and humanity.

# Students Fight During March Protesting ROTC on Campus

BY NANCY VOGELSON

The first taste of violence in an emotional week of anti-ROTC activity came to the Northeastern campus Wednesday as undergraduate bystanders clashed with SDS picketers in the quadrangle.

Trouble began shortly before 10 a.m., some 90 minutes after SDS members and supporters began what was to have been a day-long informational picket line through the quadrangle.

According to Douglas Stone (71LA), a spokesman for SDS, "Our picket line was designed to last all day and was not meant to obstruct people from entering or leaving Richards Hall. We were marching peacefully around the quad when three

"Then they jumped Dave Smith," Stone said. "They hit him and knocked off his glasses. Others followed. They tore up signs and attacked just about everyone in the line. It's kind of sad," Stone noted "that some NU students don't think. They resort to their fists instead of their brain. They can't discuss things rationally, and they have to resort to this."

## DIFFERENT STORIES

Meanwhile groups of spectators gave varied accounts of the incident which left one student with a sizeable gash on his forehead.

But other non-SDS members said his injury occurred when a group of student

## Former Guerilla-Scholar Released, Instructor Sympathetic to Reeves

BY PETER LANCE

A former advanced Reserved Officer Training Corps member who was a member of the Counter Guerrilla Group and at one time the highest in his class was given permission to withdraw from the corps this week for personal reasons.

Reeves (70LA), an active member of the University Committee A, an outspoken opponent of the presence of ROTC on campus, was granted his discharge by Col. Richard C. Mc

## Here Comes the Fuzz

It seems that one of the quickest ways to solidify a student body against the administration is to call in the police.

Students opposing a building's takeover, suddenly join the fight once they spot the flashing beacons, blue uniforms and the shiny badges.

Heads get bashed. Admittedly, this is all part of the politics of confrontation, but the administration plays into the protestors' hands.

Harvard's Nathan Pusey is the cur who beats children. While on the other hand, Brandeis' Morris Abram is the picture of

self-restraint. He found the police unnecessary.

Abram still maintains his students' respect. Pusey even has his faculty against him.

But both schools had a student disruption, and in each case the police determined the students' sympathies.

It shouldn't happen here, but if it does, the police are not needed. The problems can be worked out without Northeastern students bleeding and crying on the steps of Richards Hall.

The cops don't give a damn.

## Fortas Ignores Charges

BY PETER LANCE, NANCY VOGELSON and MARC STERN

Supreme Court Justice Abe Fortas did not reply Thursday night to charges made by Life Magazine that he accepted a check for \$20,000 from the Wolfson Foundation.

Fortas appeared as the final speaker in the Distinguished Speakers Series.

After Justice Fortas concluded his speech on violence and civil disobedience, former series chairman Tom Conrad (69LA) said, "There will be questions, but only on what Justice Fortas covered in his speech."

In his speech, Justice Fortas called for the young people of the nation to join the establishment in a common mission to carry out and perfect educational reforms "and the great social revolutions" that have been started by the older generation in this country.

He concluded that the establishment must provide the means for this student participation.

Louis Wolfson, foundation chairman and U.S. Senator, was convicted in 1966 for violating securities laws.

Fortas reportedly returned the money to the foundation 11 months later, after Wolfson and Gerbert had been indicted.

Monday committee chairman Tom Conrad was informed by the agency that Justice Fortas would not charge the university the entire booking fee.

The agency asked only \$675 for their fee and the Justice's traveling expenses. Fortas would not accept his personal speaking fee of \$1,325, the balance of the original contract fee.

"The Walker Agency told me they just heard of the change in fees on Monday," Conrad said, "but Justice Fortas' secretary claims that she requested his personal fee be dropped months ago."

## Dissent Is Healthy

**BY MIKE DORFSMAN**  
Sen. George McGovern, (D-SD), while defending student dissent, said he could not go along with students who seize buildings and manhandle university personnel.

McGovern answered students' questions during an interview in the Interfaith Lounge, the site of the SDS sit-in earlier this week.

"I suppose every student must decide for himself if he wants to join the mil-

**BY NANCY VOGELSON**

Between 40 and 50 Students for a Democratic Society and sympathizers seized the Interfaith Lounge of the Ell Building Tuesday to protest Dr. Asa S. Knowles' rejection of their demands that ROTC be abolished from campus and that financial remuneration be given corps upperclassmen.

The five-hour sit-in followed a heavily-attended SDS meeting Monday night during which students grilled Kenneth Ryder, vice president of administration, on the administration's views on the ROTC issue.

Ryder appeared at the meeting in response to the SDS demand two weeks ago that the president or a member of his staff appear in the ballroom to answer students' questions.

Shortly after 9 a.m. Tuesday members met in the quadrangle and began to search for a possible seige target. They marched single file into the Ell Building, climbed to the second floor and entered Edwards Lounge in which Prof. Beneditto Fabrizio was teaching a French class.

The students reportedly ordered Fabrizio and his students out of the room following an announcement that they were "taking over." However, Tom LaPointe (69LA), an SDS protester, later apologized to the professor stating, "That's all

Following several minutes of jeering by anti-SDS students, police ordered all reporters and photographers out from the area. Additional students were permitted on the floor after 10 a.m. and those who left were not allowed to return. But members of the press were readmitted minutes later.

Meanwhile all offices on the second floor were locked as a precautionary measure and a "pressroom" was set up across the lounge. This same room later was utilized by Faculty Senate members continuing their regular meeting in the Ell Building so they could be close to the protesters.

Tuesday morning we stood with the moderate, anti-RAPC minority of the student body. By Tuesday afternoon our feelings were sympathetic towards the SDS. Because we were with SDS in the Interfaith Lounge we find it impossible to be completely objective in our reporting of the takeover.

We are not always in complete agreement with SDS as far as their actions are concerned. It was however impossible to leave the Interfaith Lounge without a general sense of sympathy toward them. The following article is their out-

# Fac-Sen Offers Compromise

By Lenny Gamache

The Faculty Senate in a closed session Tuesday night offered a compromise resolution on the Afro-American Institute which would set up a special committee composed equally of faculty and black steering committee appointments.

The compromise was rejected late Thursday afternoon because the students told Pres. Asa S. Knowles they would rather have the program as they set it up without a degree than be altered and retain the degree.

"Their hope is that once it is established," Dr. Knowles said, "the faculty will accept the program on a degree basis."

Dr. Knowles said he suggested the students place the program in the Department of Continuing Education, which he said are considering.

The Faculty Senate approved, in principle, the establishment of an Afro-American Institute because they felt there is an imperative need for action to create academic programs that relate to the traditions, culture, and problems of black America.

Dr. Knowles estimates the cost of the Institute at a maximum of \$75,000.

The Senate approved the establishment of the steering committee as proposed in the original institute proposal, but stipulated that a special committee be established jointly by the Faculty Senate and the steering committee. Each group would choose one half of the special committee membership.

The functions of this special committee would be:

- To recommend to the dean of faculty candidates for the position of director who will serve as consultant to the committee.

- To work with the director in formulating a black students curriculum.

- To formulate guidelines on methods of staffing and on academic standards.

- To determine the best method for implementing this curriculum.

- To report its findings to both the appropriate faculty body and the steering committee. The curriculum and recommendations for staffing will be forwarded to the president and Board of Trustees only upon concurrence of both the ap-

—Bills Chazy

**PLANKED BY BLACK STUDENTS** — Professor James Feldman of the Faculty addresses the chair at Tuesday faculty senate meeting. The faculty proposed a compromise amendment to the black student proposal at a later meeting Tuesday night.

## Blacks Propose Institute

Black students submitted a proposal Tuesday for the establishment of a degree-granting Afro-American Institute which would combine all aspects of blackness on campus while working in the black community off campus.

The proposal, submitted at the Faculty Senate meeting, calls for the combination of all elements relating to the black community, including academic, administrative, community relations, student services, counselling and tutoring.

The institute would consist of the following five interrelated departments: a Black Studies program, a research and information center, an Afro-American library, and a clearing house for special programs.

In the Black Studies program, classes might be taught by degree-less members of the black community or by students themselves. The program would also include working off campus in the black community for which students would be given class hour credit toward graduation requirements.

Purpose of a research and information center include increased communication, interpersonal contact, knowledge and socio-political awareness. Besides engaging in research aimed at raising the levels of people's understanding of blackness, the center would publish black textbooks, syllabi and periodicals.

GARY CAROTENUTI

## Student's murder investigated; NU mourns loss of Carotenuti

By BARRY GILBERT

Boston Police this week continued an intensive investigation into the murder of Gary M. Carotenuti, 19, a Northeastern student whose body was found Saturday wrapped in a green canvas pup tent in front of the Elma Lewis School of Fine Arts in Roxbury.

At NEWS deadline Wednesday night, homicide squad detectives reported no new information in the slaying.

Carotenuti, son of Mr. and Mrs. Louis Carotenuti of Torrington, Conn., had recently moved to 11 Delle Ave., Roxbury. A philosophy major in the class of 1972FT, he was consistently on the dean's list and was taking part in the university's honors program.

Friends, fellow students, and faculty mem-

bers of the university community expressed disbelief at the apparently senseless killing and were unanimous in describing Carotenuti as brilliant.

"A girl who is killed is always beautiful. A boy is always brilliant," mused Dr. Joseph H. Wellbank, assistant professor of philosophy. "But in Gary's case it was really true. He had a brilliant, quick mind — a very fair mind. This is a deep loss to myself, the department and all who knew him."

Carotenuti's body was found lying in front of the school at 122 Elm Hill Ave. shortly after 9 a.m. Police said the racial slur, "nigger lover," was carved on his back with a knife or other sharp instrument. Associate Medical Examiner

## IS meeting struggles with split

By MARY GELINAS

Two major factions of the Students for a Democratic Society met head on yesterday at Northeastern chapter's first meeting of the year.

Wing: two hours of heated debate; approximately 150 non-NU students; this meeting is only for non-PL

**FRESHMAN WOES** beset Northeastern University student Robert Pribusauskas as he tries to fill his locker during "Freshman Orientation Week." The largest freshman class in Northeastern history, more than 4,000, are here this week to familiarize themselves with their school and with Boston before classes start tomorrow. An engineering major, Robert is the son of Mr. and Mrs. William Pribusauskas of 369 North Cory St., Brockton.

## 'Hippie' Found Slain in Street

The body of a young man described by police as "hippie type" with an anti-Negro slur carved into his back, was found yesterday morning wrapped in a roll of green tent canvas on a Roxbury sidewalk.

The unidentified white man was shot once in the back of the neck.

HE IS BOSTON'S 71st mur-

## Slain Youth's Pals Quizzed for Clues

Police probing the gun-slaying of a brilliant 19-year-old Northeastern University student continued today to interview friends and fellow students of the victim.

The body of Gary M. Carotenuti of 11 Delle av., Roxbury, a bullet wound in the back of the head, was found Saturday morning wrapped in a green canvas pup tent in front of the Elma Lewis School in Roxbury.

Carotenuti came from Torrington, Ct., and was the only child of Mr. and Mrs. Louis Carotenuti. He was described by students and professors as a highly intelligent, dedicated, socially concerned, with a

sincere interest in people and a love for peace.

Lt. Dets. Edward F. Sherry and James MacDonald spent most of last night questioning members of a hippie colony in the Beacon st.-Kenmore sq. area, and the Fort Hill section of Roxbury.

Particularly puzzling to detectives was the fact that the words "nigger lover" had been carved on Carotenuti's back.

The young victim, long-haired and bearded, was about to enter his junior year at Northeastern University and had been on the dean's list for two years.

MURDER

# Former NEWS staffer McGarry killed after first week in Vietnam

After a week in Vietnam, Marine 2nd Lt. James B. McGarry, a 1968 graduate of Northeastern, died September 17.

The 24-year-old Arlington resident had left a job with The Boston Globe to enlist in the Marine Corps. While on patrol with the Third Marine Division near Quao So, about four miles from the DMZ, he was killed by a hand grenade.

A dean's list student during his entire Northeastern career, the English major wrote for The NEWS during his sophomore through senior years. In addition, he was involved in The Cauldron during his senior year and the Student Union for three years.

During his senior year at NU, the 1963 graduate of Coyle High School was a Globe reporter on the night staff. He had previ-

JAMES B. MCGARRY

ously worked for the State House News Service, The Taunton Gazette, and the New Bedford Standard Times.

Joining Officers Candidate School after graduation, McGarry was trained in Quantico, Va.

He was the husband of the former Kathleen Cavanagh, 21 Harvard St., Arlington. They had been married five months. He was the son of Mr. and Mrs. Edward M. McGarry, 1832 Rte. 44, Raynham.

He also leaves three brothers: Frank, of Thompson, Conn.; Brother Peter McGarry, a missionary in Africa, and John, of Raynham; four sisters: Mrs. Shelia Kelley, Foxboro, and Kathleen, Patricia, and Christine McGarry, all of Taunton.

Military funeral services will be held at a later date.

## Pass-fail makes it; conditionals failed

By MARTIN BEISER

After more than a year and a half of arguing and hassling, a limited pass-fail system will be initiated in the fall term on an experimental basis. From that time on, a student will have the opportunity to take one non-required course per term in a subject area other than his major, without receiving the traditional letter grade.

One limit on this system, how-risking serious impairments to ever, is that each instructor will their QPAs, there will be a decide individually whether he greater interest in taking courses will use a pass-fail grading procedure for those students in his which are important, but quite often, much more difficult than the average elective course offering.

If he wishes to grade in the traditional manner, he may do so.

In exchange for accepting the Student Council's pass-fail proposal, the Faculty Senate required that, simultaneously, conditional exams no longer be available for students who fail

In classes where there is a mixture of students who qualify for pass-fail status and those who do not, the instructor will not be aware of an individual's status until the end of the term.

This is to avoid possible discrimination on the part of the

## SC votes moratorium support

By MARY V. GELINAS

Northeastern University joined the growing national student movement in support of the Vietnam Moratorium Tuesday when Student Council voted to request "the administration to cancel all normal activities ... October 15 ... to express its support of the goals of the moratorium."

The Faculty Senate was scheduled to vote on a similar resolution Thursday.

Local and national organizers of the moratorium are calling for a country-wide cessation of all "normal activity" on campuses and in communities on October 15 to demonstrate the demand for "immediate and total U. S. withdrawal from Vietnam."

By a vote of 25 to 9, the council, before an audience of approximately 180, resolved that, "the Student Council at Northeastern, recognizing the value of educational experiences, and in order to express its support for the goals of the moratorium, requests the administration to cancel all normal activities pertaining to students, faculty, administrators and staff from 10 a.m. to 5 p.m. on October 15th."

The resolution considered at the senate meeting, which was originally presented September 25 by Prof. Arvin Grabel, states that, "the Faculty Senate, recognizing the value of unique educational experiences, requests the administration to cancel day classes from 10 a.m. to 5 p.m. on October 15 so that the Student Council may present its planned program."

Prof. Robert L. Cord proposed

at the earlier senate meeting that, "and in order to express its support for the goals of the moratorium," be added to the resolution.

When asked for comment Wednesday on the moratorium and the Student Council's resolution, Pres. Asa S. Knowles replied, through his secretary, that he had "no comment."

Presenting the majority report at the council meeting, Stephen Potoff '72BA, chairman of the special studies committee, said he hoped the day would be "an organized educational experience with the backing of the administration."

Nixon wouldn't dare touch us, right, Lewis? . . . Lewis, where are you?"

# Drug experience—merely mind over matter?

You stumble through hesitant askings . . . and you are worried . . . with honest and concerned words these upper-class creatures donate their ideas, their experiences and the doubts and attitudes that spill across this page are pieces of themselves, made public for your understanding.

NEWS: And these are bunks of the night in your apartment when S., who is a dorm chick, sat rapping:

NEWS: How old were you when you started?

S: Um . . . right before I came to school . . . grass . . . we were with a whole bunch of kids. And everyone had smoked before. And I hadn't and I was sitting there sort of looking at everybody else. Like and you're too scared to say, you know, "I've never smoked before."

NEWS: Do you think there's peer group pressure?

S: It's fear. It's not pressure. It's like I am glad to be rejected; not so much that the group is making me feel that they are going to reject me . . . you're not being pressured from everybody else. You're being pressured from yourself.

NEWS: What's the strongest thing you've ever done?

S: MDA.

NEWS: Uh, why do you think people do drugs?

S: For a long time I thought, well, people did it because there was something lacking in their personality . . . and because it allowed people to violate social laws. It's the excuse for the action . . . But I don't think so now. It's a materialism . . . It's nice to say "Well, I've got some hash back in my room. Let's smoke it." The drug is the

NEWS: Do you think there's anything to exploring with drugs?

S: There's something to it but I don't think that's what's happening . . . well, there's the idea—is it for enjoyment or is it for escape? And you don't really know what happens. Is it your eyes or your mind that's doing it? Now if what I saw when I was on that MDA . . . I mean, these things were damn nice. The clouds never looked like that before. It was too good. Now I wonder, do things really look like that and this is giving me fantastic perception to see what is there, to see what God has put there, to see it like it really is? Or am I fantasizing what I want to see? Do I want to make it beautiful? . . . Is it what's in the drug that makes it beautiful? . . . If we're really escaping, then our mind is doing it. Maybe I don't want to face reality, so I'm making everything beautiful. Or maybe everything is beautiful and its there for us to discover.

NEWS: Do you think the majority of people do it to get stoned then?

S: Yes. Because it feels good. But you have to have the ability to be able to feel that way without the stimulant. I have to be able to say to myself that I can get up there just as much without it.

NEWS: Do you think the people who are doing drugs are intellectually superior to the people who aren't?

S: Not intellectually. I'd have to say perceptually . . . My world is sitting with my group of friends and taking up and passing the pipe around. And we're all laughing and it's all very nice. But what happens is you walk into George's apartment and all the furniture is in crazy patterns. It was like some night mar. It terrified me. And all of a sudden you realize that it isn't so far away. It's right next door. And these kids at school have to be made aware that what they're doing in drugs is very nice but that there is an ugly part of it because that was ugly. It was hideous.

NEWS: Do you think that George's name was as far removed from this drug student as most college students

S: No. I saw kids there I went to school with. And that shows right there that it isn't very far away . . . If I saw a film shown at NU about the dangers of drugs, and if it was filmed right in George's apartment, I'd laugh at that kid. You know, this doesn't go on. But it does.

NEWS: Do you think that the normal college student . . . that it's easy for them to get into that scene?

S: No. I just can't see . . . the exposure to the university, to the idea of what you can have if you put your mind to it.

NEWS: O.K., people draw lines then? Do you think that someone who starts on grass will stop before they get to a needle?

S: Yes. It horrifies most people . . .

NEWS: You don't think grass is harmful then?

S: No. Definitely not. For the average college kid it doesn't lead to bigger

things . . . Most girls that are at school . . . the things that they say they hate.

NEWS: Do you think their playing with drugs is playing with your sanity?

S: Definitely. Yes. That day when I did the MDA, like I was going to walk on the water. I was going to do these crazy things.

NEWS: What's in our generation that's causing it to be a drug culture?

S: Disappointment . . . O.K. what's causing me to do it? I see that my father worked his ass off for one company for twenty-five years. What has he got? This is going to go on incessantly. It's circular. I think we are each trying to reach this great climax. And climax. And climax. And no one thinks of a decline. Like our generation cannot tolerate old people. That's something that they just won't face. They think with medicine and they're just won't be a decline.

NEWS: Do you want to talk a little about tripping?

S: Like what happened to me with the MDA . . . I sat and I just couldn't get my mind off what I saw. I just couldn't forget it. And I'm always tempted to take it again. Because it was so nice . . . you want to figure it out. Was it my eyes? Was it my mind? Was it real? Was it make-believe? . . . I think what people are searching for is a common denominator. But while you're going through the experience, you're alone. Nobody can help you if you freak out, they're going to stand there and they're going to be so interested in what's happening to them, and they won't be able to do anything for you. So drugs are a very selfish thing. But afterwards, we can all get together and talk about it. Like we sat down and said "Wasn't it good? Wasn't it nice?" And there was a common denominator . . . But people don't know how to handle drugs. Like that time I freaked out at Amherst and they didn't know how to handle me. They picked me up and threw me in the snow.

NEWS: Do you think there's an ignorance in drugs then?

S: Definitely. There has to be an ignorance about drugs, but without the

. . . You know what really scares me is that they say tripping is harmful to your genes. Some day when I'm forty years old and I look at my kid who's got a head as big as a watermelon, or has three arms—I can look at that kid honestly and say I've been fair. That's selfish. But we don't know what the effects will be.

and the plumpness that was Pepper's baby sprawled on the dirty sheets . . . a few days behind, the plumpness and its parents and several assorted bikies and some grass were conquered by police . . . and now the plumpness rolled its head into the bag of glue damp . . . but you knew that Pepper had died acid so that the plumpness could be born whole.

and tucked into a corner of an ell center room R., who is older and a radical, created these pieces of thought as he rapped:

R: The first exposure to drugs I had was like when I was seventeen or

different from what it is now. Some friends turned me on to grass which was the first exposure of the illegal drugs. But just growing up in America, you know the drug culture from Contact and aspirin through alcohol was still there . . . At that time I got into it— not too heavily because I was still drinking alcohol. And it was only later, when grass became more easily available, that we all concentrated onto that . . . I started tripping with acid, you know the progression from . . . I don't know if it's a progression or not, but grass and then acid. And I found out about other things later on . . . Motivation, I think, was curiosity rather than peer group pressure.

NEWS: Well that's probably true that when you were starting into the scene the peer group was against it rather than for it.

R: Yes . . . And from there I tried a lot of different drugs—THC, speed, and some smack, (heroin).

NEWS: Did you shoot or snort smack?

R: Snort. I've never shot. That's one thing, you know, a vow that I've made to myself—that I'll never touch a needle to my vein. Most of my drug exposure has been with white middle class kids, except when I used to hang around with a biker gang . . . The intellectualism connected with using drugs, to find a pill to whatever, is for college kids. But the bikies . . . it was out for kicks . . . Drugs is fun, kicks, and I think that that shouldn't be put down, underrated as a reason for doing them.

NEWS: Do you think the kids are only an extension illegally of their parents' legal need for drugs?

R: Yes . . . Especially in the late fifties and early sixties when everyone was talking about Milton and the tranquilizer culture . . . that high-pressure businessmen needed some kind of release. So they would turn to what people usually think is a drug like that, although alcohol is a drug too. And that's another release that they used. I'm a couple of friends of mine were tripping, and watching television. They counted

in a row. Like for ups and for downs and for anything that you want. The dichotomy between what's legal and what isn't doesn't make much sense to the average drug user because they know that nothing's wrong with grass.

NEWS: Do you believe that?

R: I really believe that. I can't see any reason that grass isn't legalized. I think indicative of the whole problem—and the drug problem is a problem because it's illegal, not because it's a drug—is that in New York a few years back there was a move to legalize marijuana. And the biggest lobby against it was Schenley Corp., because look at what they had to lose.

NEWS: Do you think that acid is basically exploration, that it can lead somewhere?

R: Well I don't consider myself an intellectual or very spiritual. I think that the straight reality when you're looking at the world is, for day to day living, the reality. I think that the worth of drugs is that it changes the firmness, so that you're picking things up differently. You're getting a different perspective . . . I don't believe in these great revelations that happen when you're tripping. I think the worth of it is proved when you come down and are able to evaluate what you experienced while you were tripping. And apply that and use it to lift yourself out of the ordinary . . . Drugs can be, I think, a radicalizing experience. Because every time you go on a trip or smoke you know that The Man is down on you. And there's nothing like a bust or a club across the head to be a radicalizing experience. But to make the jump to the revolutionary . . . a lot of revolutionaries think drugs are counter-revolutionary . . . You can't go out and revolutionize when you're

NEWS: Do you think that you can go from grass to shooting stuff?

R: The idea that grass leads to heroin on a one-to-one relationship is completely false. The thing is that, being in contact with people who are smoking grass, you might come in contact with people who are tripping with acid. So through personal contact you could try it. But nobody is going to lead you to heroin . . . I think that it's primarily an escape because you go into a nod and nothing bothers you.

NEWS: Why do you think most people are doing drugs?

R: I think one very small part that's been over emphasized in the mass media is rebellion. It's just a nice social thing to do. It's fun. Just the physical act of passing a joint around a circle is more than alcohol, a constant type of activity . . . But smack is something different . . . a lone wolf, a person set apart type of thing.

NEWS: Do you think for most people it's a need to belong? Or to escape? Or to explore?

R: I think it's really all three . . . when the pressures are really getting down on you, it's good to say "I'll sit back, get out of the stream for awhile." And exploration is a part of it . . . you know, every person has to find out his own head. And like you can't drop a thousand miles without knowing how far your head is stretchable . . . The friendliest thing you can do is say "Here, have a toke."

NEWS: Are you optimistic about drugs, about where they're leading people?

R: I have to be basically optimistic because I think it's basically a good thing. For the breaking down of barriers and because of the different perspectives. But since a lot more people are getting into smack and into speed, I don't think the good at all. You can't tell if people will stop smoking

# Nixon Bars Precipitate Pullout From Vietnam, Asks Support

## 'Let Us Be United'

*'Let us be united for peace. Let us also be united against defeat. Because let us understand: North Vietnam cannot defeat or humiliate the United States. Only Americans can do that.'*

President Nixon's address to the nation, Nov. 3, 1969

WASHINGTON (AP) — President Nixon told the nation last night he has a secret timetable for withdrawing all U.S. ground combat forces from South Vietnam, but declared Hanoi could sabotage it by stepping up military pressure.

At the same time, in a nationwide television address, Nixon declared a historic secret exchange of correspondence last summer with the late President Ho Chi Minh of North Vietnam which he said bolsters his conviction that Hanoi is blocking the road to peace.

The Nixon address broke no new ground in the realm of peace initiatives. It added up to a carefully-prepared appeal for homefront support of the administration's Vietnam policies.

"I have chosen a plan for peace," he said. "I believe it will succeed . . ."

"Let us be united for peace. Let us also be united against defeat. Because let us understand: North Vietnam cannot defeat or humiliate the United States. Only Americans can do that."

Declaring that he would not reveal any details,

Nixon talked about his withdrawal program in these words:

"We have adopted a plan which we have worked out in cooperation with the South Vietnamese for the complete withdrawal of all U.S. ground combat forces and their replacement by South Vietnamese forces on an orderly scheduled timetable."

The chief executive said that if enemy infiltration and the current battlefield situation continues, withdrawals probably could be speeded. But he said should Hanoi step up military pressure and jeopardize U.S. forces in Vietnam, "I shall not hesitate to take every and effective measure to deal with the situation."

As he spoke, flashes from South Vietnam told of decreasing pressure by a force of about 5,000 North Vietnamese troops in the central highlands.

Administration sources declined to specify what counter steps Nixon might employ.

They also said they could not immediately give a total figure for the number of combat troops to be withdrawn if the Hanoi timetable is carried

## Student Mobilization Group, SDS Plan Protest Vs. GE Recruitment

By JOANNE McMAHON

In light of their objections to the policies of General Electric, especially during the present strike, certain radical groups within the university are attempting to halt recruitment by that company here next week.

Starting Tuesday the Centages SDS will undertake a series of actions on this and related issues. The Student Mobilization Committee also has plans to stop the recruiting.

General Electric's recruiting station will be set up in the Graduate Placement Centre Tuesday and Wednesday. SDS and sympathetic friends said they will join in some form of protest against recruitment.

Tuesday's campaign, according to Bert Weiss (TILA), an SDS member, will be centered around "G.E.'s role in world imperialism and worker struggles against capital."

### ENOS OPPRESSION

On Wednesday emphasis will be placed on "G.E.'s oppression and exploitation of women," according to Dick Thorson, a former NU student and an active SDS member. "G.E. is intrinsically discriminating against women. Skilled women at the Ashland plant, for example, get paid less than unskilled men."

On Thursday SDS will protest against the College of Criminal Justice for its "role in supplying law enforcement agencies with

police and their functionaries."

Thursday evening Dr. Samuel I. Hayakawa will participate in the British-Quashed Speakers Series. There are plans for actions against his coming in the form of "a youth culture freak-out."

"We plan to have noisemakers and songbooks," said Thorson. "Since Hayakawa has already spoken, we want to speak to him."

Members of the Student Mobilization Committee, which is primarily an anti-war organization, said it does not ally itself with SDS on all issues.

Alan Cooney (TILA), a member of the Committee, noted that "G.E. is related to the war issue."

Along with SMC, he contends

that "there are very real connections between G.E. and the war in Vietnam which makes it important for those who are against the war to support the boycott of G.E. goods."

### NO RECRUITMENT

The SMC drew up the list of demands concerning G.E. recruitment which was defeated by the Student Council on Tuesday.

SDS and SMC agreed that "this strike is a manifestation of the Nixon administration trying to pass off the cost of the war on the workers."

By refusing to allow G.E. recruiters to come on campus they say they are refusing to aid the war effort.

## Advisory Head Named

The Student Advisory Committee to the dean of Business Administration elected new officers on Jan. 6. Vincent DeBiaze (TIBA) was elected chairman of the committee and Jim Curran (TIBA) secretary.

DeBiaze told the committee that it should establish a list of priorities which would enable it

to work on one problem at a time, and thus to perform more efficiently.

After discussion, it was de-

Defeats Proposal 12-3-1

## Student Council Votes for GE Recruitment

By SANORA MOTT

At Tuesday's Student Council meeting, a proposal to prohibit G.E. representatives from recruiting at Northeastern was defeated in a 12 to eight vote, with one abstention.

The proposal, which was submitted by the Student Mobilization Committee, was sponsored by Vincent Lembo (72LA), Jim McDonnell (70ED), and Mike Putnam (72ED). The proposal stated that Northeastern would be acting hypocritically concerning its status as a "free learning university" if it allowed G.E. to recruit on campus. It was felt by the supporters that NU should be concerned with the "best interests of the Northeastern community and the larger society" in order to sustain its position as a political institution.

### CLASS OBJECTS

An objection to the whole proposal was made, based on a petition circulated by the class of '70, which held that the open recruitment policy was supported by those students who signed it.

Since a two-thirds majority was not met (a nine to nine vote, with one abstention was cast), the discussion continued.

The submitted proposal consisted of four resolutions which supporters urged Northeastern to accept:

- 1) "that no private recruiting be allowed on campus on behalf of G.E. and we request that G.E. representatives and union representatives submit to an open forum with the university community."
- 2) "that the University join in the boycott of G.E. goods."
- 3) "that President Knowles answer these demands at an open meeting Thursday, January 15th at 12:30 p.m."
- 4) "that this motion remain in effect until the settlement of the strike."

An attempt to divide the first proposal into two parts was defeated.

The basic question of one student's rights infringing on that of another's was debated with limited emotional outbursts from the floor.

### UNION SPEAKER

One individual who did appeal to the Council was Donald Torney, an international representative of the Electrical Union. He stated that the strike was (1) an attempt to change the legal lock-out policy of G.E. if separate contracts were signed, (2) to protect economic hardships, and (3) to restore the workers' dignity.

Torney then appealed to the floor's emotions through reference to those who are hired to make surplus and their disregard

of what it will be used for. His attempt to correlate the strikers' hardships and the presence of G.E. representatives on campus as the cause for suffering was quickly ended by President Robert Weisman (70BA) who asked Torney to be seated.

### GE BLASTED

Doris Dunlap (71N), a Council representative, asked about the management side and was told by Mike Putnam (72 ED), secretary-treasurer of the Council, that contacts were made with G.E., but that the company was unwilling to be present at an open forum in front of the university community.

Several members of the council deflected the open recruitment policy because they felt that without the free acceptance of companies on campus, the future of the current senior class would be hampered and the Northeastern community considered hostile to the large G.E. firm.

The proposal's supporters then submitted their evaluation of the policy. George Koolianis, a city staff member of the Student Mobilization Committee, stated that "as an educational institution, a

university should not allow G.E. to use it as their own investment tool."

### "NU VOCATIONAL INST."

A similar attitude was held by Frank Gerry (71ED), vice-president of the Council. He said he saw the open-recruitment policy as a hindrance to NU and suggested that Northeastern change its name from "Northeastern University to Northeastern Vocational Institute."

Gerry questioned just how much of an aid the recruitment policy was to the education of the student. He said it seemed more precisely an aid to his future economic status.

The whole discussion finally was summarized by Tom Dickson (71BA), council rep. at large and a proponent of the proposal into two basic issues: 1) freedom of speech in the university and 2) the referendum at the university.

He was concerned not only with the effect of the decision on NU and its students, but of its effect on the nation as a whole concerning the G.E. strike.

Although NU had a referendum, he said, there are "moral implications," and "the majority is not necessarily right."

S. I. HAYAKAWA, president of San Francisco State College, will appear at Northeastern as the first Distinguished Speaker of the year. Tickets go on sale Tuesday.

## Parietals...

(Continued from Page 1)  
don't care if the new parietals are instituted," noted Robinson.

### VOCAL MINORITY

"Those parents opposed to the idea were quite vocal," he pointed out. "Many feel that the present parietal set-up of Friday from 6 a.m. to 2 p.m., Saturday from 2 p.m. to 2 a.m., and Sunday from 2 p.m. to 6 p.m. are sufficient privileges."

Others thought that study conditions would be affected, while some mentioned that a student who had overnight visitors often would be infringing upon the rights of his roommates.

Robinson noted that the dormitory handbook provides for mutual agreements of roommates when having visitors; otherwise

## Council Rescinds Recruitment Vote

By LENNIE GAMACHE

The Student Council in a special session voted to prohibit the General Electric Company from recruiting on campus at this time, a vote rescinding council's action eight days previous.

The meeting, held in the ballroom Wednesday night, was called as a result of developments which occurred this week, namely, the issuance of a restraining order by the university without the consultation of the Student Council.

Seven separate motions were passed, four by large majorities and the other three unanimously. The major motion, passed 18 to 10, demanded that the GE recruiter be restricted from the campus next week because the methods of controlling violence were determined by the university without student consultation.

A motion condemning the forceful removal of nonviolent GE union strikers from the campus, which occurred earlier this week, was passed unanimously in light of provisions in the Student Bill of Rights.

A second resolution unanimously approved, called for consultation with council in respect to any action concerning the use of Boston or other non-campus police or hired Boston police provided there is time for such consultation.

A third resolution unanimously

approved, disassociates the use of the executive board of the student council and the student council's name on the President Asa S. Knowles Wednesday's message. Council members felt the reference to them in the president's remarks were totally invalid.

Council considered the restraining order and any subsequent injunction to be invalid and non-applicable to Northeastern students on this campus.

They further charged Knowles and his administrative assistants with violating a resolution and precedent set in May of 1969 providing for joint consultation with the Agenda Committee of the faculty senate and the executive board of the student council and the president of the University.

The council also specifically demanded that the administration not serve the injunction or restraining order.

The final motion passed cited "flagrant and persistent violations of the University Student Bill of Rights." It also called for disassociation with the administration's present policy toward injunctions and restraining orders.

Finally, council called upon the faculty and student body to join in a condemnation of the administration's irresponsible use of power if the stated demands are not met.

President Knowles was presented

with the demands at a meeting Thursday morning with the Executive Board of student council.

After Wednesday's meeting, council president Bob Weisman (70LA) said, "The basic concept of these notions is that we want a revocation of the restraining order, after which the three sectors of the university students, faculty, and administration can meet and decide what action should be taken."

The defendants named, Dean MacDonald said, were chosen because they are members of Students for a Democratic Society and the University Committee Against Racism. There was no known effort to name conservative group members who might counter-demonstrate.

The Student Council, concerned about the possible violence, temporarily rescinded its support of GE recruitment at the special meeting.

## Knowles Backs Injunction With Fac-Sen Resolution

NORTHEASTERN UNIVERSITY  
Office of the President  
January 21, 1970

To:  
Members of the Northeastern Community  
In a recent memorandum I reported to the University Community that certain young people, some of them identifiable as Northeastern students, indicated their opposition to recruitment by the General Electric Company scheduled for later this month.

It now appears from recent news articles and handbills posted about the University that a threefold attack against University activities has been planned for January 22-23. As indicated in the last issue of the Northeastern News, a group calling themselves the Northeastern Conspiracy is planning an action program, as follows:

1. January 22, 23—Against General Electric Recruiting
2. January 22—Against the College of

Criminal Justice and the Law Enforcement Program at University College

3. January 23—Against Dr. Hayakawa, a scheduled speaker in the Disturbed Speakers Series.  
A call to action printed in *The Old Mole*, a radical student newspaper, and the appearance of professionally prepared handbills make clear that radical students from the Greater Boston Community are being called to a "joint conspiracy" against activities scheduled at Northeastern.

Last week when we realized the full scope of the proposed radical attack on the University and its legitimate programs, we scheduled a number of consultations with administrative officers of the University and the University's Legal Counsel. On Monday, January 19 a joint meeting of the Faculty Senate, Agenda Committee and the Executive

## Riots Follow Hayakawa's Speech

There were basically two incidents Thursday night resulting in 31 arrests, 15 policemen and an undetermined number of students injured, and \$5000 damage to Northeastern property.

The first incident, occurring during Dr. S.I. Hayakawa's speech, began when students hurled rocks, billiard balls and bricks at the Ell Building. In some cases, the objects struck members of the detachment of off-duty, hired Boston police assigned to augment the campus security police.

The second phase, witnesses said, was unprovoked and occurred after Dr. Hayakawa's speech. Many students, in no way connected with the earlier demonstration, told the News of instances where police officers beat students indiscriminately.

The hired Boston Police called for reinforcements after they cleared the demonstrators from the quad shortly before 10 p.m., Dean Gilbert G. MacDonald, vice-president of Student Affairs, said the next morning.

The quad filled early Thursday night with students waiting for admission to Dr. Hayakawa's 8:30 p.m. speech. Because of

clearing of the Ell Center steps. Police asked students to leave the steps and when their request was not heeded, they proceeded to push people down the stairs.

Police set up a wall of defense at the foot of the Ell and more rocks crashed windows of the student center's doors to cries of "Right on!"

One youth, about 16 years old, after encouraging two friends to throw rocks, urged them to "Go get some more."

The call went out to storm the Ell and the police readied their clubs behind their backs with their familiar elbow to elbow stance.

A number of girls from the crowd started a "Skipping" picket line which balked at the line of police and then mingled back into the crowd.

Close to 9:30 p.m. at the center of the quad the chant of "Plainclothes Pig!" was repeated over and over, and then "Get the Pig!"

A plainclothes officer wearing a black overcoat was pulled to the ground, beaten and kicked by a few demonstrators. A second plainclothesman was roughed up but managed to stay on his feet.

A half dozen police moved to the scene immediately, beat and poked the

News staffers Lenny Ganache, Bill Ashforth and Jay Colon

the rumors about forged tickets, the Distinguished Speaker Series refused to admit ticket holders unless they had a Northeastern University ID card.

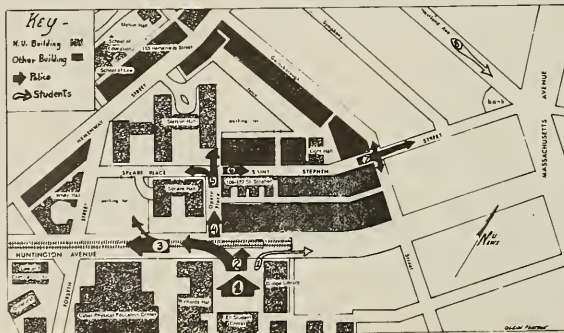

Dr. Hayakawa began his speech shortly before 9 p.m., the delay resulting from the extra security precautions.

But at 9:10 p.m., a rock thrown from the midst of the 2,000 demonstrators outside broke an Ell Building window above the heads of policemen guarding the building's entrances.

This initial action precipitated the

### What Happened Outside

- 1—9 p.m. police clear quad for first time.
- 9:45 police clear quad again. One group of demonstrators run up Huntington Avenue towards Massachusetts Avenue.
- 2—10 p.m. Police clear subway island; move down Huntington.
- 3—10:15 p.m. police attack students in parking lot and push down Forsyth Street.
- 4—10:15 p.m. police begin first of many attempts to clear Opera Place.
- 5—10:45 p.m. police clear Opera Place; start making busts on Seare.
- 6—10:45 p.m. police begin push down St. Stephens Street.
- 7—11 p.m. With crowds dispersed, police continue moving around, but are too dispersed for further busts.
- 8—11:30 p.m. A group of Weathermen and/or street people move down Westland Avenue breaking Shawmut

## Strike Receives Little Support

A feeling of apathy prevailed on the quad yesterday at noon at the suggestion of a student strike. Leaders of the rally representing various political opinions spoke out again on what happened here Thursday night and what the student body should do about it. About 200 attended the rally.

They issued a plea that no one cooperate with the District Attorney in their investigation of Thursday's activities.

Some of the issues brought up were abolition of ROTC and the college of Criminal Justice, racism, the co-op system, and student administration problems. Finally, a day of protest, possibly for today, was generally agreed upon by a few of the leaders, but was not wholeheartedly accepted by the crowd.

The day of protest would not necessarily mean a boycott of classes, but a discussion of what occurred

Thursday on campus. The purpose of the rally, they said, was to bring out the truth and to educate the student body.

Earlier, Dr. Asa S. Knowles issued a statement from his office detailing the events last week.

The statement said aggrieved students could receive legal aid from attorney Philip Boyd, in 139 Richards. Dr. Knowles' statement said a faculty member reported that the Weathermen planned to visit Northeastern Thursday armed with rocks. Dr. Knowles said students close to SDS confirmed the plans and added that the Weathermen planned to beat up Northeastern SDS members unless they became more militant.

About excessive police action, Dr. Knowles said: "Police called to the scene from other sections of the city may have had difficulty distinguishing between innocent students and those bent on destruction. Only a careful

investigation will reveal all the facts of what happened in the streets adjacent to the university."

He was asked for the names of those facing charges from the demonstration, the names of the injured, both police and civilians, and the police department's side of the story.

Suffolk County Dist. Atty. Garrett H. Byrne announced Saturday that his office will investigate the incident which resulted in the injuries of 28 policemen and an undetermined number of students.

"Police officers are not second class citizens," Byrne said this weekend. "If they are attacked in the performance of duty they have a right to defend themselves. I will use every means at my disposal to protect these officers in quelling these student riots."

Two members of Byrne's office Jack L. Zalkind and Lawrence Cameron are handling the investigation.

Zalkind refused to discuss any matters of the case with the News referring to the canons of judicial ethics. "I don't want to say anything that might prejudice the case against the defendants," he said.

He said he was unaware of press statements in Monday morning's Globe. "I don't know where it came from," he said.

He repeated his refusal to comment when asked about reports in Saturday's newspapers saying the district attorney was investigating why police were not issued helmets and who was responsible for throwing rocks.

Capt. John Kreckler, of the police superintendent's office, also refused to discuss the case with the News Monday morning.

"We prefer not to discuss it in view of the fact that there is on the

*"I was pushed to the ground. I got up after losing my glasses. As I was blindly stumbling around, I was hit in the back by a policeman and also pushed into the wall. I then proceeded to the parking lot where I found this fellow who had been clubbed over the head. He was apparently in a state of shock. I picked him up and we walked into the lobby of Stetson East where we tried to get help. I wanted to call an ambulance for him, so I asked the two men who were at the desk if I could use the phone. They said, 'No, you can't use it.' . . ."*

—Jim Seldner

## Knowles Points to Outside Agitators

(The following is the text of President Asa S. Knowles statement to the press following the activities of last week.)

In recent weeks, printed and oral threats against General Electric recruiters on the Northeastern University campus and against the appearance of Dr. S.J. Hayakawa, President of San Francisco State College, have been very prevalent. With these threats, Northeastern naturally took steps to protect the rights and guarantee the safety of these individuals. The steps that the University took were the augmentation of our Campus Security Force and the procurement of a restraining order from the Suffolk Superior Court.

Earlier this week, General Electric recruiters were on campus and the recruiting of students took place without incident. Last night the threatened violence inside the Student Center auditorium where Dr. Hayakawa spoke, did not take place. Unfortunately, however, a large group of non-students assembled in the quadrangle. Reportedly, in this group were a large number of people who had no connection with Northeastern University, including activists and members of the

Weatherman faction of the Students for a Democratic Society. Some of these outsiders came to incite trouble, as they had publicly stated that they would, and even brought with them their own supply of rocks and first aid kits. Trouble began when this group started throwing rocks through windows of the Student Center.

When the aggressive activities of this group went out of control, the Boston Police deemed it necessary to clear the quadrangle in order to prevent a riot. Unfortunately, at this point, some innocent onlookers were swept up in the events which followed.

A majority of the people arrested had no affiliation with Northeastern University.

We estimate the damage done to the University, mainly in the form of broken windows, to be about \$5,000.

The University extends its appreciation to all of those who made a valiant effort to maintain order. It is my hope that the campus can now be restored to normal and we can resume our regular activities.

# Poile Chasing Chisolm's Records

by JIM CONNOLLY

There have been very few right spots in the 1969-70 hockey season for Northeastern, and center-captain Dave Poile is one of those.

Poile, one of the leading goal-getters in the east with tallies and seven assists, as only four games remaining in his illustrious career with the Huskies.

Son of former Philadelphia Flyers' general manager Norman Bud Poile, Dave needs only even more to tie the NU season record of 40 goals held by Art Chisolm. Chisolm's career mark of 100 appears well out of Dave's reach.

Poile has scored 78 goals, but Chisolm played four full years while Poile didn't come up to be varsity until his sophomore year, and then missed half of last season with an injury.

Of all the goals he has scored this year Poile's favorite is probably the one he scored against UIC in overtime.

Northeastern trailed the Yellow-

in the sudden death fourth period.

Husky coach Jim Bell says. "We just wish we had Dave around for another couple of years. He's an exceptional shooter and he's very accurate. It probably comes from his father being a pro coach. He had practice shooting at pro goalies when his father coached on the West Coast."

The elder Poile, who played on the Bruins with NU's assistant coach Ferry Flaman in 1950, coached a minor league team in San Francisco, before moving up to the expansion Flyers. He was recently replaced, but has been mentioned for the new National Hockey League franchise in Vancouver.

Dave winds up his collegiate career February 28 at Brown, but still has a year remaining before graduation.

A finance and insurance major, Dave's future is uncertain at the moment. He has not been contacted by any professional teams, so he will most likely play in the Mass. Amateur League during his senior year.

Poile needs less than two goals a game for the rest of the season to break Chisolm's season record, but the rest of the games

The Huskies are now 3-17 of the season after dropping a 9-4 decision to BU Saturday night and losing 6-4 to Providence Monday night.

Northeastern will be back in action tomorrow night at RPI before finishing the season with matches against UNH, Colby and Brown.

## 19 Acquitted

Cases were dismissed yesterday against 19 of the 31 arrested in connection with the Hayakawa riots at NU on Jan. 29. Beth Doyle, one of the defendants, said that lawyers representing the 19 conferred with the judge and that Mr. Holmans, a university lawyer, announced they would be free and there would be no criminal records involved provided they stayed out of trouble for the next six months.

The charges against all 19 defendants were either "being a disorderly person" and/or "blocking a free footpath," both misdemeanors. Those charged with felonies are to go on trial today and those to be prosecuted under a grand jury indictment will be tried at a later date.

Miss Doyle also said that Dean Gilbert MacDonald had hinted that the charges might be dropped in a meeting held earlier this week.

## Worth sees war bill limiting presidential power

The following interview with Northeastern political science Professor Bruce Worth is an in-depth discussion of the so-called "Vietnam War Bill," which has recently passed the Massachusetts House and Senate. Professor Worth played an instrumental role in the formulation and passage of the bill.

Questions were asked by Asst. News Editor Jim Kelly.

**NEWS: Why is this Vietnam bill now a safe political issue when two years ago an anti-Vietnam referendum was defeated in Cambridge?**

**Worth:** The public has historically indulged the President's judgment. Four years ago the president decided that the war should be escalated and this was consistent with American interests in S.E. Asia and around the world. Those people just took the president at face value. I made speeches in support of the war because I felt that the president knew things that we didn't know. Well, that's a lot of crap. We've waited and waited and have found out that the president doesn't know that much more of anything than we do. In fact, he's probably less well informed than the students of South East Asia that we find on college campuses.

I think public opinion has just caught up and passed the president on this issue.

If Congress had assumed its rightful responsibilities four or five years ago in respect to American foreign policy in South East Asia, we would have debated then what we are debating now. And so now, after the country has been on the brink of national disaster and fragmentation on the war issue, now we're debating. And we're debating it because we've ignored our legislative process.

**Worth:** We talked over the

**NEWS: Is Governor Sargent in a difficult position vis-a-vis the national Republican administration?**

**Worth:** I would have to say yes because if he signs the bill, it will force some kind of rethinking about this archaic process that we have in the determination of foreign policy. I think one thing the public doesn't realize is how very inadequate and, in some ways, almost childish the mode of making American foreign policy...

**NEWS: How do you mean?**

**Worth:** It is ineffective. It is inefficient. It fails to examine many of the legitimate interests of groups of people in the United States. Sometimes the president simply lies to Congress and to the committees. I think in this respect, if the bill does nothing but force a rethinking of the process by which the country is led in and out of war, it will have accomplished a great deal.

**NEWS: Do you feel that the executive branch has too much power?**

**Worth:** It's not just too much power. Its ineffective and sometimes dishonest way in which they exercise that power. We may get into a war for no other reason than bad advice from the people on whom the president leans.

Under Johnson it was the thinnest, most confused and ineffective process.

**NEWS: What do you think Boston Globe reporter Kenneth D. Campbell's remarks that this bill, even if upheld in the Supreme Court, will not force an immediate declaration of war, less likely a withdrawal using the 1954 desegregation rulings as a precedent?**

**Worth:** We talked over the

Prof. Worth ... Nitting at windmills?

phone and I think that what Mr. Campbell is suggesting is that the problem of disengaging from as large an adventure as this would require some active cooperation between the courts and the other branches of government and that it's pretty obvious that you couldn't issue the same kind of decree to execute the decision as you would on a more private matter. This, after all, involves the entire American society in one way or another. An individual can bring it under the bill and if he does then the court can issue a restraining order or "the kind of injunction to prevent him from being sent to a combat zone. That's the immediate decree, applying to one guy.

**NEWS: Do you think that the State Department's announcement that it did not oppose repeal of**

the Tonkin Gulf resolution is a show of supreme confidence and that even if challenged, that the Congress will opt for a declaration of war?

**Worth:** I don't think that Congress will opt for a declaration of war.

**NEWS: But what about the State Department statement?**

**Worth:** Of course you're asking me what the Nixon administration's motive is in saying that they don't care if Congress repeals the Gulf of Tonkin resolution.

If I were President of the United States, I wouldn't want that embarrassing Gulf of Tonkin resolution on my back. It was the thinnest kind of childish endeavor to get a technical certification. If the consequences of it (Continued on Page 12)

Coming to N.U. in 1966 there were few blacks. The dress code was casual but neat and Friday night mixers, fraternities and sororities were the "in" things. Now the black population is growing and long hair predominates. Demonstrations, political activism, and civil disobedience have taken interest from the fraternities and sororities which are not steeped in relevance in today's world. The established old timers must believe N.U. is going to the dogs.

In 1966 the black students were trying to form a Black Students' Union and were pushing the importance of the Afro-American Club to the incoming freshmen. Most of the black freshmen, myself included, were going their own separate ways or in their own individual bag. I didn't feel that organizing was so important and figured it was up to each one of us to "make it" on our own.

I remember when there were so few blacks on campus it was possible to know everyone by name. During the next three years the black union as a community increased to a point where we gained an Afro Center by April of 1969.

Now I've come to see the importance of the solidarity. Even if the black enrollment is growing, it is a big, white school and having brothers and sisters around to talk to about problems only they can understand is important. The Afro Institute is the single most important social institution on campus for many of us. The unity tables in the cafeterias and the unity tree in the quad, though they're taken by the whites as some kind of resentful separatism, mean a lot to us, and help keep us together as a group and as individuals.

I've had to gain more than a black conscious in the last five years - I've had to create a political conscious. I've had to deal with the turmoil and questions presented to me by the expanded war in Vietnam

and its devastating effect on the society. I've come out of the silence and keep-to-myself attitude I had when a freshman and now I'm not afraid to speak out against the immorality of that war as well as the racism the society has bred. And I've found it impossible to be apolitical in the face of the brutality - both physical and psychological - that the oppressor is using.

I took part in the cooperative activist efforts before and during the Strike in Spring, 1970 and found the emphasis was on communication - between the students and the community. Doing canvassing in the community, I found the working man knew he was starting to be remembered by the kids. The students being seen as the workers' ally is the fore-runner of the realization that their fight is against the same injustice and therefore they should be political partners.

I think the five years we've just gone through has been healthy only for blacks working politically within the system, however. We have had at least new laws - the Civil Rights Act, etc. - working for us. But the age of civil disobedience looks as if it is about to end. I hope for the good of all that it continues.

I am excited about the political relevance of today's black nurse. I feel I can be an educational tool and representative of the third world within the system. If I choose to work in the community, I'll be working with the total family as a liaison and resource between the families and the established health care systems and a worker towards change.

I am fulfilling short ranged needs of the community, being aware of their long range results - taking care of the adults and children who will fight and win the right kind of revolution against social injustice.

## Witnesses sought

# Hayakawa riot cases still pending

By STEVE KAUFMAN

THE CASES of 17 Northeastern students charged in connection with the Jan. 29 Hayakawa riot are still pending. Fourteen are charged with disorderly conduct while the remaining three are charged with assault and battery with a dangerous weapon against a police officer.

John A. LaVine 72BA, Malcolm Emory 73E and Steven M. Miller 73LA were indicted by the Grand Jury on felony charges. The trials for Emory and LaVine are set for April 14; the date has not yet been set for Miller's trial. All three will be tried in Suffolk County Superior Court.

LaVine claims he is innocent of the charges against him and that he was subjected to police brutality after he was handcuffed and taken to the Frost Lounge. He described his condition at the time as a "near state of shock" and was taken to Boston City Hospital, where he remained for several hours.

The Jan. 30 Boston Herald Traveler's report of the riot included photos, one showing a youth in the custody of police. The defendant's friends claim the youth resembles LaVine.

Boston police were contacted for a statement but said they could not divulge any information prior to the trial. This is standard police practice.

Emory and Miller also contend they are innocent. Emory reportedly received 12 stitches in the head and Miller said he was maced. The three request any

witnesses who may have seen them that night to call 227-8420 or 445-2744 if they are willing to testify at their trials.

LaVine in particular requests such a call by the girl he allegedly put his arm around while attempting to pull her away from a policeman, who he said was "shaking her brutally."

Several people are reportedly suing the police for brutality.

The students charged with disorderly conduct pleaded not guilty to charges Feb. 25. Their cases were continued to Aug. 26, when the charges will be dropped if they maintain good behavior during the intervening six months.

According to Philip Boyd, assistant to Pres. Asa S. Knowles, those involved include David E. Jacobs 74E, George E. Cusick 71BA, Daniel Remiszewski 73LA, Robert E. Hindin 73E, David E. Jensen 73E, George Hopkins 73E, Carl Driscoll 74BA, More P. Onigman 73LA, James L. Frost 70LA, Alan D. Bell 74BA, Elizabeth Doyle 72LA, Gregory L. Wyss 71LA, Bruce Lemay 74BA and Nicholas Tensen 74ED.

# Coffeehouse offers small pizza pies, full Virgo moon and a patch of Sky

By ALAN WURDEMAN

The house that "folk" built is expanding its schedule this term to include such folk music artists as Eric Anderson and Patrick Sky.

Sponsored by the Ethnomusicological Society, better known as "the folk club," the performances will be held at the club's Moon in Virgo Coffeehouse, 356EC.

"We've been drawing 150 people, 75 per cent of whom are NU students, on most Friday nights this year," commented Stephen Baird '72CE, manager of the student-operated coffeehouse. "When we opened three years ago, we usually only drew 30 or 40 folk music fans per show," he added.

The decision to bring in such folk personalities as Anderson and Sky was due to the increased coffeehouse popularity and a desire on the part of the folk club to demonstrate the need of a campus Rathskellar-Coffeehouse. Presently, the Moon in Virgo Coffeehouse uses 356EC for its Friday night shows, but problems in scheduling the room and setting up equipment have prompted them to check out the chances of a permanent establishment.

"The most likely spot for a coffeehouse and Rathskellar would be the Freshman Bookstore which is really only used three months of the year," explained Baird. "We know there'd be problems in getting this area, especially since the administration controls the old part of the Ell Center, and adding a Rathskellar would mean obtaining a beer license as well as meeting city fire code regulations."

He estimated renovation costs for the area at \$30,000. This would include lavatories, access

to kitchen facilities, a permanent sound system, staging and other remodeling charges.

An alternate plan, reportedly suggested by the administration, would be to enclose the patio area on the west side of the Ell Center cafeteria, which could cost 15 times as much as the first plan.

Baird emphasized that such relocation plans are not imminent and that the coffeehouse's main concern now is to present quality entertainment to the NU community at minimal cost.

During the Spring term the Ethnomusicological Society will present at the coffeehouse the following folk artists:

April 3 Chris Smithers  
Mary Rhodes  
April 10 Dandelion Wine  
Evan Leonard  
April 17 Eric Anderson  
Lynn Kushner  
April 24 Leonde  
May 1, 2 Paul Gernia  
Sweet Potato Pie  
May 8 Bill Madison  
May 15 Patrick Sky (tentative)  
Nancy Michaels

Folk club meetings are held Tuesdays in 247EC to conduct workshops, business or plan special events for either the coffeehouse or the club.

Under the direction of President Robert Edelman '70LA, the club sponsors various concerts and instructional programs on the folk music level, as well as

performing at local concerts and coffeehouses. Four members of the club will be taking part in the Music at Noon series April 30 in a presentation of traditional, contemporary and Indian folk music. Club membership exceeds 150.

Serving 30 different coffees, assorted teas, bagels, tonics and, in the near future, pizzas made with Assyrian bread, the Virgo Coffeehouse is open from September to late May, Fridays from 8 p.m. to 11:45 p.m. This term the club plans to try a Saturday night opening as well.

## Free transfusions in blood dracing

What costs you nothing but a temporary hole in your arm and injures you and your family against expensive hospital bills resulting from costly transfusions?

The answer, if you haven't already guessed, is "donating a pint of blood to the Red Cross."

The organization, whose reserve is presently recuperating from the yearly poor volunteer season, will have representatives in the Ballroom April 16 and 17 from 10 a.m. to 3:45 p.m.

The Red Cross, which requires a simple health pre-donation checkup for the volunteer, assures the donor that if any member of his immediate family needs transfusions during the year following the donation, blood will be available at no cost.

Northeastern NEWS, April 3, 1970

Page 3

## Black enrollment growing steadily

By JIM KELLY

The enrollment of black students is increasing, according to data released by the admissions office. "Northeastern is doing much more for black students than any other local institution. There are more blacks here than at any metropolitan college," stated Ronald E. Latham, assistant dean of students.

In 1969 there were 118 blacks admitted to the freshman class. In the wake of Martin Luther King's death, the newly formed Afro-American Institute presented the university with 18 demands, including one which set a ten per cent minimum quota for minority groups entering the university. Among the students admitted the following September were 180 blacks.

According to Gilbert C. Garland, dean of admissions, this figure will probably increase to 270 this September. He added that the ten per cent quota would "hopefully" be met by 1971.

These figures are only rough estimates since they only represent the number of blacks which the university actively recruits. Latham estimated that there are between 600 and 800 blacks enrolled in the night, graduate, and undergraduates schools.

Garland stated, "The career interests of black students seem to lie primarily in education and liberal arts." He believes the reason for this concentration is because "black students want to get back to help their brothers."

Latham disagrees. "My feeling is that black students are enrolled in programs in which they find indications of success," he

feels in these areas for blacks than in engineering."

In order to meet the ten per cent quota, the university is involved in a number of programs which are designed to increase the black enrollment. The recruitment program, which is jointly coordinated by the admissions office and the Afro-American Institute, attempts to acquaint the black community with what the university is trying to do for them. The final decision for selecting students recommended by these recruiters rest in a faculty-student committee which meets bi-weekly.

Since many of the students come from disadvantaged schools,

the university also sponsors such programs as the Summer-Frap Program which provides tutoring in math and reading. The Afro-American Institute also offers tutoring services as well as serving as a center for encouraging an appreciation of African history and culture.

Latham feels that the plight of the black student in general will not improve until the high school systems advance.

Garland believes that the key to progress lies in attitudes. "The one thing that black and white people have in common," he said, "is the belief that education opens the doors to more opportunities."

## LA faculty petitions ASK

Sixty-five Liberal Arts faculty members recently signed a resolution recommending . . . Northeastern University assume all uninsured medical and all legal expenses, including appeals fees, incurred by all persons involved in incidents relating to the events of Jan. 29, 1970."

The statement was proposed, they said, because "the only official notice taken by the uni-

department Prof. Norbert L. Pullington, history department, and Prof. Eugene J. Saleian, physics department.

It stated:

"(1) We understand, that of the seven people still under indictment, two are not Northeastern students.

"(2) In those instances where cases were continued or charges were dropped, some defendants

1. Factions and violence mar April Moratorium at Harvard Sq.
- \*2. Free Bobby Day downtown ends in slight violence.

- \*6. Betty Shabazz (Mrs. Malcolm X) speaks in his place.
- \*7. Silver Masque does Prof. Robbins' "The Revolution Starts Inside."
- \*8. Earth Day response good by NU students: "Hair" cast entertains.

## Zinn rally draws 700

By KATHY KEPNER

In a forerunner of next week's scheduled anti-war actions, Prof. Howard Zinn of Boston University led a rally of several hundred people here yesterday that "the machinery of the country must be stopped before the war can come to an end."

Also speaking at the rally sponsored by the Student Mobilization Committee and Student Union, was Marvin Robertson of the National Committee to Combat Fascism who condemned the trial of Father leader Bobby Seale and demanded his release.

Following Mrs. Robertson, David Semolina of the Northeastern economics department asserted that the U. S. is increasingly becoming a military state.

Zinn opened his statement by suggesting that private anti-war rallies are becoming redundant.

"The rally held in April, 1970, is the same as those held in 1966, 1967, 1968, 1969," he said. "You can assemble newspaper clippings on the war from this week with one from one or two years ago. They are all the same."

"This may be one reason we are becoming discouraged with anti-war rallies," Zinn continued. "It is

all old stuff. That is what's frightening."

Zinn accused the government of reducing the availability of the American people to a state of helplessness. He said that since the escalation of the war in 1965, atrocities such as My Lai have been going on, but now that they are being brought out into the open, Americans feel helpless to do anything about them.

"And as for the case of Bobby Seale," Zinn stated, "this is nothing new either. Follies have been beating and persecuting black people's indiscriminately for

"What this should suggest to us is that the problem is not just Vietnam or not just Bobby Seale or not just the specific shabbings of people at specific demonstrations. The problem is we've been a police state for a very long time. We've been led as we are an acronym and that we are unique. And we've believed it," Zinn charged.

"What does all this mean?" Zinn asked the crowd. He said it means the people must begin to organize into "new constellations of power" so that when the time arises the people will be ready to create a democracy, something which has never existed in this country."

By HANCOY BURTON

In response to the broadening call for the U.S. to get out of Vietnam, Laos, Cambodia, and the rest of Southeast Asia, the April 15 coalition at Northeastern has scheduled activities that began this week on campus and will culminate in the city-wide demonstration at the Boston Common next Wednesday.

Following a kick-off rally yesterday to the quad, the Student Council is conducting a student referendum next Monday and Tuesday as part of a nation-wide poll of student opinion of U.S. activity in Vietnam.

The Council has also called for a strike next Wednesday, similar to the one in October, which would require instructors to cancel tests for the day and allow

the nine committee members and it was decided 5 to 4 to substitute another speaker in place of the debate at this time."

The release concluded, "The well-being and safety of all who might be attracted to our program is of vital concern to the committee."

Lance, who had voted against the cancellation, told he could

## DSS Committee cancels Hoffman; picks Betty Shabazz to speak

By MARY DELMAS

In an unprecedented action, the Distinguished Speaker Series Committee canceled the scheduled April 14 debate between Abbie Hoffman, Yippie leader and member of the Chicago 7, and Philip Luce, national college coordinator of the Young Americans

for Freedom.

Instead, Mrs. Betty Shabazz, widow of Malcolm X, will discuss black women and the women's liberation movement.

Following the announcement Monday at a press conference of their 5-4 decision to cancel the debate, the committee unanimously voted to "invite to the Student Council 5000 in order to meet the sponsors for a lecture," tentatively scheduled for April 22, by David Hoffman, chief of staff, Black Panther Party, in Alumni Auditorium.

According to Peter Lance TILA, chairman of DSS, "The committee has always felt for responsibility not only for bringing speakers to campus, but also for helping other groups to bring speakers here."

"The DSS Committee canceled the debate because of the committee's concern about the safety of students and guests who might attend the event."

According to the official DSS statement which was read at the press conference, "It seemed evident after discussion of the evening (January 29, 1970) in which Mr. Bayliss spoke to a part of the series that if a large number of people wish to attend as well as the facilities are inadequate, there is no way to insure the safety of these people concerned."

Within the anti-war series, speakers can be guaranteed to the audience, but, unfortunately, we must protect those outside the audience can be assured," the statement continued.

"The majority felt that the numbers coming to the university for the debate would be so great that a large proportion would have to be turned away because of inadequate facilities. And so the unfortunate incident occurred outside of the audience, which the committee would be powerless to avoid, the vote was taken by

the nine committee members and it was decided 5 to 4 to substitute another speaker in place of the debate at this time."

The release concluded, "The well-being and safety of all who might be attracted to our program is of vital concern to the committee."

The release concluded, "The well-being and safety of all who might be attracted to our program is of vital concern to the committee."

According to the official DSS statement which was read at the press conference, "It seemed evident after discussion of the evening (January 29, 1970) in which Mr. Bayliss spoke to a part of the series that if a large number of people wish to attend as well as the facilities are inadequate, there is no way to insure the safety of these people concerned."

Within the anti-war series, speakers can be guaranteed to the audience, but, unfortunately, we must protect those outside the audience can be assured," the statement continued.

"The majority felt that the numbers coming to the university for the debate would be so great that a large proportion would have to be turned away because of inadequate facilities. And so the unfortunate incident occurred outside of the audience, which the committee would be powerless to avoid, the vote was taken by

the nine committee members and it was decided 5 to 4 to substitute another speaker in place of the debate at this time."

The release concluded, "The well-being and safety of all who might be attracted to our program is of vital concern to the committee."

According to the official DSS statement which was read at the press conference, "It seemed evident after discussion of the evening (January 29, 1970) in which Mr. Bayliss spoke to a part of the series that if a large number of people wish to attend as well as the facilities are inadequate, there is no way to insure the safety of these people concerned."

the nine committee members and it was decided 5 to 4 to substitute another speaker in place of the debate at this time."

The release concluded, "The well-being and safety of all who might be attracted to our program is of vital concern to the committee."

Prof. Mart Kaplan, drama and speech department, added, "The philosophical problem of the freedom of speech is of only tangential importance here."

"We were concerned with the safety of the total Northeastern community," he said.

Prof. Harry Weiss, English department, pointed out that the committee had voted to bring Hoffman to campus last fall, prior to the Chicago 7 trial and that "in the context of history, he is a different person."

This explanation, however, would draw more than Alumni Auditorium can hold, he said.

When asked if the administration had any opinion on their decision, Dr. Norman Rosenblatt, associate dean of faculty, replied, "The administration has not expressed any opinion to me."

Rosenblatt, who voted to cancel the debate, said that he had signed Hoffman's name to the letter by which he was invited to campus.

"While the committee itself may be very safe inside the auditorium, our decision might have been violence if Hoffmann had come."

Jeff Green, TILA said he questioned the validity of the apparent assumption of the majority of the committee, "They assumed that there would be a large number of violence and that it would be a similar situation to the Haymarket riots."

Green added he thought the committee had been frightened by what happened the night of January 29 and that there was more chance of violence by canceling the debate. "It's a very frustrating thing to have speakers booked and have them cancel."

Defending the majority's decision, Robert Held, UCLA, said a reconsideration of the right of free speech was not involved in their decision and the canceling did not set a precedent. "If I don't think it infringes on the right to free speech on this campus, the committee exercised his privilege to speak, not his right," Held said.

By MARY DELMAS

In an unprecedented action, the Distinguished Speaker Series Committee canceled the scheduled April 14 debate between Abbie Hoffman, Yippie leader and member of the Chicago 7, and Philip Luce, national college coordinator of the Young Americans

for Freedom.

Instead, Mrs. Betty Shabazz, widow of Malcolm X, will discuss black women and the women's liberation movement.

Following the announcement Monday at a press conference of their 5-4 decision to cancel the debate, the committee unanimously voted to "invite to the Student Council 5000 in order to meet the sponsors for a lecture," tentatively scheduled for April 22, by David Hoffman, chief of staff, Black Panther Party, in Alumni Auditorium.

WHITE HALL  
FOR MEN

IT'S THAT DAY OF DAYS FOR  
ARTHUR ENYOU... THE LONG-  
AWAITED DAY OF COLLEGE  
ENTRANCE!!

OH BOY!

WRITTEN BY  
JAMES VRABEL

SNATCHED OUT OF THE OLD  
WOMB-SEEK OF HOME, HE'S  
ON HIS OWN. THE FIRST  
STEP IN THE JOURNEY TO  
LIGHT, TRUTH AND VIRTUE AT  
THE BASTION OF LEARNING...

THE ROAD BEGAN LONG BEFORE!  
TUCKED AWAY IN A SMALL SUBURBAN  
COMMUNITY BEHIND THE SHORT HILLS  
OF NEW JERSEY, MR + MRS CLARENCE  
ENYU BEHELD, THE SEED OF PROMISE  
IN THEIR SON, ARTHUR AND KNEW  
IMMEDIATELY THEY WERE BLESSED!

THE WARM WELCOME TO THE  
HOLLOW HALLS WAS ENOUGH TO MAKE  
ALL BUT THE BRAVE DOUBT!

BY DEFENDING THE NATION WHICH DEFENDS  
TO THE DEATH, DEFENSE; BY SUBTLE AND  
SEDUCTIVE ENTICEMENTS.

THE DAY OF THE GREAT TURTLE RACE HAD ARRIVED...  
THE SCHOOL'S GREATEST ACCOMPLISHMENT, FOR IT  
HAD BEEN INCLUDED IN LIFE MAGAZINE!

THAT NIGHT, ARTHUR AND HIS SCHOOL SPIRITUAL BROTHERS CELEBRATE A RACE WELL  
RUN BY THEIR TURTLE!

NOT ONLY DOES ARTHUR  
SEEM TO LOSE HIS SHYNESS...

BUT ALSO SOMETHING

EVEN MORE PERSONAL!

ASSURED OF THE BENEFITS OF THE COOPERATIVE  
EDUCATION...

WELL, YOU SEE... WE HAVE TO  
FILL OUR JOB QUOTA FOR  
UPPERCLASSMEN  
FIRST...

"UNDER WHICH STUDENTS ALTERNATE PERIODS OF  
CLASS ROOM STUDY WITH INVALUABLE ON-  
THE-JOB-EXPERIENCE...

AMALGAMATED  
INDUSTRIES  
INC.

RELATED TO THEIR ACADEMIC  
MAJOR."

ARTHUR IS ASSIGNED A HERCULEAN TASK  
FROM HIS EMPLOYER.

BUT UNDAUNTED BY DRUDGERY  
OF HIS DAYSHIFT JOB, ARTHUR  
TURNS TO CLANDESTINE PLAN-  
NING AND DESIGNING...

AND BECAUSE OF HIS WILL TO SUCCEED AND  
OF COURSE HIS AMERICAN HERITAGE...

HE FINALLY COMES UP WITH  
THE PLAN SO LONG SOUGHT  
BY MANY MEN HIS ELDER!!

THE DAY OF THE UNVEILING  
OF THE DOME COMES, AND  
ARTHUR, SURROUNDED BY  
PROUD PARENTS, CO-OP ADVISOR  
AND EMPLOYER, BEHOLDS  
THE WONDER AT WHAT GOD  
AND NORTHEASTERN HAVE  
WROUGHT THROUGH HIM!

NEW CAREER IS BEGUN!

HEY BENNIE DID  
YOU GET OUR  
TICKETS FOR OUR  
CLASS REUNION  
YET? BOY, I CAN  
HARDLY WAIT!

WHAT DO YOU MEAN  
WE CAN'T USE THE  
BALL ROOM BECAUSE  
A BUNCH OF RADICALS  
TOOK IT OVER?

WHO DO  
THEY THINK  
THEY ARE?

I SWEAR...  
NO CRUMMY  
REVOLUTIONARY  
BUT IS GONNA  
WRECK MY  
REUNION!  
I'LL...

STILL LATER, THE HERITAGE IS CONTINUED. FOR ARTHUR ENYOU, MR. N.U., THE TRILES AND TRIBULATIONS OF A MOTH-EATEN EDUCATION CULMINATE AND THREATEN A REPEAT PERFORMANCE!!

## Cambridge Reacts to Worst Riot Night

### City Puts Halt to Marches, Parades, Assemblies; Curfew May Continue

By George Craft and Seymour Lussert  
Contributors

Since the riot broke out last night, and 30 others were under arrest today after a night of riotous clashes between thousands of young people and police in Cambridge.

The police violence and destruction were the worst in the history of the city, which has seen many other disorders over the years.

Thousands of students using Massachusetts and around Harvard as were arrested. The police were arrested and beaten. The subway train in Harvard was hit, and was set on fire.

The last night of these riots demonstrated a serious threat to the city's safety and the lives of its citizens.

The city council, however, expressed its confidence and support for the Mayor, James L. Sullivan, who is in the city today.

The city council, however, expressed its confidence and support for the Mayor, James L. Sullivan, who is in the city today.

Sullivan said he has heard all possible marches and gatherings in Cambridge today.

He has also had a number of meetings with the city police to discuss the situation and to try to prevent further violence.

This is not the time to be holding any sort of meetings in the city, which is in a state of emergency.

The demonstrators were organized and coordinated in advance by the Harvard Union.

Who had given a demonstration with police in the streets of Cambridge after the riot, the demonstrators were arrested and taken to the city jail.

Twenty-three persons were among the arrested. They were in the city today, but remained under medical care today.

# No room for Majority blacks in the Silent

Today I wrote a letter to the Richard M. Nixon Silent Majority Club and Memorial Association, asking for a map noting the route to America the Beautiful. They replied, requesting that I give my reasons for wishing to find this "heaven on earth." In response, I sent another letter informing them that I was a hard working college student, trying to get the proper education that would open the doors of plenty that I just know lead to America the Beautiful.

They answered that a college education was a very important step but they wanted to know if I had ever been involved in a protest demonstration or had smoked marijuana. Seeing this as a valid inquiry into my character, I sent them a copy of a police file on myself which indicated that I had never been arrested or charged with any crime. In fact, the only blemish was a speeding ticket at age 17.

I imagine that the Washington address on the police report

prompted them to inquire about my home and family because they wanted to know in what section of Washington I live and did my parents also live and work in Washington. I realized right away that they sought to establish the fact that I had a normal, stable childhood. I wrote back relating several memorable experiences of my youth; one that stood out in my memory was the first day in an integrated school and enough books to go around the class. I also informed them that my parents were both hardworking, upstanding adult citizens of Washington. My mother works for the federal government and my father teaches at the black Howard University in Washington.

After these numerous exchanges of letters I was getting a bit apprehensive as to whether or not I'd ever make the Beautiful. I decided to chance a call. In my very best college English I requested an application form. To my surprise, in only a matter

of a couple of days I received the application. It was so simple, I couldn't really believe it. They only asked; (1) Name, (2) Age,

(3) Race and (4) to please send photos of both parents.

The latter question was a bit unusual but I brushed over it in my glee. The questions were answered quickly and I posted it special delivery. I waited anxiously for the mailman each day and four days later my patience was rewarded. I opened it quickly and read: "We are sorry but at present we have no vacancies for your particular qualifications!"

Under these words I'd like to add, in case you've forgotten...

"We hold these truths to be self evident; that all men are created equal; That they are endowed by their Creator with certain inalienable rights; That among these are life, liberty and the pursuit of happiness: . . . That whenever any form of government becomes destructive of these ends, it is the right of the people to alter or abolish it . . . it is their right, it is their duty to throw off such government . . ."

# Chinese Orbit First Earth Satellite

## Intones 'The East Is Red'

By Phil Brown  
Associated Press

TOKYO — Communist China yesterday announced it had put into orbit its first satellite—a 281-pound package that plays a song honoring Mao Tse-tung.

The announcement did not say what else the satellite might be doing or what sort of rocket carried it into a high, looping orbit in space Friday.

Hsinhua (New China) news agency reported early yesterday the satellite was "moving satisfactorily and its equipment functioning normally," with its instruments "continuously sending back various kinds of data." The scientific material is broadcast in intervals when the music to Mao is silenced, with 40 seconds of music, 10 seconds of data and 10 seconds of silence every minute, Hsinhua said.

The success made Communist China the fifth nation to put its own satellite into orbit. The Soviet Union was first in 1957, followed by the United States in

Peking reported a huge celebration in the streets of the Chinese capital to mark the launching. It said Peking streets were specially lighted by giant reflectors so people could continue the festivities far into the night.

("Shouting and music are heard from all sides, accompanied by shots and detonations by which this significant moment for China is celebrated," the Tangu correspondent reported.)

In Washington, the U.S. Defense Department said the launching came as no surprise. It said the achievement "obviously reflects the significant progress" in China.

The U.S. North American Air Defense Command headquarters in Colorado Springs, Colo., confirmed Peking's announcement that the satellite was circling the globe every 114 minutes at a distance from the earth ranging from 273 miles to 1480 miles. NORAD said the satellite will pass over several U.S. cities, including New York, Honolulu and San Francisco, but will probably not be visible in the

# Police smash Hemenway, Westland

About 150 club-swinging Boston Tactical Police charged a crowd of 300 students on Hemenway street early Monday morning, smashing windows and beating bystanders. They surged into apartment buildings and dorms, smashing down doors and injuring residents. At least 20 persons, including a blind student were injured during the two and a half hour melee.

The charge came at 12:40 a.m. as the students lined Hemenway Street watching a group of 30 persons who sat in the roadway blocking traffic. Student marshals who had tried to disperse the crowd of onlookers said those in the street were not students. Police had notified security Police prior to the charge and marshals had given 25 minutes warning to much of the crowd.

A report from WNEU newsman Ed Ferguson 74CE, at the scene said there was "no provocation whatsoever for the police attack," and reported at one point that police were on the roof of 99 Hemenway St. throwing rocks and bricks.

Reports from NEWS and WNEU newsmen at the scene said a police cruiser with two officers passed the area at 10:30 p.m. Sunday. As the car existed to-

ward the Museum of Fine Arts, it stopped in front of 120 Hemenway St., where someone threw a chair and beer can at the cruiser. Student marshals said the attacker was not a student.

Two hours later, a flaming mattress was thrown from the roof of the same building as students milled in the street. The building is not a dormitory.

## Witnesses

Will any eyewitnesses to Sunday night's activities, as well as those who were injured and those who took photographs, please contact the NEWS in 446EC or call 437-2-2879. Thank you.

At midnight, the Northeastern Strike Information Center, which had been in direct communication with Mayor Kevin White's office for the previous two days, was notified that 100 police were massing near the intersection of Westland and Massachusetts Avenues. The report said that unless the area was cleared, the police would be called in.

The charge began forty minutes later from the intersection of Westland Avenue and Hemenway Street. Riot-helmeted police ran five abreast and 20 deep swinging clubs as students chanted, "1, 2, 3, 4, we don't want your fucking war."

Police yelled "Up the pig, here come the pigs" in response.

After the first pass, the police regrouped at the same intersection and began a second charge. They smashed windows in homes and parked cars and beat bystanders as they passed, reporters said. People were clubbed while fleeing down streets and into buildings.

Police entered buildings in groups of up to 15 at a time, including apartment houses at 97, 99, 119, 120 and 153 Hemenway St., at Northeastern dorms at 115 and 157 Hemenway St., and 90 The Fenway. Apartments inside each of the buildings were smashed open and residents were clubbed. Furniture and personal belongings were smashed.

Northeastern's Asst. Director of Student Housing, David Robbins, was beaten by the police in the entryway of 153 Hemenway St. after he tried to call the students back into the dormitory.

Robbins' first-floor apartment door was kicked open. Robbins said his wife and children were inside at the time.

Robbins said he felt the police attack had been provoked, but that the tactical police "went a little too far."

"They're fast, they're brutal. That's their job. They don't understand anything else," he said.

The dorm director, Eric Portier,

(Continued on Page 4)

## ding system

(Continued from Page 1)

a graduate student, was also beaten inside the dorm building.

Doorways to apartments were also smashed open on Gainsborough Street, Westland Avenue, Symphony Road, and The Fenway.

One elderly couple, who live at 157 Hemenway St., said police smashed open their second-floor apartment door, yelled "Watch out," then smashed the apartment windows, furniture, and ripped pictures off the walls. The couple declined to give their

names to the press.

Witnesses said police hurled rocks and bricks and yelled obscenities from apartment building rooftops.

Mr. and Mrs. Michael Mandel, of 110 Gainsborough St., were beaten in the hallway of their apartment building. They were treated at Massachusetts General Hospital for scalp lacerations and released. Mr. Mandel, a student at Berklee School of Music, is blind.

Barney Frank, administrative assistant to Mayor White said that reports of the police action seemed "unlikely" and that "I a

obviously can't comment on what's precipitated this since I'm not there and can't see it."

Sunday marked the fourth night students had gathered in the streets as the national student strike entered its second week.

Spontaneous block parties on Hemenway Street, between Westland Avenue and Gainsborough Street, were held Thursday and Friday nights. The police came, but allowed the crowds, ranging up to 600 persons, to remain.

Saturday night, however, 60 Tactical Police dispersed a crowd of 350 when the group attempted third night of partying.

## BPD official refutes over-reaction charge

According to Boston Police Supt. William Bradley, 60 to 80 policemen were involved in the clearing operation at Hemenway Street Monday morning. Of these, 30 were members of the Tactical Police Force.

Supt. Bradley said that the use of the TPF was in response to complaints of citizens and at the request of student marshals.

He said that officers were dispatched to Hemenway Street and were greeted by a hail of cans and bricks thrown from the street's rooftops.

Bradley said, none of the police had used clubs.

No objective person, he said, could say the police had over-reacted.

## ASK: NU's image harmed by riot

By NEDDA D. YOUNG

Members of faculty, administration, the Boston Police Department and student leaders met late Monday afternoon to try and avert another Sunday night, termed by Pres. Knowles as a "riotous situation that the police had to control."

The president regretted anything that happened the night before, and hoped there would be no recurrence. "It won't do anybody any good," he explained, "it merely gives the wrong impression to the public of what goes on at Northeastern."

And to insure that nothing

would happen, four precautions were agreed upon by those attending the meeting.

1) Hemenway Street and the corner of Gainsborough and St. Stephen's Streets were closed to traffic. Wooden horses were set up at each end to prevent cars from entering. Faculty were also standing at these points.

2) Campus police, faculty and student marshals were stationed inside the entrance to each dormitory.

3) Faculty and students were on hand as observers.

4) The Tactical Police Force was not to be brought into the area.

Curfews in dormitories, originally set for 8 p.m., were rescheduled for midnight.

Among those attending the meeting with Knowles were Supt. William Bradley and Dep. Supt. Warren Blair of the Boston Police Dept. and John Fisk representing the Boston City Legal Dept.

An investigation into Sunday night's melee was decided upon by the faculty. If the mayor does not appoint a blue ribbon committee to study the incident, Knowles promises that he will organize one himself.

# Eyewitnesses recount intensity of police reaction

I stopped my car at the intersection of Forsyth and Hemenway streets and found three other cars stopped in the intersection with about seven to 10 people standing by them. I looked to the right (toward Gainsborough) and saw a group of perhaps 20 to 40 tactical police standing in the street. I saw several looking down the street toward where I was sitting on the roof of my car, waving their nightsticks in my direction.

The next thing I saw (was) a group of eight to 15 tacticals come out of a building with a well-lighted front door, which enabled me to see the nightsticks in their hands.

They joined the group of tacticals in the street and they moved in my direction with no perceivable haste. I cannot say that I saw the street number of the building out of which the police came, but my conviction is that the police came out of 153 Hemenway St. This is based on the fact that the group of 20 to 40 police was standing directly next to a stretch of fence I know, and police came outside and walked straight to the middle of Hemenway Street.

I swear the above statements are factual and truthful.

James A. Kinsley 72LA

On the night in question I was standing in front of 153 Hemenway St. observing the disturbances of the evening. Seeing the students start to disperse and hearing rumors that the tactical force was coming, I assumed the tactical force was clearing the streets. Many students, including myself, entered the dormitory. I immediately attempted to clear the lobby by telling the students to go to the upper floors of the building.

Moments later, a few members of the tactical force entered the building by smashing several plate glass windows. Seeing them entering the building and swinging indiscriminately at students and private property, I attempted to seek refuge in the closest door available, which was the apartment of David Robbins, assistant director of student housing at Northeastern. Finding the door locked, I turned around and found the tactical force members standing in front of me. In the process of identifying myself as a member of the staff, I was clubbed twice, resulting in needed medical attention. The officers, having found that I was a member of the staff, broke open the door of Mr. Robbins' apartment with a nightstick and ordered me inside. I also saw David Robbins get clubbed in a similar manner across the thighs.

In a conversation later in the evening with Lt. MacDonald of the tactical force, he informed me that no search warrants had been issued for any Northeastern University property. Later in the evening I received medical attention for an injury sustained in the incident.

Charles Beare  
Resident Assistant  
Northeastern University  
153 Hemenway St.

At approximately 12:30 a.m., Monday, I ran into 153 Hemenway St. I was standing in the lobby when members of the Tactical Police Force converged on the building, breaking windows; I then ran into another apart-

ment. The last person in the room was bleeding hard and seemed dazed.

The police then retreated, and the people in the room left and stood in the lobby.

About 15 minutes later, four of us were standing in the doorway to an apartment and a fifth person was outside the room. Suddenly the person outside hollered to get in the room because the police were coming. The four ran into the interior and seconds later the fifth and an unknown sixth person entered the room.

The police kicked in the outer door and entered the interior. There were three policemen and all five of us were hit. No arrests were made. As the last policeman was leaving, he stopped and with his club he swept off a bureau and then smashed a bottle. Other damage incurred was a broken set of shower doors and a smashed phone.

Richard W. Ayer II

I was on the roof of 56 Symphony Rd. on Monday morning at 1 a.m. observing the Tactical Police Force clearing Symphony Road of people. A TPF spotted me, drew his gun and fired in my direction and then moved on.

Steven Miller

I was working with the Red Cross (strike medicals) aiding people on the street, when I was struck by a police officer on the head. They went crazy and beat everybody around. They beat a blind man up in front of his own apartment. They broke windows. They threw bricks from the roof at kids. They repute their claim to be called animal. And now I ride on the revolution and want to get even for the sake of all those that were hurt in the struggle.

Al Cole

At about 12:30 a.m. I entered one of the apartments at 153 Hemenway St. One student was lying on the floor, bleeding profusely from a gash on his right forehead. I helped him out of the room to administer first aid. After helping him out, I returned to the apartment with four others and we sat down in the middle room.

A couple of minutes later, I heard a lot of yelling, and two students ran in, one into the middle room, the other into a third room, locking the door behind him. I heard a bang; later I learned they (the police) severed the lock from the door.

Three policemen raced into the

middle room, striking at the students and objects in the room. I was struck five times—twice on the left arm, once on the left shoulder blade, once on the left wrist, and once on the right knee. After being struck twice, I yelled "What are you hitting us for, we haven't done anything?" and received no reply. As they left the room, I asked, "What the hell are you doing?" One of the policemen replied, "We're doing our job," and swept everything off of the top of a bureau smashing a couple of bottles. Then they left.

Michael Ellis

The main group of Tactical Police Force were still coming down Hemenway Street when I decided to return to Melvin Hall. I was in the middle of the small alley, between 84 and 90 The Fenway, when one tactical pig came tearing around the corner. Having just gone outside a few minutes before, and (after) using the previous police action) I threw my hands into the air and stood at attention.

This lone cop reached down and from a distance of eight to 10 feet threw half a brick at me. I ducked to the ground and it went just by my head. He began to swing his club at me when witnesses on my dorm's rear balconies began to holler. I guess he heard them past his own cursing just enough to imagine that someone was going to throw something at him from the fire escape.

He had left the main group of cops so I guess he just wanted a little blood, yeah, real sport for the creep.

Jay P. Rosliff

At approximately 1:00 a.m., a group of nine or 10 policemen (fully riot-equipped) stormed up The Fenway and stopped in front of Melvin Hall. I was watching them from the lobby window.

On a signal from one of them, they began throwing rocks through Melvin's windows, shouting obscenities. I heard one of them say, "You fucking bastards! You throw more rocks than us!" and another made a pointed remark about a student's mother (perhaps to commemorate Mother's Day).

Rex Schultz 74LA

Two friends and I were sitting on the front steps of 120 Hemenway (private apartments). We were told to clear the streets, so we went inside where we live. We locked the door and stayed

—Sally Mui

**HEMENWAY STREET** — Monday morning — 12:40 a.m. Members of the Boston Police Department walk down the street prior to charging students in what Police Superintendent William Bradley described as a "clearing operation."

away from the windows. One window was broken (not by us) at some time.

Then the police came and broke down the door without knocking. It took about three to four minutes to break the door. We backed off into the bedroom and said that we had done nothing. They started to beat us, while I was standing, and then while on the floor.

I was then pushed into the bathroom and they closed the door. They they, the pigs, were gone. The piano keys were all smashed and so was a record player. A similar incident happened upstairs. I consider the beating as unprovoked and sadistic.

John Freeman 71LA

I was outside the dorm and at approximately 1:15 a.m., I sighted a tactical force charge proceeding west on Hemenway Street heading toward me. I entered the inner lobby of the dormitory (153 Hemenway) and

turned around in order to see what was happening in the street.

A policeman swung his club through the window and struck me in the neck and showered me with glass, cutting me slightly. Immediately afterward, a policeman came through the door and struck me in the right elbow. I kept from being further accosted by fleeing into the basement. Medical attention was required on my arm.

Gary Stacey

Inside hallway, trying to get into apartment (with) husband's key. Eight Tactical Police Force clubbed Mr. and Mrs. Mandel. They were into their hallway when police threw an unidentified object to break glass door and commence beating the couple. Mass. General Hospital treated Mr. Mandel, six stitches. Mrs. Mandel received two stitches on (the) head and several bruises and abrasions.

Elizabeth Mandel  
110 Gainsborough St.

## The Information Explosion

It is estimated that the amount of written information will double during the Seventies.

## Ed Ferguson Statement

At this time I wish to state that a quote of mine was used out of context on the first page of Northeastern NEWS, Tuesday, May 12. The NEWS quoted me as saying "no provocation whatsoever for the police attack." Unfortunately the time of this statement was not given. At approximately 1:51 a.m. the police had made a second charge down the street entering 97 and 103 Hemenway Street. It was at this time that the police were throwing rocks off the roof of this building. It was during this second attack, not during the first attack, that I made the statement "no provocation whatsoever for the police attack." I was not consulted before this quote was used and this is why it is out of context. There was definitely provocation for the first attack.

Edward Ferguson 74CE WNEU

# More accounts of Hemenway Street fracas

## Second floor

On the morning of May 11th, 1970, around 12:45 I was sitting on my porch at 111 Gainsborough Street when I saw policemen running down Hemenway Street to disperse a crowd that had gathered on Hemenway Street for a block party, (the people, 5 or 6 out of the crowd, had been trying to incite the crowd by blocking traffic between Gainsborough Street and Westland — they were unsuccessful in inciting the crowd). I was not involved in any action that might have provoked the police.

I saw the police group at the intersection of Hemenway and Gainsborough and I saw them break the door windows with their sticks at 110 Gainsborough Street and charge into the building.

I observed approximately 8 policemen breaking into a run toward my building and I rushed into my apartment with 8 other people. Some stranger in this group ran through our apartment and out the livingroom window onto the fire escape. My roommate, Bob Donovan and I held the apartment door after the police started trying to break it down. They burst the door off its hinges and I ran into the kitchen and was approached by a black policeman who proceeded to club me with his nightstick. After approximately 10 blows, I managed to grab his stick with one hand. Then another policeman came over and clubbed me. The black policeman said "let go of my stick," and after a few minutes they left.

We all went to the upstairs apartment and I collapsed on the couch in shock. At about 2 a.m. I was taken to the Peter Bent Brigham Hospital, treated, and released.

William M. Nickerson

## 'Get one for you'

I am William C. DeSerres of 115 Gainsborough St. in Boston, am 22 years old and a student at Northeastern University. This is my fifth and last year of undergraduate study; during most of these years I have been a history major with better than average grades and have had co-operative education jobs working for the National Park Service Department of the Interior, U. S. Government, the Children's Museum in Boston, and the Massachusetts Historical Society in Boston.

On the night of Sunday, May 10, when the Tactical Police Force were sent into the Hemenway St. area, at approximately 12 midnight (I am not sure of the exact time, it was sometime between the hours of 11 p.m. and 1 a.m.), I walked to Westland Ave. to visit a friend there. At Westland Ave. near the junction of Massachusetts Ave., I witnessed approximately 75 to 100 police of the Tactical Police Force massing and getting ready to enter the Hemenway St. area, where students had been holding block parties for the preceding four evenings. I also saw about 4 or 5 police dogs who were driven to Westland Ave. in a police car labelled K-9. I saw the police march in formation toward Hemenway St., I clearly heard one member of the Tactical Police Force on the way to Hem-

enway St. say exactly, "I'll get one for you," to a policeman who was remaining behind in the car. At this point I decided the area was unsafe, and was told by other area residents that I would probably be beaten by police if I attempted to return to my apartment. I went to the Northeastern Student Center where I remained until 4 a.m. when I heard the police had cleared the area.

William C. DeSerres

## Hot pursuit

On the morning of May 11th sometime around 2 o'clock I and about 9 others were sitting on the front steps of our apartment, saw a police wagon coming down Hemenway Street in our direction. Not one of us physically or verbally provoked the police in any way. As the police wagon slowed to a stop the policeman on the passenger side of the

window, then left.

My apartment is located well above Westland Ave. No one had run by us and we were sitting and hadn't been running at all. Aside from the fact that they came from the opposite direction of the disturbance, they had no reason to suspect us of having thrown anything or even having engaged in any of the activity earlier that evening.

Paul A. Harvay

## Rear window

On the morning of Monday, May 11th, at about 12:30 I witnessed the beating of my neighbor, Wm. Nickerson, who lives in 111 Gainsborough, Apt. 1-R by a policeman. I heard screaming and opened my apartment door to see where the noise was coming from. I looked out a window outside my door and could see into his apartment (the kitchen) and saw the policeman beating him with a club in his right hand. This was going on in front of his kitchen window. In about 3 minutes, the policeman went out of view and I then climbed out a window and crawled across onto the fire escape and into the apartment directly above my friends apt. By this time, my friend, and several other people who had been in Apt. 1R with him had all arrived in this apartment. We waited for about an hour, until the police were off the streets. Then we got into my car and drove to Peter Bent Brigham Hospital, where my neighbors received medical attention.

Martin Camacho

## Police attack on blind musician, wife

EVENTS LEADING UP TO  
POLICE ASSAULT AT  
110 GAINSBOROUGH, APT. 14

On Sunday evening, May 10, 1970, my husband and I, along with various neighborhood friends, were observing the activities on Hemenway Street from our living room window. At 10:45 we went outside and then at 11:00 we went to New England Conservatory of Music to their Marathon Concert. We returned approximately one hour later and met with friends in the street and stood around the entrance to our building talking with them and observing the events on Hemenway Street. Mike went into the house and got his flute and was standing near our entrance playing the flute. I was standing in this area with a neighbor girl (Peggy of 100 Gainsborough #1-A). Sometime later I could see the police marching in formation in our direction.

### THE ASSAULT

Michael had already started up the stairs and Peggy and I started up the stairs after him, keeping an eye on the advancing police. I then saw them break rank and start running at full speed in our direction. We then started running ourselves. We got through the first outer door which is unlocked. We then got through the second outer door which is locked. The three of us were standing at the outside of our apartment door (the first door inside the outer doors) Mike attempted to get the key in the lock and open the door. As he was doing this the police broke the windows in the outer doors and then burst into our building, breaking through the locked outer door. Without any remark to any of us, six to eight policemen started beating us with clubs as we stood huddled, facing our apartment door, "we live here — we live here." They stood and beat us, yelling something to us which was unintelligible. We huddled against the door — Mike had the flute in one hand and the keys in his

other hand — I had my glasses in my right hand — Peggy was against the door with both Mike and I behind her. Our backs were to the police at all times, only turning our heads to explain that we lived there, Mike and I each received five blows that were visible afterwards, and when they were through beating us they immediately left the building and we got into our apartment and locked the door.

### IMMEDIATELY AFTER THE ASSAULT

For over an hour we were unable to leave our apartment to go for medical help. Mike and I were both bleeding from the head. Medics who were on hand in the building tended to our wounds as best they could with alcohol. I said we needed medical assistance. We were afraid to go out of the apartment for assistance because of what we saw going on in the streets — by lying on the floor in the living room (with the lights out) looking out the window. The police were moving up and down Gainsborough Street striking cars and the fence with their clubs as they walked along. Some of the policemen stood at the intersection of Hemenway and Gainsborough shouting remarks up to people in their apartments. I also saw them chasing a boy down the street and he was yelling "I'm leaving — I'm leaving" as he went by our window at a full run. We were afraid to go out into the street to get to our car for fear of being beaten again.

### EXTENT OF OUR INJURIES

After the streets had been empty of police for a few minutes (just over an hour from the beating) and we saw that other people were leaving for medical help; we went to our car which was parked in front of 128 Hemenway and announced we were going to the hospital. Bob Donovan of 111 Gainsborough, Apt. 1-R was brought to our car and we went to Mass. General Hospital. Emergency Mike was treated for scalp lacerations: 6 stitches on the top of his head and 3

stitches over his right eyebrow. I received 2 stitches to a cut on the back of my head. Also, Mike was beaten on the shoulders and I was beaten on both shoulder blades, the top of my thigh and my left arm. We returned home after 4:00 a.m. and then found Mike had another laceration, so sometime after 6:00 a.m. we went back to the hospital and he received 2 more stitches and a series of head x-rays. We finally got home at 9:30 a.m.

### COMPLAINT TO POLICE DEPARTMENT

We reported the above incident to the Police Complaint Dept. by phone around 6:00 a.m. and were referred to Precinct 4. We called Precinct 4 and were told that we should talk to Captain Russell who would be in at 8:00 a.m. We called back at 9:30 after returning from the hospital and were informed that Capt. Russell would not be in that day. I asked for the person in charge that day and was told it was Lt. Dow. I then spoke with Lt. Dow, attempting to explain what had happened to us. He said that he did not want to discuss this over the phone and that we should come to the station and talk with him there. We got there about noon, waiting some time to get into his office. Finally we got into his office and spoke with him. We explained in depth the above events and I asked several times to make a written statement. His reply was always "you are giving me your report". He said Sgt. Chase would come to see us to investigate this complaint. We said when and he said that day. We emphasized the fact that we wanted someone there that day so the damage to the area could be seen before it was cleaned up. He said if Sgt. Chase couldn't make it someone else would be sent. We went straight home and a couple of hours later Sgt. Scanlin (spelling?) called and told my husband he would be coming to make his investigation of our complaint on THURSDAY MORNING.

Elizabeth E. Mandel

## Car-stoning cops

It is my duty to report what I saw Sunday, May 10th. I was an eye-witness when one of the police officers dropped a brick from the roof of 97 Hemenway onto a 1969 Cutlass Olds. I also witnessed them (police) throwing stones at people who were walking on this street and also Symphony Road. I saw one police officer break a window at 70 Symphony Road, because it had a peace sign painted on it.

John Leman

wagon told us (yelling) to, "get the fuck off the street." We were chased into our apartment building. I was the last one in. As I closed and locked the door, the policemen were already at the top of the steps. There were about 3 of them (police). As I ran down the hallway to my room, heard something hit and shattered the glass on the outer door window. Entering the apartment I told every one to be quiet. We heard loud talking and laughter coming from the policemen outside. They continued, to break what was left of the glass in the

## Crashing a dorm

The morning of May 11th around 2:00 a.m. I was in the lobby of Melvin Hall and some one ran inside and screamed that the T.P.F. were coming. I ran up to my room and looked out my window. Lined up below were approximately 30 T.P.F. They stood outside looking up into the window for 5 minutes and then began throwing rocks through the windows of our dorm. They marched away after throwing the rocks.

Gary Schuen

## Taking the roofs

Several policemen of the Boston Tactical Force stormed our apartment building Sunday night. They smashed all the glass in the two front doors, came in and smashed the two windows on the first and second landings on the way up to the 4th (top) floor, entered apartment 4A, and asked where the stairs to the roof was. The man in 4A said there was no stairway from his apartment to the roof, and they knocked him down. Then they kicked in the doors to 4B (damage to door is very apparent) and also 4B's door. (We heard all of this, and saw the damages after police left).

Also I saw some of the policemen in the streets pick up bottles and throw them through windows of 115 Hemenway.

Also I saw several of the policemen walking up and down Gainsborough St. hit the sides of cars with their clubs for sound effects, causing doors in the cars.

Diane Ingraham

## Beetle beater

Early Monday morning, May 11, 1970, at about 12:45 a.m. I heard people running and shouting down Symphony Road from Hemenway St. When I looked out my window which faces Symphony Road I saw helmeted police with clubs chasing people down Symphony Road. When some of these people ran into our building the police followed and smashed two windows next to our front door in an attempt to enter the building. When the 4 or 5 policemen started to return to Hemenway Street they were yelling obscenities and one policeman charged a Volkswagen directly across from our window and, for no reason at all, tried to break some windows in the bus. There was no one in the bus or anywhere in the area of the bus. After this they continued down the street smashing apartment windows indiscriminately and continuing the yelling of obscene phrases.

Edward W. Hutchinson

## Rep. Shea commits suicide

Rep. H. James Shea from Newton was buried yesterday at the St. Joseph's Cemetery, West Roxbury.

Shea's death, last Friday, was the result of a self-inflicted bullet wound from a .38 caliber revolver.

Mrs. Anita Shea, his wife, believes that Shea's suicide was caused by overwork and dispondency about the conflict in Southeast Asia.

Rep. Shea was the sponsor of land-mark legislation designed to test the constitutionality of the Vietnam war and the powers of

the President as commander-in-chief.

The law stipulates that Massachusetts citizens do not have to fight in undeclared wars.

Shea did graduate work in law and political science at Northeastern and was an assistant political science instructor.

The representative's last public speech was at the State House rally against the invasion of Cambodia last Tuesday. At the rally Shea denounced Pres. Nixon and urged students to challenge America's foreign policy by working within the system established by the constitution.

[illegible]

## NIXON WILL BAR HOSTILE COMMENTS ON STUDENTS BY AGNEW AND OTHERS; SUMMONS 50 GOVERNORS TO MEETING

## President Sees Heads of 8 Universities— Youth Aide Quits

By ROBERT B. SEMPLE Jr.  
Special to The New York Times  
WASHINGTON, May 7 — President Nixon moved today on a variety of fronts to repair his lines of communication with the campuses amid fresh evidence of revolt against his policies within the Administration.

## An aerial photograph of a large stadium, likely the Los Angeles Memorial Coliseum, filled with a massive crowd of spectators. The baseball field is visible in the foreground, and the surrounding area includes parking lots and other structures.

WASHINGTON—President Nixon last night defended his decision to send U.S. troops into Cambodia, saying he "made a decision in the very recent past that students are protesting in the streets."

However, the President had been asked earlier whether he, in fact, wanted the invasion across the nation when he first presided, before T. Amos, who described our last night again for the benefit of "teachers" young and old, and not industrial elites.

## Bullet in Head Kills Lawmaker

The President also discussed:

- That "all Americans of all kinds and nationalities" will be withdrawn from Cambodia by the end of June
- That his decision to use American troops in Cambodia has given them no role to play

■ That in view of efforts that haven't been as strong as might be for the Communist H-10, the U.S. is including its decision not to send additional jets to

- \*1. Student graduation speaker Mrs. Edith Stein ejected.
- \*2. WNEU-am becomes WRBB (Radio Back Bay)-fm; more power.
3. Events of spring lapse as bad dream; summer classes.

## WNEU becomes WRBB--fm

If you have turned your radio dial to 560 in the past several weeks and encountered silence, you have discovered the hard way that WNEU has seemingly vanished, yet although not on the air, the situation is far from silent in the WNEU-studio complex.

Walls are being torn down, equipment modified, studios remodelled, policies formulated — all in preparation for September when WNEU will officially return to the air as WRBB, Boston's newest FM station.

### Began in 1963

The advent of WRBB is the culmination of the growth which has characterized Northeastern's radio station since it was begun in 1963. At that time, as WNEU, it operated from a small room in the basement of the old Eli Center.

When the new Student Center was completed, WNEU moved up to its present location on the fourth floor, with three-and-a-half rooms and more modern equipment.

In the following two years, the record library was expanded and two more offices were added. But the most noticeable change of all occurred in the fall of 1968 when WNEU changed its format from top-40 to progressive rock.

It was not long after this when talk of becoming an FM station started, but the preparations were not begun in earnest till last fall.

### Telegram

Finally, in the spring of this year, WNEU received a telegram from the Federal Com-

munications Commission in Washington, giving approval to construction of a ten-watt educational FM station. The trouble with this news was that the frequency assigned to the station was 91.7 megahertz, a frequency already occupied by WBRS of Brandeis.

Despite the fact that WNEU's consulting engineer proved to the FCC that its signal would in no way interfere with WBRS, a time-consuming legal battle ensued, with WBRS lodging a complaint to try to prevent having to share 91.7. The dispute continued for several months before it was resolved, and WRBB became a reality.

### Radio Back Bay

WRBB stands for Radio Back Bay. It is the intention of the staff to serve the Back Bay area with a balanced program of rock, blues, jazz, folk and public service presentations. Currently, a definite format is being decided upon by Division A Program Director Marc Cohn and Division B Program Director Rog Richard, who is, incidentally, one of three active staff members who have been with the station since its earliest stages. Tentative plans for the fall involve remote broadcasts from the Quadrangle during Freshman week.

When it's all completed, WRBB will be a far cry from the station which once broadcast in a room about the size of a broom-closet. And with a potential listening audience of over a million now available, the phrase 'just another college station' may well become as obsolete as the name WNEU.

## Exerpts from Mrs. Stein's Speech

My voice is that of thousands of students who together in new bonds, arising from perceptions which had long been suppressed, found that we held within our ranks a new breed of men and women — a breed that no longer looks without seeing, a breed that no longer listens but does not hear, a breed that no longer can be placated with gifts which flow from authorities who serve up poverty to 40 million Americans, racism to 22 million Americans and never-ending war to countless numbers of our young men.

Here we sit at a commencement which signals the end of an era spent in preparing ourselves for significant contributions to society and as we focus on this perspective we find that we must reject the tasks which this society has scheduled for us. . . .

We are not prepared to bow meekly to the military and see the young men of our class go off to kill or be killed!

We are not prepared to join the ranks of the so-called defense industry, producing weapons of sophisticated murder.

We are not prepared to participate in a consumer production—producing commodities for a market that already spells greed and glut to the rest of the world. Where six per cent of the world's population consumes 70 per cent of the world's produce.

We are not prepared to be more concerned with the "Gross National Product" than with the "Gross National Apathy."

We are not prepared to allow murder and repression to continue to tear at the content of our lives.

We are not prepared to divest ourselves of that human responsibility which education is committed to cherish — that greatest responsibility of all — the right to think and the right to question.

That is the essence of our strike! It embodies the declaration that we would not be impelled any longer to look away as more of our comrades are called to die — to look

away as more of our black brothers and sisters are victimized by growing racism — to look away when huge numbers in our city are denied the right to study in our university — to look away as we ourselves become callous and de-sensitized.

To all this we say — we are not prepared. . . .

What we have tried to do during the recent strike is primarily to impart a new belief to all people — a belief that they are not powerless — a belief that governments can be changed — a belief in the myriad of paths that may be chosen to accomplish this imposing task. . . .

To vitalize this beginning we have done more than merely protest during our strike activities. We have done more than merely say—You are doing wrong! We have helped to develop creative alternatives. We have worked together to meet the community and bring forth a people's vote on the war. We have worked together to establish workshops on The History of Viet Nam, on the Nature of Imperialism. We have directed our attention to the study of racism and its cancerous growth in our nation: We have sought to explore alternate forms of government that would allow for greater self-realization on the part of all people. We have worked together with professors to encourage new commitments among our students who suffer from defeatism and alienation. We have worked with those problems relating to their families and their teachers. We have tried to make ourselves and our concerns known to larger and larger sections of our school and community populations. For this, many of us have been isolated, rebuffed and stereotyped. . . .

We have it in our power to overcome — we have it in our power to be concerned — we have it in our power to cry out against the endless slaughter — we have it in our power to stand together and shout for all to hear — ENOUGH! WAR NO MORE!

# Hemenway Street riot study now a criminal investigation

By JOHN O'LEARY

The Boston police command structure, apparently dissatisfied with preliminary police reports, has initiated a criminal investigation of the events which took place on Hemenway Street the night of May 10.

That night, in what one Boston official called, "the worst case of police over-reaction in recent Boston history," police charged down Hemenway and Gainsborough Streets, clubbing everyone in their way; they forcibly entered several buildings, including NU dorms at 115 and 157 Hemenway and 90 The Fenway; they smashed open apartments, clubbed the residents indiscriminately and destroyed furniture and personal belongings.

Among those injured were Michael Mandel, a blind student at the Berkeley School of Music, who was attacked while trying to unlock the door to his apartment, and David Robbins, Northeastern's assistant director of housing, who was beaten while attempting to call students into the dormitories.

Police gained access to the roof of 103

Hemenway Street and pelted students with rocks, bricks and other assorted debris. They also shattered windows at 90 The Fenway.

Preliminary police reports made no mention of police entering dormitories or apartments and made no mention of injuries. However, subsequent statements taken by the Civil Liberties Union of Massachusetts, the Massachusetts Law Reform Institute, the Mayor's Office of Human Rights, and the NU News revealed many instances of forced entry, property damage and personal injury. At that point, police officials re-evaluated their data, and decided to begin a criminal investigation.

According to John Fisk, Boston Police Department legal counsel, an officer involved in a criminal investigation has the right to legal counsel and may remain silent if he chooses. Criminal charges may result, if evidence so warrants.

Fisk stated that 62 officers were involved in events at Hemenway Street and most have enlisted the services of attorneys.

There have been 78 complaints received, but as of yet, no one has brought suit.

- 4. Police ignore riot; White and McNamara rift reported.
- 5. Summer dulls student unrest.
- 6. Jobs becoming tougher to find.
- 7. Police maintain vigil over Hemenway St.

## Hemenway report issued

Police Commissioner Robert L. McNamara reported yesterday on the results of the long awaited police investigation into the events which took place on Hemenway Street on May 9-11.

He said, "I have carefully considered that the police of-

ficers involved were under extreme provocation and the fact that they had obviously been lured into position for a pre-arranged, premeditated attack. Nevertheless, in my judgement the police department investigation indicates that some of our police officers were over-zealous in carrying out their duties on this occasion, that they did not maintain their professional self-control and that they did use unnecessary force in dispersing this unlawful assembly. . . ."

"The officers themselves have denied any misconduct or mistreatment. . . ."

"The complainants and witnesses to these actions have been unable or unwilling to identify the officers involved and we have therefore been unable to proceed with criminal complaints."

## AUGUST 1970

- \*1. Prof. Sally Michael - teacher - marries Rich Gawel - student.
- 2. Pres. Knowles criticized for ignoring activism in annual report.

## Annual Report excerpts

We've had the Jazz Age of the Twenties, the Depression years of the Thirties, the War Years of the Forties, and the Silent Decade, the Fifties, The Sixties? No word presently seems more apt than violent.

It has been a violence which has manifested itself in two distinct ways — through specific acts of many misguided individuals, and through a more general mode, or pall, among many of our youth. . . . p. 6.

The general public has little sympathy for faculty members who support radical students, especially those who take over facilities and destroy property. They have no sympathy for faculty who do not support their administration, and for those who waiver back and forth in making their decisions. Faculties are not looked upon as strong leadership groups. Neither are some administrations, however, because in some instances they don't act forcefully enough. Expelling agitators from an institution, which the general public most often views as justifiable, tends to draw the sympathy of a great many so-called "middle-of-the-road" students. . . . p. 7.

College presidents now share responsibility with students and faculty in such areas as appointments, the budget, and priorities in planning. All university regulations are subject to review by student and faculty groups. . . .

In spite of all these changes and modifications in university operations, the administrator must recognize that it is he who has the final responsibility, that it is he who must answer to the public and to his governing board. Unfortunately, there are many faculty members and students who want to share the authority, but little if any of the responsibility. . . . p. 78.

What has happened to faculty attitudes? In many cases, faculty members, and particularly those who are associated with any politically oriented left-wing element, are seeking more campus control in all areas. Many devote more time to politicking and administrative matters than to research and teaching, aiming at their own election to influential faculty senates and committees. . . .

On some campuses, students want a voice regarding the teachers themselves. They want to know who the teachers are and the nature of their qualifications. They want to help select them, and, to have a hand in deciding tenure. For obvious reasons, the real campus confrontation of the future may very well be a battle for power between the students and the faculty. . . . p. 9.

Student activists are frequently aided and abetted by alienated faculty members whose policies and tactics also place them in the radical camp.

## Central ROTC headquarters favored by President Knowles

By JOHN BURTON

President Asa S. Knowles, speaking at a Faculty Senate meeting last Thursday, said that, "I would like to see in Boston, New York, Chicago, and other large cities, a central headquarter for ROTC, instead of small scattered training centers."

On July 14, 1969, a program was enacted by President Knowles in response to discussion of ROTC by students, faculty, and administrators, to recommend possible changes in ROTC at Northeastern. After more than a year of waiting, a report by the committee was established.

Most of the changes recommended by the committee have been accepted. Among these are the reduction of curriculum from 396 hours to 196 hours (plus 40 hours of d-III) and continued negotiation with the Army to seek removal of drill and weapons from the campus and the assumption of all costs for the program now carried by the University.

Perhaps part of the reason for revisions of ROTC is the fact that attitudes towards ROTC have changed. Said Knowles, "ROTC is no longer what it used to be. A few years ago 1200-1500 students was the normal number of recruits. This year 110 freshmen entered ROTC. The largest con-

dition of ROTC occurs in the South and Midwest."

Knowles' greatest concern about the program is that he sees it as a necessary part or the military, that, is to have civilian-trained officers. "I see a volunteer army resulting in many serious problems."

The discussion ended with a welcome to questions, and then passed on to the topic of "the new library."

When asked by one of the faculty members about the possibility of having one central library for the many neighboring schools in the Northeastern area, Knowles answered, "Most libraries in the area are inadequate. Northeastern's is pretty good in comparison. I'd like to see local schools pool their resources into one library. Possibly an electronic storage library, to prevent becoming outdated in ten years."

"In fact a staff of administrators just returned from California where they examined the Ampex video-tape files systems. They may change our whole concept of a library."

The meeting concluded with a brief discussion concerning the Health Services of the University.

## Vietnam hunger strike supported by Council

By CHRIS NIELSON

In an unscheduled Student Council meeting September 25, President Frank Gerry turned the meeting over to Vice President Michael Putnam and proceeded to move: "Be it resolved that 1) The Student Council supports the hunger strike of our Presidents Frank Gerry and John Hanson.

2) That the Student Council will organize an evening of fast on Friday, October 2 with the money collected to be forwarded to the National Student Association to pay the costs of the campaign to release the Saigon Student Union leaders, and that this action will hinge on negotiations with University Housing.

A third point was then added to the proposal — That Student Council make available to the student body means by which they can contact their congressmen and senators. According to Gerry, the purpose of the motion is to involve more students in the nationwide hunger strike and at the same time educate them to the less-publicized atrocities taking place in Vietnam.

The Ballroom meeting was attended by about 35 non-council members. After a seconding of the motion, Ken Simpson of the C.I.A. proposed an amendment.

The substance of the amendment was that the students giving up their meal could choose whether the money from that meal would go to either: 1) The Palestinian Red Crescent, 2) The Black Panther Defense Fund, and 3) The U.S. National Student Association.

Discussion on the amendment proceeded and although there was general agreement that all programs were of great importance to universal solidarity, it was decided that whatever funds were received would be spread so thin as to render the program ineffective.

## Letters to the Editor

### Journalism Department attacked

An Open Letter To:  
President Asa S. Knowles;  
The College of Liberal Arts;  
The Northeastern NEWS;  
The Journalism Dept.;  
The NU Community-at-large;

With this letter I ask for the total cessation of whatever support Northeastern University gives the organization known as the Journalism Department (JD). This Department must be revamped entirely or should be dropped immediately from the university. The JD is irrelevant to anything that approximates learning and has been cheating students of not only a proper 1970 journalism education but also of grades they obtain under adverse conditions.

Dividing tuition costs in a per/class ratio I have paid more than \$600 for four JD courses and have received about \$50 in knowledge; which becomes less when the frustration, boredom and unethical grading methods are subtracted from that figure.

Examples of JD grading and ethics.

(1) In the fall of '68 Mr. Azer taught my course in Journalism. During the course we had regu-

lar homework and quiz assignments and a final exam. Going into the final my average was B for homework and B for quizzes. Included in the homework grade was supposedly five A-grades (counting double) for stories that were done from scratch. (Meaning instead of writing from notes given by teacher, students wrote their own notes on movies and speakers.)

Just before the final I was told my homework grade would be dropped to C because I had cut five classes, two over the allowed three, and was being penalized. I received a C+ as my final grade. The exam mark was never disclosed.

I was penalized for not going to a class which the instructor could not make interesting or relevant. I do not remember one good question being asked or discussed in three months. (The attendance-taking trick and daily homework assignments are the usual ploy of those who cannot draw students to class on their own or the course's merit.)

(2) In the spring of '69 Mr. Quarrington taught my second JD class. During the term we

*Because of the large number of Letters to the Editor the NEWS receives, we cannot insure that each will be printed, although every effort will be made to do so. We therefore ask that all letters run no longer than 200 words and that they be typewritten, preferably triple-spaced. Unsigned letters, and letters without a class number or title of the writer will not be printed.*

did 18 stories for homework and quizzes. The coding to this class was more ludicrous than the Azer class. I received two A's, 14 B's and 4 C's. A female member of the class did about 12 of those assignments and got an even number of B's and C's. She had had three months co-op experience on newspapers and by then I had had 15 months. The final exam was rewriting stories and the grades were never available as co-op began again. The final grade, however, was a C. The girl received a B.

(3) In the winter of '69 I had Quarrington again. By the end of three months I received about

the same grades as the spring. The girl also received the same grades. I was the only person to finish the final, which was again doing stories as we had all year. I finally received a B, she also received a B for a final grade. Exam marks were not given out because of co-op. The final exam is doing the same work as for the three-month period, but obviously if you do not do well marks go down and three months' work mean nothing.

(4) This past term, summer '70, both Azer and Quarrington taught half a course. In Azer's class I received six A's, a B+ was not an A because he made a mistake correcting against my favor and I did not get it changed. I was not going to allow his stupidity to bother me for one grade. The C was because I did not bring a dictionary to class for a quiz and could not correct words, though leaving a note saying the words were wrong.

During each class the students pointed out corrections that were, in fact, incorrect in themselves. The incorrect corrections bring to mind the point of how final exam grades lower term grades. With students not around to argue, ineptness prevails and students are robbed of grades to satisfy curves. If any student does manage to come in from co-op he is given the run-around. The entire JD grading system is based on the judgment of people who are wrong every day of the term.

(5) Chairman George Speers (of JD) showed his interest in the students during the winter term when he cut six straight classes to attend the NEPA convention. He did not tell the students he was not coming to class and they went every day. With Speers working for NEPA and Quarrington working for the Herald the JD has one full-time instructor and his background in journalism, aside from the NU News is nearly nil.

(6) All the courses in JD are

now related to newspapers. Could the reason for this be the fact that the JD is really run by the New England Press Assn. and not NU? The students learn newspaper styles, the students get newspaper jobs, usually for low pay, and the worst work. JD Chairman Speers says he does not want technical courses in the undergrad program. That is technical courses in TV, radio, and magazines; but newspaper technical courses are fine. Is that because these three men know only newspaper work or is it because NEPA runs the show? Which ever it is the students suffer.

These nine episodes concerning the JD are nothing in comparison to the daily frustration of horrible JD classes. The trivial assignments handed out are incredible considering the fact that the journalistic field is now one of the most interesting and surely controversial, but these men do not have the equipment to handle anything interesting. With the many books being written about the media, the NU JD prisoner gets a steady diet of *How to Report* and *Assignment Jonesville*. The only discussion in class is when a professor errors in correcting, which is often. The JD lives in 1955 and the students pay 1970 prices.

The JD has robbed me of two grades, several smaller grades, and \$500 in tuition. Also there is the fact that I could have taken four educational courses, which I will personally try to make other students do, if I know they are going to be J majors. If no students are enrolled in the JD program there will be no use for the JD.

I am asking for the immediate resignation of the entire JD and I ask the University to take over the department, knowing full well this may be a "frying pan to fire" suggestion. With the JD functioning the way it does, chances like this must be taken.

Richard B. Tourangeau (71LA)

### Something new - a Christmas boycott

To the editor:

We see as hypocrisy the extravagant celebration of Christmas when there is no peace on earth. So our group feels it is time for a Christmas boycott. We are not going to buy presents this year, nor are we going to receive them. We will do without decorations, and may be fasting on Christmas day instead of feasting.

Instead of spending, we will work for peace on earth by giving our money to help make amends for the suffering we have caused - such as by financially adopting a Vietnamese child, and

by giving our time to stop the war. We are calling for people to put peace back in Christmas - what better way to observe the birth of Christ than to bring an end to the war this year?

We are counting on college groups to do most of the local work. Here are some possible approaches for organizing the boycott:

1. Contact local clergy - many should be receptive to taking commercialism out of Christmas and putting peace back in.
2. Organize picket lines at department stores and shopping centers.
3. Do guerrilla theater on the

sidewalk in front of large stores. Dramatize the horrors of war or the contradictions in the thinking of the military.

4. Leaflet at high schools, train stations, churches and shopping centers.

5. Urge fellow students not to go home for vacation unless their parents agree to participate in the boycott.

We would welcome any criticisms and suggestions readers might have of this proposal.

Westport Citizens for Peace  
P.O. Box 207  
Saugateck Station  
Westport, Conn. 06880

I guess I came to Northeastern for the same reasons as most other kids: pressures - from family in becoming their status symbol and from society to get a good job. I don't think too many kids come to really learn.

In my freshman year I found out high school hadn't prepared me and the first semester was bad. I hadn't learned how to study. Then I found the technique - react. I came to see that it was a passive intellectual atmosphere and curriculum at Northeastern. No one challenges you. There are few papers; tests are usually multiple guess. You find out how to study and answer in a certain way.

Sophomore year was the biggest learning experience of my college career. Taking a course in Anthropology and Sociology, I came to a broader view and understanding of things. I began to appreciate different ideas, other cultures, other people. Also, I made Boston my environment instead of just Northeastern. I discovered bookstores, Harvard and M.I.T. and began to drop in on classes and lectures there.

I began to become very alienated from my courses in school. Besides the irrelevance of the tests and the instructors' from-the-book lectures, I saw one philosophy being confined to - American Capitalistic Economics. Business taught quantity and not quality, production of goods measured in dollars and not value. An oil spill off the coast of California was bad because it's a fiscal loss and not because it spoils beaches.

Co-op left me with ambivalent feelings. Working on a contract for the Harvard Graduate School of Education, I was involved in a project analyzing the Boston school system. Despite a responsible job, exciting work, and the credit by having my name appear on a finished report, I still felt treated like a menial laborer. I think co-op does that. Somewhere along the line the philosophy gets the employer, the

administrator and the student thinking of it as beneficial job training instead of the student being looked on as a valuable asset to the company.

The wrongs of the education system alienated me even more as I went along in school. The American Educational System, American Society, the American Theory of Economics. It made me want to break out of the system where grade superiority and benefits - like cars and homes and money - spur a people on more than learning or contributing back to society. The promise of all the benefits in the future, is a control mechanism that keeps a person in the system. It doesn't make sense to me anymore, I'm trying to get away from it.

I've gotten into Urban Studies. There's no money in it. Just a lot of people that need help. I found out that half of the children that enter the Boston school system don't graduate, and that the half that doesn't is determined by the economic weakness of the child's family structure. This keeps the Chain of Poverty going round and round. I'm not going to make more money getting more kids graduated from high school, but I'm going to profit more, and it's going to be worth more to me.

I've come to feel "out of it" in the university - where a specialized building that 15 or 20 graduate students will use draws a higher priority than a library, where kids stick together on big political issues but never question the whole system, and wind up taking care of themselves first. The college diplomas we receive are like the peace or ecology buttons - a symbol for something not worked hard at or worth much. People wearing peace buttons drive their cars in the city in rush hour, helping to kill the ecology. Most people taking diplomas make it just a piece of paper because they don't care about learning, or changing the system for the better through learning.

## Mayoralty returns to NU

By VALERIE THERRIEN

The Mayor of Huntington Avenue Campaign will be returning to Northeastern this year after a one-year absence. The contest to see who will become the unofficial spirit leader at NU will be held during the week of October 19.

The two candidates this year are Nate Weiner, who will be running as Rubber Dicky, and Albert Thomas as the Suntan Kid.

Weiner is a middler majoring in electrical engineering and makes his home in Canton. He is being sponsored by the NU Band.

He said he chose the theme, Rubber Dicky "for its obvious political implications" but added, "Rubber Ducky" (Sesame Street version) is my favorite song."

Weiner has participated in quite a few campaigns since he came to Northeastern. "I actively supported the Sterile Fagnew campaign for Mr. Husky last winter and also worked for Herb Acid for Mayor in the fall of '68," he said.

"I've been a member of the band for

the last three years and I usually go to all the football games and as many hockey and basketball games as I can."

"NU is my school and I believe it's important to support its activities whenever possible. It's nice to be politically active, but not to the exclusion of everything." He also added that as mayor he would make an effort to be at every game.

Weiner also believes that the band has more spirit than any other organization on campus. "We've been to every football game since I've been here and at least 80 per cent of the hockey and basketball games.

"I've been involved in a lot of activities here and I've come to the conclusion that the world isn't going to end if we don't have a mayoralty race, but I think that it's probably the most entertaining aspects of NU campus life. Farp to everyone!"

Weiner's rival for the office is Albie Thomas, a sophomore education major, whose last stage appearance was Fresh-

# Sochacki bans four students

By JOHN O'LEARY

As a result of the unauthorized use of the lounge area of the Student Center for an Anti-ROTC rally on Tuesday of Freshman Orientation Week, Director of the Student Center Richard Sochacki revoked the Student Center privileges of four Northeastern students. The students, Andy and Phil McGee, Ken Simpson, and Jeff Winbounne were notified in a recent letter that they will be unable to reserve rooms, use literature tables or student printing facilities for an indefinite period.

According to Sochacki the demonstration constituted "Open defiance of the rules of propriety and good manners . . . and as a consequence of your actions it is obvious that further cooperation with you is impossible."

During the third week of the summer term a committee was formed for the purpose of opposing ROTC presence on the Northeastern campus. The Anti-ROTC Committee, which became a sub-committee of the Freshman Orientation Board, requested permission to hold a rally in quadrangle during the week of freshman orientation.

According to McGee, "Dean Kennedy expressed some opposition but finally agreed to allow the rally."

Gary Melnick, chairman of the Freshman Orientation Board, said "During several subsequent meetings with Dean Kennedy, he expressed opposition to our use of the quadrangle, and asked us if we might not be able to use some other area, but he never outright denied us the use of the quad."

Recognition of the rally appeared in the freshman issue of "Northeastern Today", a

newspaper published by the Northeastern University Press Bureau, and on the FOB schedule, both of which were available to Dean Kennedy.

The day before the rally, Andy McGee asked Dean Kennedy for permission to leaflet the Student Center to advertise the rally. Dean Kennedy granted him permission.

On the same afternoon McGee discovered difficulties with the sound system which they had intended to use. When he asked Dean Vetstein for permission to use the school's sound system he was allegedly

## Knowles raps on campus report

## Camejo guilty of trespassing

By STEVE LIPOFSKY

Peter Camejo, Socialist Workers Party candidate for senator, was found guilty Wednesday of trespassing on the NU Quad.

Charges stemmed from a Socialist Workers Party rally last Thursday during which Camejo was dragged from the podium and arrested.

Defense based its case on the fact that the NU Quad is open to public access and has always been considered a free speech area. They claimed Camejo's rights had been violated under the First Amendment.

The university contended that the defendant did not get permission previous to the rally, and further, did not leave after being told to do so.

Camejo was defended at no charge by Joe Remcho of Remcho and Remcho of Central Square, a law firm that handles civil rights and other cases for nominal fees.

The first prosecution witness was Sgt. McCall of the Campus Police. He testified that upon arrival at the rally he was told by Assistant Dean of Student Activities Richard Sochacki to have

Camejo removed. But because of what the Sergeant called "the possibility of an incident" (since the crowd was "quite worked up") for the Boston police.

Next Sgt. Mike Camerato was called. He testified that he was called in by the Campus Police and arrested Camejo shortly after he arrived on the scene. Camerato also commented on the ugliness of the crowd and implied, as did McCall, that Camejo was trying to incite a riot.

Then defense introduced five pictures showing the arrest of Camejo and the calm nature of the crowd before and during the police action. The judge said he felt the condition of the crowd was irrelevant.

Then Camejo took the stand. He stated that he had understood

the Quad to be a free speech area. He said he had purposely chosen the time so that it would not disrupt any university activity, as students were on break during these hours. He spoke a little about how difficult it was to campaign if one was a SWP candidate and not a Ted Kennedy or a Si Spaulding.

The defense tried for a dismissal, citing a 1968 Supreme Court case in which it was ruled that a shopping center parking lot was fair game for free speech by candidates.

After Remcho finished, the judge asked Camejo to enter a plea. After a short conference with his lawyer, Camejo pleaded guilty. The judge so ruled and gave no fine or sentence.

# Bomb threats plague campus

By JACK GOLDBERG

In response to the bomb threats which have swept over the campus in the past two weeks, President Asa S. Knowes, has set forth a new set of guidelines to be followed in the event of future bomb scares. The president's memorandum includes the following three procedures:

"1—When a call is received, a conscientious search of any threatened building will be made by the University Security Force. They, in turn, will normally call for assistance from the Bomb Squad of the Boston Police Department whenever there is a serious bomb threat.

"2—As soon as a call is received, signs will be posted at all building entrances as follows: THE UNIVERSITY HAS BEEN NOTIFIED THAT SOMEONE CLAIMS THERE IS A BOMB OR INCENDIARY DEVICE IN THIS BUILDING. ALL PERSONS ENTERING AND OCCUPYING THESE PREMISES ARE WARNED THAT THEY DO SO AT THEIR OWN RISK.

"3—Persons who are occupying a building at a time when a bomb threat is received will similarly be notified promptly, as follows: THE UNI-

VERSITY HAS BEEN NOTIFIED THAT SOMEONE CLAIMS THERE IS A BOMB OR INCENDIARY DEVICE IN THIS BUILDING.

"A SEARCH IS NOW BEING CONDUCTED BY MEMBERS OF THE CAMPUS POLICE WITH ASSISTANCE FROM THE BOMB SQUAD OF THE BOSTON POLICE DEPARTMENT. ALL OCCUPANTS OF THE BUILDING ARE WARNED THAT IT MAY BE HAZARDOUS TO REMAIN IN THE BUILDING. ANY PERSONS WHO REMAIN IN THE BUILDING DO SO AT THEIR OWN RISK.

"Students will not be penalized for classes missed because of a bomb threat. Faculty are urged to make special efforts to help students make up missed materials.

There have been 28 threats between October 9 and October 27. Every building in the university complex, at least once has been threatened with the exception of the student center, the Greenleaf Building, Boston-Bouve and the Dana Building.

Roy Lynch, Chief of Campus Police said, "There is more than one person making the calls. There are many male and female voices. Some of the

# Drug overdose kills Janis Joplin

Janis Joplin

Reuters

HOLLYWOOD, Calif. — Janis Joplin, who rose to rock singing stardom belting out soul music and clutching a bottle of whisky, died here last night of an apparent overdose of drugs.

The body of the 27-year-old Miss Joplin was found in her Hollywood apartment at about 10 p.m. PDT by a friend, police said. Police did not identify the friend.

Her body was taken to the county coroner's office where authorities said an autopsy would be performed later today.

Police at the scene tentatively fixed the cause of death as an overdose of drugs.

Miss Joplin reached fame as a member of the Big Brother and the Holding Company group.

A Texan, she was so popular that she went out on her own with the Big Brother company giving her musical support.

She was one of the biggest hits at the now-famous Woodstock rock festival.

Her uninhibited, screaming, wailing style made her a top pop singer.

Police reported finding fresh needle marks on her arms.

"It didn't look like foul play," an ambulance attendant said. "It looked like she had just fallen over."

Miss Joplin, who lived in Larkspur, north of San Francisco, had been here since Aug. 24 to record for Columbia Records with the Full Tilt Boogie rock group, police said.

Miss Joplin became a star after appearing at the 1967 Monterey International Pop Festival, where she sang *Bull and Chain*, a blues classic. She was appearing then with Big Brother and the Holding Company.

She told an interviewer once of her style: "It's all feeling. When I'm singing I'm not thinking."

She admitted to being a heavy bourbon whisky drinker, often drinking during performances. When asked whether her all-out performances might cut her career short, she answered: "Maybe I won't last as long as other singers, but I think you can destroy your now by worrying about tomorrow."

Among the songs for which she was best known are *Maybe*, *Work Me, Lord*, *Little Girl Blue*, *One Good Man*, *Try*, *Kozmic Blues*, *I Need a Man to Love*, *Turtle Blues* and *Piece of My Heart*.

Miss Joplin let her long brown-blond hair fall uncombed and often wore floppy hats, beads, bell-bottom slacks and hippie-like clothing. She said she was not a hippie but a beatnik. "Beatniks believe things aren't going to get any better and say the hell with it, stay stoned and have a good time."

12. New England Conservatory in financial trouble.
13. Women's groups plan films, speakers.
14. Coop study to be initiated.
- \* 15. Track season: highlighted by vaulter Carisella.
- \* 16. Commencement speaker list drawn up.

## Sochacki and SCC clash over proposed constitution

By JACK GOLDBERG

This term, the Student Center Committee is embarking on a program to assume more responsibility and decision-making powers in the running of the Ell Center. Although this action was originally supported by Richard Sochacki, assistant dean of student affairs and director of the Ell Student Center, there is now an argument over exactly how much power the committee should assume.

When the Ell Center was opened in the Fall of 1965, the Student Center Committee was formed as an advisory committee to assist the dean. It is made up of representatives of 20 different campus organizations. When Sochacki took over as director of the center, he attempted to give the committee more responsibility in running the building.

Regarding this Sochacki said, "At the outset they did not want the additional power above their advisory duties. They now feel they should have carte blanche over decision making. I did not agree with the first view and I cannot agree with the second. They would like power that neither President Knowles or I enjoy. I still hope for a greater sharing of responsibility. I would like to be a facilitator of the committee, to enhance student power but instead I find myself in the role of babysitter."

The chairman of the Student Center Committee, Jeff Gren 71BA, said, "The SCC originally started as an advisory committee to the director of the Student Center when it was established. Since Dean Sochacki became director, he urged us to take a more active role in regard to decision making. Recently when we started to do this we have encountered some opposition. It is my feeling that the SCC is a responsible committee and should be able to make decisions concerning this building."

The Student Center Committee is presently drawing up a constitution which will make clear their proposed new duties.

## Buddy Miles concert to help Panther Defense Fund

The Student Council decided to sponsor a concert by Buddy Miles, the proceeds of which will go to the Black Panther Defense Fund.

The concert was proposed by a former Northeastern student, David Smith who added that Miles offered to perform free so that all of the proceeds could go to Ericka Huggins and Bobby Seale, presently on trial in New Haven on murder charges.

John Hanson 72LA, president of the student council, said, "The tentative date for the concert is February 11. We have had no hassles with the administration so far concerning the use of Alumni Auditorium for the concert. We mainly have a logistical problem. We have to make sure the NU Band will not be using the auditorium on that day. They have always been very good about things like that. We also have to have confirmation regarding whether or not Miles can make it on that day."

Details on the time and tickets will be given at a later time when the date is finalized.

## Officials cancel Miles concert

By MAXINE LIEBERMAN

In meeting Wednesday between Student Council President John Hanson 72LA and Richard Sochacki, assistant dean of students, it was announced that the administration would not allow the proposed Buddy Miles concert to be held. Miles had offered his performance free so that all money collected could be donated to the Black Panther Defense Fund.

"There were a lot of reasons for this decision but they all boil down to one main reason. No matter what stand the university takes on this, it will be a political stand. It's an area the administration thinks is too highly controversial to be involved in either a pro or con stand," explained Sochacki at a Student Council meeting Wednesday night.

Hanson asked if the real objection to the concert was that the money will be going to the Panthers. Sochacki replied that "No matter what occurred it would alienate part of the students."

According to Sochacki, the decision was made by Deans Gilbert MacDonald and Christopher Ken-

nedy after an unidentified alumnus complained about the proposed program. President Asa S. Knowles was not included in the meeting but was aware of the decision, Sochacki said.

Hanson tried to obtain the name of the alumnus but was informed by Sochacki that the name was being held in confidence.

When contacted at his home later Sochacki elaborated, "the auditorium is a special area. The Student Handbook points out that it is a special area that cannot just be used for anything. The deans in student affairs feel that this decision is in the interest of the entire community."

The Student Council asked for a written statement of the decision and the reasons behind it from Sochacki and MacDonald, who agreed to the request.

Student Council will also ask the Student Center committee to give them permission to use the Ballroom for the purpose of holding the concert. Corresponding Secretary Vinnie Milaiko 71BA, said, "This is an important motion and we will try again."

## Officials remain adamant in Panther music dispute

By JOANNE McMAHON

After further argument between the Student Council and the administration this week, the proposed Buddy Miles concert in support of the Black Panther Defense Fund remained officially banned from campus.

The concert proposal had been cancelled by Deans Christopher Kennedy and Gilbert MacDonald last week.

In a formal statement issued earlier this week to the Student Council, Richard Sochacki, assistant dean of students, made it clear that the university would not allow the use of its facilities for a fund raising drive for an outside organization. "There is a great measure of difference be-

twined with the administration's reply, Student Council held a meeting with Gilbert MacDonald, vice-president for student affairs, Wednesday to comment on university policy on campus speakers. MacDonald answered by reading from a section of the student handbook entitled "Joint Statement of Rights and Freedoms of Students."

MacDonald called the joint statement "a document we try to live by in the university," but denied that it gave students the right to "involve the university in political fund raising."

Upon reaching this impasse, Council President John Hanson 72LA stated that "There are very good reasons to say that the university has violated the rights of students as outlined in the handbook" in speaking with Student Council's lawyer Wednesday afternoon. Hanson was told that the administration's stand against the fund raising drive seemed in contradiction with the "Joint Statement" and that possibly a breach of contract suit against the university was in order.

The following points were quoted by council from the "Joint Statement" to back their viewpoint:

(Continued on Page 4)

Next week

between allowing individuals of differing political philosophies an opportunity to speak to interested student groups and the sponsorship of fund raising programs for an outside political organization in a university facility," he explained. (See the full text of Sochacki's statement on page 4.)

## Financial difficulties bar day care center

By VALERIE THERRIEN

Chances for the establishment of a day care center at Northeastern are slim. Only 25 members of the faculty and staff responded to a questionnaire and financial resources are nonexistent.

According to Loring Thompson, vice president and dean of planning, there is practically no way to fund the proposed center. "Funds couldn't be taken from any professor's salaries to pay for the center," he said. "Even with a donor who would cover all costs, the red tape and licensing would take until September before the center could open."

Thompson estimates that the total operating costs of the cen-

ter would also need adults working everyday, without frequent personnel turnovers, thereby eliminating the possibility of using daily volunteers or coop students.

According to the Office of University Planning, the proposed center might be used as a laboratory for courses related to children and child care given by various departments in the university. Priority for enrollment of children would go to Northeastern parents, but children from the surrounding community might also be enrolled. Although few students have children, numerous members of the faculty and staff could use the center.

## Commencement speaker proposals to be prepared for trustee board

By JIM KELLY

A joint meeting of the Adult Student and Senior Class Councils will be held Sunday, February 7 at 2 p.m. to decide on a final list of commencement speakers for presentation to the Board of Trustees. The present slate of speakers, which was drawn up by Division B Senior Class Council, is expected to be amended.

The list includes Charles Garry, and William Kunstler, controversial defense lawyers for the Chicago Eight, union leader Cesar Chavez, and civil rights spokesmen Julian Bond, Coretta King and Ralph Abernathy. Also mentioned were anti-war activist and famed pediatrician Benjamin Spock, lawyer-author Ralph Nader, Senator George McGovern (D.S.D.), Supreme Court Justice William Douglas and Canadian Premier Pierre Trudeau.

According to Steve Goldberg, 71ChE, president of the Senior Class Council, most of those on the list will be unacceptable to the trustees. "While Knowles didn't come right out and say it, he gave me every indication that eight out of the entire list would probably be unacceptable to the trustees," said Goldberg.

He added that some would be rejected because they have already appeared on campus in other speaking engagements.

Massachusetts state law requires that the final authority to grant degrees be invested in the Board of Trustees. Since the university confers honorary degrees upon non-student graduation speakers, the final decision concerning them rests with the trustees. "As seniors," commented Dave Johnson 71BA, chairman of the Senior Commencement Committee, "we

can only suggest who we would like to have."

It was the senior's limited role to suggest a speaker which came under heavy criticism last June. Commencement exercises were disrupted then when a group attempted to present a student spokesman, Mrs. Edith Stein. Although she was not allowed to address the convocation, the question of having a student speaker was consequently raised.

While a student speaker is still a matter for discussion, Goldberg feels that the problems involved in choosing a spokesman would be insurmountable. "It would be very difficult," he stated, "to pick someone who would represent the entire graduating class."

The meeting is tentatively scheduled for 174EC and is open to all interested members of the NU community.

## JANUARY 1971

- \* 1. Fathers Berrigan jailed in suspected conspiracy.
- 2. J. Edgar Hoover angered by Clark's book on FBI.
- \* 3. Colts get Super Bowl from Cowboys, 16-13, in fiasco.
- \* 4. Plight of Soviet Jews, JDL, USSR diplomats arises.
- 5. Notre Dame upsets Texas winning streak of 30; 24-11.
- 6. Cigarette commercials now void from TV.
- 7. Ali-Frazier fight weigh-in nearly starts fight.
- 8. Hot pants shorts look like newest fashion style.
- 9. "Love Story" movie making money as book did.
- 10. Communications gap on invasion of Laos by S. Vietnam.
- 11. Studies done on possible upcoming quakes in California.
- 12. Poland gets new regime under Gierke; economics priority.
- 13. Nixon does "Conversation with the President" on TV.
- 14. Spencer Haywood jumps from ABA to NBA; court battles seen.
- 15. Vice-president calmed by White House as New Congress opens.
- 16. Northern Ireland erupts after accidental deaths.
- 17. Postal and phone strike in Britain closes communications.
- 18. Steel companies ask 12% and get the 6% they really want.
- 19. More oil slicks off California coast, people clean birds.
- 20. Cambodia falling to VC as S. Vietnam tries to fight all fronts.
- 21. New racial policies begin Georgia's new governor's term.
- 22. Nixon State of the Union message hardly grasps the state.
- 23. Derek Bok becomes president of Harvard.
- 24. Common Cause consumer group gaining strength.
- 25. Willy Brandt wins praise for unification attempts.
- 26. Welfare heating up in turmoil of inadequacy.

## FEBRUARY 1971

1. Stephanie Fong elected Winter Carnival Queen.
2. Student-taught racism course given full status.
3. Nixon's Laos tactics bring march, some trashing to school.
4. Bernadette Devlin is DSS speaker.
5. NU NEWS supplement lampoons right and left.

## FEBRUARY 1971

- \* 1. Invasion of Laos, secrecy; boggles American minds.
2. Apollo 14 moon-landing with Shepard, Roosa, Mitchell.
3. Los Angeles earthquake kills 64, millions in damage.
4. Rolls-Royce near bankruptcy as Lockheed fails to pay.
5. Nixon thinks about construction price controls.
6. Detergents losing phosphates in ecology move.
7. Patriots get Jim Plunkett in football draft.
8. Angry farmers bring cow to Common Market office.
9. Business looks at possibility of four-day week.
10. Mid-East peace plans up and down as truce runs out.
11. Hendrix-Joplin records put out for fans.
12. Medical research finds new way to treat burns.
13. Children turning in pot smokers because of drug propaganda.
14. I. F. Stone publishes "Polemics and Prophecies."
15. Industry finds boom in the waterbed craze.
16. N. Ireland becomes children's war against British troops.
17. Cleaver jails Tim Leary in Algiers.
18. Convictions handed down for Manson crew.
19. US choppers losing Laos battle in air combat.
20. Hearings held on military spying of civilians for records.
21. Spiro Agnew bops three more people at golf match.
22. J. C. Penny 95, store-owner; Sen. Richard Russell 73, die.
23. Charles Sonny Liston 38, fighter; Larry Burrows 44, photographer; die.
24. Coco Chanel 87, fashion model; Charley Ruggles 84, actor; die.
- \* 25. Beatles finally split, personality-money breaks up THE group.
26. CBS runs "Selling of Pentagon."

## PRESIDENT'S MESSAGE TO THE CLASS OF 1971

The Class of 1971 is a unique class in academic history. Your college years have been spent in the midst of one of the most exciting and challenging periods of higher education. You have been students at a time when the campus became a focal point of social revolution. Upheavals have occurred in all forms of our social structure - the church, the military, the government, science and the humanities.

Man and his institutions have developed an increased social awareness and a heightened sense of social responsibility. Minority beliefs and values have assumed greater importance. Humanitarian considerations have taken precedence over scientific accomplishments.

Institutional responsibility has switched from an emphasis on parietals to a concern with relevancy and community involvement. And social issues have become campus issues.

As participants and observers in this process, you have had a great educational venture. Now you are preparing to enter the mainstream of American life. You have had the most pragmatic preparation of any college generation.

Asa S. Knowles

### MARCH 1971

1. Divisions A and B seniors reunited for first time since 1967.
2. Film series brings top-flight movies to big audiences.
3. Everett Nau resigns as president of Senior Class.

### APRIL 1971

1. Financial problems plague DSS series.
2. Trustees decide against having commencement speaker.
3. Knowles calls commencement a "trustees affair."
4. Peter Lance co-produces film for American Dream Machine series.
5. Knowles and Dean MacDonald hear mass meeting of seniors call for commencement speaker.
6. Howdy Doody and Buffalo Bob make a comeback in Boston.
7. T.V. news course offered by Journalism Department.
8. Plans released for month-long anti-war offensive.
9. Shea and Chaisson chosen hoop and ice MVP's.
10. Board of Trustees reverse commencement speaker stand.
11. F. Lee Bailey speaks for Dss on My Lai trial.
12. Sensational "Killing of Sister George" put on by Silver Masque.
13. Student Council re-organizes executive board.
14. B.S. degree approved for College of Liberal Arts.
15. Boston colleges dissolve YAF.
16. NU Band changes symbol: no more boomerang.
17. Hundreds at NU take part in April 24 moratorium in Washington.

### MAY 1971

1. Most NU people escape arrest in May Day and JFK demonstrations.
2. Senior class gift to go to survivors of Peterboro St. fire.
3. Hemenway St. again swept by police.
4. Crew disappoints: fails to make finals in Eastern Sprints.
5. First five-year nurses to graduate in June.
6. Prof. Sally Michael Gawel resigns from Philosophy Dept.
7. And that's the way it was, Tuesday, May 11, the sun came out.

### JUNE 1971

1. Commencement - June 20, 1971.

## MARCH 1971

1. Joe Frazier is unanimous-decision winner over Muhammed Ali in \$20 million "fight of the Century."
2. Lt. William Calley testifies before court-marshal.
3. Fifty tornadoes rip Mississippi, kill 100 - vast damage.
4. East and West Pakistan battle for political control.
5. Explosion in Capitol Building stirs fear and disgust.
6. Blackout of fight broadcast irks sportsmen, laws sought.
7. Joe Namath says before-game sex is okay for athletes.
8. Agnew visits Boston, attacks CBS for "Pentagon"; outside demonstrators battle police.
9. CBS re-runs "Selling of the Pentagon," show wins award.
10. Panther leaders Cleaver and Newton split party.
11. 52 Peterboro St. burns leaving eight dead; beginning of attacks and articles on Maurice Gordon.
12. Monroe, Mich.'s "Billboard Bandit" joins the "Fox".
13. Whitney Young Jr., 49, of National Urban League and horsefaced French movie-star Fernandel, 67, die.

## APRIL 1971

1. Nixon's SST shot down in Senate vote - 51-46.
2. Lt. Calley convicted of murder; nationwide demonstrations stir Nixon to "good guy" release action.
3. Henry Aaron blasts 600th homer in Atlanta.
4. Boston white and black high-schoolers, police, school committee battle over education-politics of city. Strike lasts days.
5. Hardhats reject pay-cut "for good of the country."
6. Bruins set 35 records to win NHL, score 399 goals only to lose to Canadiens in seventh game 4-2 in first round.
7. Knicks' dynasty halted at one year by Bullets 93-91.
8. French women C. Deneuve, J. Moreau, S. deBeauvoir sign "legalize abortion" papers; say they've had the operation.
9. Manson and group sentenced to gas-chamber.
10. Ecologists argue facts behind garbage dumping in ocean.
11. US Ping-Pong team visits China in epic move toward better relations with Mao; Agnew against trip.
12. Frank Sinatra retires from show business, receives awards.
13. 200,000 people gather in Washington for 4/24 march; peaceful protest meritorious but no anti-war progress.
14. Vietnam veterans do "search-destroy missions in Washington to dramatize war life; John Kerry emerges as leader.
15. Second Earth Day attracts less press.
16. George C. Scott wins Oscar award for "Patton", refuses it.
17. Milwaukee Bucks (Lew-Oscar) win NBA title 118-106.
18. J. Edgar Hoover's bugging FBI-forces fight off criticism.
19. Soviets launch first parts for space station.
20. US' friendly dictator Haiti's Papa Doc Duvalier dies at 64.

## MAY 1971

1. 12,000 arrested in Washington during May Day protests.
2. School-busing decision by Burger court irks Nixon.
3. 25,000 protest peacefully in Boston.
4. Arrests at JFK Building spur "brutality" charges.
5. Ky to battle Thieu for Saigon presidency.
6. Sports Huddle show to leave WBZ air-waves.
7. AMTRACK train service begins on east coast.
8. Petition started for small-breasted women's beauty.
9. Canadiens \_\_\_\_\_ Blackhawks in \_\_\_\_\_ games in Stanley Cup. (fill in)
10. Beatles group are officially split by London court.

I have died in Vietnam but I have walked the face of the moon. I have befouled the waters and tainted the air of a magnificent land. But I have made it safe from disease. I have divided schools with my prejudice. But I have sent armies to unite them. I am ashamed.  
But I am proud.  
I am an American.

Lorraine M. Adamski, Niantic, Conn. Math  
Vietnam, Kent State, and Woodstock suggest that feeling is more widespread than thinking. Progress will be made only when man realizes that action must proceed from thought.

David M. Alessandri, Mansfield, Mass. Acct.  
The past five years can be characterized as a period of student unrest. Conformity in the collegiate world has been surpassed by a desire for individuality. The assertion of individuality involves the questioning of the purpose and goal of society. Although this questioning has led to demonstration and violence, I feel assured that society is the benefactor through the awakening power these events have created.

Stacey E. Alsfeld, Barrington, R.I. Management  
It is, obviously, impossible to characterize the past half-decade in a few words. There have been so many changes; or maybe it's me that's changed.  
Our school, our nation, our world has numerous problems. However, the voices of youth have brought awareness. Things and ideas are changing, slowly, but for the better.

Edward P. Ambrogie, Natick, Mass. Electrical Eng.  
In the past five years young people have discovered that they can be an effective force in stimulating social and political reform.

Howard D. Anderson, Warwick R.I. Electrical Eng.  
For the last half decade we have been told that the world will soon be unfit to live in.  
Half out of fear, and half out of selfishness, we should use our careers as tools to change this prediction.

Roger H. Anderson, Auburn, Mass. Economics  
1966-1971—A time enlightened by constructive controversy; But deformed by cheap rhetoric and half-truths. 1971-?—Language is our door to truth and to survival. Conscious expression is our key to that door. Will our key fit?

Richard E. Andreotti, Milford, Mass. Electrical Eng.  
The past half-decade within the university has proven prosperous in the academics but has demonstrated that life, man, and peace are equally important.

Peter Ansara, Lighthouse Pt. Fla. Engineering

When a small minority of radicals can close schools and cause violent demonstrations a country is weakened. Belief in what is right or wrong politically is an important one, especially when it can be voiced. Until the fat majority decide to become concerned, they will be led by the nose by the small minority.

Joseph C. Arsenault, Brookline, Mass. Civil Eng.

The past half-decade has seen great changes in many areas which have a direct bearing on each individual in society. These changes are due to the realization that improvement of the present system is necessary and possible. However, with the institution of changes comes the responsibility to see that the changes function as intended.

James M. Aufiero, E. Boston, Mass. Electrical Eng.

In the past five years many people have begun to realize the problems facing the human race. This is half of the solution. However, it is only the first half of the solution. The second half requires work.

Joyce M. Bahn, Brookline, Mass. Nursing

I can think of no more apt words to describe this time of my life than the title "New World in the Morning." The pace has been exciting, yet I've missed so much. Five years is very long and very short.

Phyllis I. Baisuck, Beverly, Mass. Education

The half-decade of my education was characterized by a tremendous lack of leadership which eventually brought about a most uneasy political and social atmosphere. Youth is now facing the unpleasant responsibility of affecting the changes necessary to solve the problem.

PHOTO

James F. Bakely Jr., Cambridge, Mass. Fin.&Ins.

During the past five years of my life at Northeastern, there have been many changes, some good, some bad—more stimulating and relevant course, better communication between teacher and student. Awareness of politics and world affairs (especially S.E. Asia) has increased. Overcrowding in the universities and exorbitant tuition are the problems which must be met.

Doris Banchik, Elmont, N.Y. Nursing

Human suffering, as I see it, often has its etiology in the biases of society. I feel that it is the plight of the enlightened to effectively bring relief through the motivation of the apathetic. Caring will bring peace.

Jeffrey Baker, Cranston, R.I. Management

It is not the decline or loss of moral values which has created our troubled times. It is the current re-evaluation of just what those morals should be. People are beginning to understand what justice, morality and love really mean.

Al Bargnesi, New London, Conn. Electrical Eng.

A larger number of the graduates today are not as intrigued as their pre-1960 counterparts about making their glamorous and monetary mark in society. A sense of responsibility for the present and future conditions of our race and world has progressed within the past decade. Subsequent generations will testify to the results.

Francine Barna, Yonkers, N.Y. Nursing.

To get the most out of life we must take time to live. In order that I may contribute to the onward march of man, I will give of myself, my talents, my abilities, my devotions and my convictions.

Lawrence M. Barry, Dorchester, Mass. Marketing.

The past five years have resulted in profound changes in university and student identities. Students realize that they are also citizens of a troubled nation; and universities must assume a more prominent role in community development. Hopefully, the past turbulent years will result in a more enlightened environment for the citizens of tomorrow.

David W. Bearg, Whitestone, N.Y. Chemical Eng.

The years showed a marked decrease in the quality of life, in everything from political repression to overpopulation. This trend will continue until either people decide to have socially useful goals or until we destroy ourselves. The longer we wait, the greater the likelihood of the latter.

Clay A. Beccue, Lockport, N.Y. Electrical Eng.

The events and happenings in the past years at Northeastern have given me additional perspective on many aspects of life. They have provided a re-examination and expansion of my beliefs, my quest for identity and a search for maturity of self.

Mary Belsky, Seekonk, Mass. English.

Striving for peace,/We reached out our hands  
To a dormant world./Because we aimed for something greater/  
Than a world engulfed/By its past failures  
And broken hopes,/We, ourselves, have not failed.

Ronald R. Benanto, Derby, Ct. Industrial Eng.

The past five years at Northeastern have certainly been indicative of a time of change. This transition can be noticed when one realizes the way in which the Northeastern student has changed from the apathetic commuter with white socks to a concerned but not yet unified student body.

Leon G. Benkovitz, Chelsea, Mass. Political Science.

America is currently facing a massive breakdown. There is a grave urban crisis, the alienation of youth, the issue of race, and a barbaric and unnecessary war. Our generation has publicized the status quo; now it is incumbent on all Americans to work together towards a solution.

Scott Bennett, Waltham, Mass. Education.

The past five years at Northeastern have been the best years of my life. I have met and made many, many friends, have received a fine education from the teachers, and have learned about the world while attending Northeastern. I have grown up very much here and I am sure it will help me in my chosen field.

Wayne F. Benoit, Beverly, Mass. Psychology.

I am concerned with an oversimplistic philosophy of both right and left, in their attempts at solving the social ills of our day. I look optimistically to a more socially educated electorate and politician of the future in reaction to our half decade's experience.

Stuart M. Berkowitz, Sharon, Mass. History.

Events of the past half decade have heavily burdened our existence of which I am but a single, microscopic entity. Change, coupled with disgust and disillusionment, have chilled our era. Both my family and Northeastern, a complex institution itself, have taught me to accept, however, both triumph and defeat, to control my doubts and anxieties, and to rationalize a more productive end.

Charles A. Bernat Jr., Jewett City, Conn. Marketing.

As the United States had accomplished its goal of reaching the moon, so to, may this first goal, graduation from Northeastern, lead to future plateaus which are greater achievements, this is our base to work from, reach out, and broaden its horizon.

Gary T. Bertrand, Derry, N.H. Education.

The past half decade has seen the scope of American life increase greatly. Problems face us today, such as have never faced us before. Some elements of our society believe that our way of life must, by force, be greatly altered. I, however, feel that as a nation we will solve our problems and that the coming decade will hold bright promise for us.

Richard F. Bilotta, Medford, Mass. Electrical Eng.

Recently the university has become an active source of social change. To some extent this is good. But in many quarters this activism has gone too far and resulted in unnecessary violence. It must be remembered that the primary function of a university is education. And only through education can meaningful change take place.

Beverlie Bilow, Clifton, N.H. History.

"Yesterday is but today's memory and tomorrow is today's dream. . . ." Kahlil Gibran

Michael Black, Peabody, Mass., Accounting

I view the past half-decade as a period in which I became greatly aware of the social change among peoples' relations between one another, which is becoming an attempt at greater understanding of different ideas and opinions.

Norman A. Boisseau, Woonsocket, R.I., Chemistry.

Although the past few years have been torn with racial strife, marred with increased war activity, and bloodied by assassinations, a more omnipotent and fearsome danger continues to imperil every American—pollution. Society and industry alike must recognize the finite limits of our resources and act now with a unified concern and determined effort to end this menace.

A. Kenneth Bonanno, Methuen, Mass., Accounting.

When a young man enters college, he is immediately exposed to a vast array of people, places and ideas. To meet the challenge of this experience he relies on friends, but finds they have gone their separate ways. A fraternity provides new life-long friends to guide a young man and provide him with an understanding of life and brotherhood such that cannot be found in books alone.

William L. Boodger, Elmira, N.Y. Finance & Insurance.

The late Bruce McLaren once wrote, "To do something well that is so worthwhile that to die trying to do it better cannot be foolhardy."

The past five years have been marked with tragedy; the assassination of a senator, a racial leader and the killing of students. WHY?

Anthony P. Bottaro, Watertown, Mass. Electrical Eng.

The past five years have been times of social reform and social revolution. I am disenchanted with the system that allowed a statesman like RFK to be assassinated. At the same time, I believe that we can peacefully reshape this system to better mankind.

Paul J. Bourque, Norwell, Mass. Civil Eng.  
The true progress of civilization drowns in the sea of delusion, deceit and ignorance.  
It flourishes where organized men of good intent have an open mind.

Gregory L. Bowden, Albany, N.Y. Economics.  
The national events which I remember most are the murders of Dr. Martin Luther King, Fred Hampton, those at Jackson State and Kent State and those of Cambodia.  
Sometimes I wonder about the logic of people who tell me to enjoy my college years since they are supposed to be the best years of my life.

Howard W. Boyd Jr., Wellesley, Mass., Economics.  
Farewell Northeastern. You have tried to teach me . . . I have tried to learn. I have seen war, assassination, campus unrest but somehow two can still enjoy the beauty of the mountains, the ocean, and only dream of better things. It has been a long five years . . . but even a longer lifetime.

Daniel Bragdon, Watertown, Mass. Chemistry.  
The past five years have brought an awareness of the problems that face the world. Some of the problems are old and others are just being realized. Mankind's survival depends on solving or at least easing these problems before they completely overcome mankind.

Michael Brass, Natick, Mass. History.  
The past half-decade has revealed man as he is in both the best and the worst light. The next years, to be decided by us, will probably shape the foreseeable years to come.

Frederick A. Brehm, Pompano Bch., Fla. Electrical Eng.  
The past five years have really been an experience. Just think—freshman, sophomore, middler, junior and senior years and we are still alive and well. Who knows what the future holds?

James M. Brennan, Boston, Mass. Accounting.  
My past half-decade has been marked by dissent and crisis. Some of this dissent has been good and other dissent has been bad. Regardless of the moral nature of the dissent, it has caused a split between the people of the U.S. Only time will tell if this split can be healed.

Stuart A. Brennan, Norwood, Mass. Electrical Eng.  
Through our co-op jobs we get an idea of what the "outside world" is like, and are forced to become more practical in our reasoning. This contributes to the lack of school spirit, but it greatly aids our education.

**Linda Brich, Naugatuck, Conn. Nursing.**  
World peace and peace in our little worlds of family, industry and community depends upon each of us putting into action the art of peace. For me it is a mighty faith in the goodness of God.

**Alan Brindle, Greenville, R.I., Finance & Insurance.**  
The five years of my college life will be remembered for the people I would not have otherwise met, but also they will be regarded as a period of developing awareness of the world's complexity.

**Robert K. Brown, Greenfield, Mass., Sociology.**  
During my years I have come to one conclusion. Two generations before us have made this nation the wealthiest and greatest nation in the history of mankind. They have satisfied "most" people's needs in America, such as food, shelter and clothing. Now I feel it is our generation's turn to understand other people, their feelings and behavior. I hope we will make a large dent in this area.

**Robert W. Brumbaugh, Lynn, Mass. Mathematics.**  
The prevalent atmosphere throughout the past years has been student apathy. Student concern increased with interest in the war in Vietnam and finally climaxed into a school-wide student strike after President Nixon sent troops into Cambodia in the spring of 1970. This concern will inevitably shape the future of our nation.

Thomas Garrison Bucko, New London, Conn., Electrical Eng.  
To solve the problems of today everyone must voice his individual views. Difference of opinion breeds innovation, betterment. The increased involvement of students towards sociological and political reform has added a fresh, new perspective.

Deborah Budd, Mattapan, Mass., Education  
"And they shall beat their swords into plowshares, and the spears into pruning hooks; nation shall not lift up sword against nation, neither shall they learn war any more."

—Deuteronomy

Jeannie A. Butler, Boston, Mass. Education.  
Bob, love, war, hate, racism, black, education, children, pollution, tuition, friends, enemies and insecurity have caused me much meditation and soul-searching the past five years. Some still have no solution in sight. I can only push on and do my small part in society well and do it constructively, not destructively.

Sally E. Campbell, Elmwood, Mass. Recreation.  
I am happy to have been a college student for these past five years. The uproar and turmoil caused by the exasperating, debatable topics of the times taught me lessons of life no lecturer or textbook had expressed so clearly. After I graduate, the opportunity to give full meaning to the laughs and tears that I have shed will be a challenge for which I am prepared.

Douglas M. Canfield, White Plains, N.Y., Electrical Eng.  
In this era of pronounced individualism, we still find few leaders and many sheep. Individualism existing as a distinct, indivisible entity; pertaining or peculiar to a single person or thing (American College Dictionary). Individualists? A false claim.

Richard A. Capoccia, Revere, Mass. Mathematics.  
I have seen my world erect a plateau of technology enabling man to walk on the moon and then—shatter as those who stand for equality were taken from us. Man often sees what he wishes to see and closes his hardened heart to suffering of Americans here and abroad.  
Phi Sigma Kappa/Vice president, social chairman, Surf Club/Ski Club/Husky Key.

Ronald M. Cedrone, Arlington, Mass., Electrical Eng.  
IEEE Student Chapter, 2,3,4,5/ Intramural Basketball, 1/  
Musky Key, 1,2/SAME, 1,2/Beta Gamma Epsilon, 2,3,4,5/  
BME IFC Representative, 2,3/ BME President, 4,5/  
Intrafraternity Council Representative, 2,3,4/  
Intrafraternity Sports, 2,3,4,5.

William O. Champ, Jr. Uniondale, N.Y., Electrical Eng.  
Turmoil has become commonplace on the campus and in international settings due to heightened political, social and moral awareness of the individual. Many of us take part for the first time in trying to realize the goals we would like for our security.

Joyce Charbonneau, Hudson, Mass. Mathematics.

"Peace does not rest in characters and covenants alone. It lies in the hearts and minds of all people. In this world, no act, no pact, no treaty, no organization can hope to preserve it without the support and the wholehearted commitment of all people."—John F. Kennedy

David K. Chase, Boston, Mass. Civil Eng.

Look back. Try to think young. Do you remember all the work and play? And remember the tempo of the times. Good? Bad? Different! (Hi, kids!)

Richard A. Chiodo, Johnsville, N.Y., Electrical Eng.

When I entered N.U. in 1966 this country was exploding economically, the Indo-China "disturbance" was in its ugly childhood and ecology was just a definition. Today we face an ever-widening non-war in Southeast Asia, economic collapse and environmental disaster. Rebuilding will be our task.

William T. Choate, Canterbury, Conn., Chemical Eng.

Graduation will be our chance to work toward solutions to the ecological, economical, political and social processes that we have criticized with our ideals for the last five years. Hopefully, our solutions will not generate the magnitudes of criticism that we have given the present solutions.

Gerald A. Chrusz, Johnsonburg, N.J., Management.

"These are the times that try men's souls. The summer soldier and the sunshine patriot will, in crisis, shrink from the service of their country. Tyranny, like hell, is not easily conquered."—Thomas Paine

Carl B. Chudnofsky, Framingham, Mass., Management.

Amid the growing frustrations of a futile and intolerable war, I think many of us, including myself, have matured by having to re-evaluate ourselves and our goals. We've all faced many problems—getting through school, meeting the rising cost of tuition, facing the draft—but five years of college will have taught us one thing: hard work for peace and order in our society is most valuable.

Wayne Clark, Lynn, Mass. Industrial Rel.

The years at Northeastern have provided me with many memories, good and bad. What I shall remember most are the many friends which I have made.

Andrew Cohen, Milton, Mass. Electrical Eng.

The corrupt filled their pockets while others starved. One man hated another man's color. Pollution robbed our lives while we all helped it grow. Young people died opposing the path our elders chose. A divided country sought the same end . . . Peace on Earth.

**Louis Mark Cohen, Mattapan, Mass., Industrial Rel.**  
As president of Northeastern's Choral Society from 1968-1971 I derived pleasure. As a man, I have become concerned. We soar to the moon for rocks but can't cross the street to help a man. We speak of peace but can't seem to implement it. Reaching the moon may have been a giant step for mankind, but it was a small step for man.

**Ronald R. Cohen, Brockton, Mass., Physics.**  
Regardless of the crises of our time or of the future, the world will continue to better itself as long as the supply of compassionate, open-minded, logical human beings is not exhausted.

**John B. Cole, Norway, Maine, Marketing.**  
Education and rational thinking are the foundations of communication and peace.

**Rayna B. Cole, Cambridge, Mass., Mathematics.**  
I feel that I have changed a great deal since my freshman days. I am much more aware of the world in which I live, its hardships, its problems and its limitations. I have matured greatly and gained a better understanding of the people around me.

John F. Collins, Watertown, Mass. Fin. & Ins.  
Consider the auk:  
Becoming extinct because he forgot how to fly and could only walk.  
Consider man, who may well become extinct  
Because he forgot how to walk and learned how to fly before he thought.

—Ogden Nash

Deborah Connor, Cohasset, Mass. Nursing.  
As years pass, the value of existence becomes more apparent. Knowledge, friendship and love flourish, and my belief that people everywhere is beautiful is enhanced. My participation in numerous organizations has made NU and the past years very meaningful.

Frank A. Conrad, Roslindale, Mass. Mechanical Eng.  
Universities closed, students boycotting classes, college presidents threatened, and university buildings taken over. The students have won, but how will they recover their loss?

Richard E. Cooney, Waltham, Mass. Biology.  
Society's resources should be focused upon peace and understanding among men.

Sheryl J. Cooper, Milton, Mass. Sociology.  
Activities at school appear to be so trivial next to the events of the world. The United States is hopefully beginning to learn the lesson that "O! It is excellent to have a giant's strength; but it is tyrannous to use it like a giant."

—Shakespeare

Anthony Corey, Jamaica Plain, Mass. Chemical Eng.  
In the past half-decade people of the world have hopefully come to realize that a lack of respect for their environment be it ecological or social, can only lead to disaster. These vital years have seen man sinking in a sea of egoism and self-righteousness, ignoring basic needs of the world and catering to the petty desires of the particular sub-culture of which he is a member.

Thomas Costello, Norwood, Mass. Marketing.  
During my years at this University I have watched a nation emerge from the doldrums of pacifism and rise to the heights of public activism. Some have condemned this activism, while others have condoned it. This, I feel, is a moot question. However, one must agree that at no other time in our history has the voice of the people spoken so loudly.

Alan J. Cousin, Malden, Mass. Electrical Eng.  
From my college experience, I can express:  
JOY at departing from institutionalized learning—university style; RELIEF to have reached an accomplished level at the baccalaureate stage; DESPAIR to reenter a society far more chaotic and complex than five years ago.

Pierre Cousineau, Dayville, Conn. Finance-Insurance.  
These have been confusing times both on and off campus . . . People misunderstanding and not communicating with each other . . . war, riots, bombings . . . sorrow, frustration, death . . . a time for soul searching . . . time for moral conviction . . . a time for change.

Carolyn M. Cragin, S. Weymouth, Mass. English.  
A time of questioning, a time of hope and a time of action. The past five years have seen an increased awareness of social inequities and an intense desire to alter man's world. Problems cannot be resolved without indicting established practices and tradition. The answers are not imminent but the active questioning continues, and it is this that offers hope for man.

John L. Criscione, Fairfield, Conn. Mechanical Eng.  
In five years, I have seen the American college student asking many questions about our way of life. Questions about environment, poor people, blacks, government's place in the world. These questions require quite a bit of energy to answer. I would hope this generation has that energy and can work together rationally toward a better life for all Americans.

William E. Crisp, Dedham, Mass., Accounting.  
In the past five years I believe that people have become more aware of what is wrong in the world. Young people see these wrongs and wish to make them right. I do not feel violence is the way to solve these problems but I sometimes find myself sympathizing with those who act violently out of frustration, because working within the law has brought no positive results.

Debbe Cross, East Haven, Conn. Nursing.  
Education has not really changed—the students have just shown greater degrees of unrest; some purposeful, others, ruthless and aimless. Sometimes I had to disassociate myself from these past years because this generation reflected frustrated and rebellious individuals. For me constructive change cannot grow out of chaos and turmoil, but from improvement from within the structure.

Denis J. Crowley, Hingham, Mass. Business Management.  
The major events of my five years at Northeastern all seem to revolve around one concept—FREEDOM. Students, Negroes, and even women want freedom. These factions came about because people started thinking and though causes went unanswered at least the times show people are thinking about more than themselves.

Nancy Cunha, Arlington, Mass. Education.  
The university five years ago was a world apart from society. The university has attempted to deal with the surrounding world beginning with the deaths of Martin Luther King and Bobby Kennedy; also the campus strike. If we are to grow together and secure a peaceful society, then knowledge must be gained from a better understanding, not only in our own backyard, but in the world around us.

Reynold A. Currier Jr., Arlington, Mass. Accounting.  
The last five years have been filled with new problems of great social significance, but close examination reveals that greater awareness to existing conditions is what really is happening. In an attempt to find answers to these questions many have become destructive. This is understandable and change is needed, but peacefully.

Richard Currier, Portland, Maine. Civil Engineering.

Francis Daggett Jr., Schenectady, N.Y. Recreation.  
I am a transfer student and therefore have little experience at the school. I would like to say that it is unfair to tell incoming freshmen a certain tuition rate and then raise it each year so that it is \$300 more by the time he is a senior. I would like to see an end to the Vietnam War and campus riots so that peace can be achieved.

J. M. Dahlquist, Weymouth, Mass. Mechanical Engineering.  
If Western Man is to exist we must correct the society that allows for: a My Lai massacre, guns in the hands of idiots, the marijuana—alcohol paradox, individuals dictating to the majority on matters of personal morality, the election of an administration that denies the need for basic research, thus setting back Cancer research alone ten years. The Saviors must be capable of marching to Beethoven's Third.

Robert S. Damon, Greenfield, Mass. Finance and Insurance.  
I am proud of the country I live in. Freedoms are greater and improving faster here than anywhere else in the world. I find it discouraging that a few misguided individuals among our college age group want to destroy it all.

William Darby, Pawtucket, R.I. Civil Engineering.  
During the past half-decade, the era of thinking has had its advent. As individuals, we have learned to evaluate and question rather than merely to accept. Our instruction has come from people: teachers, students, friends, parents, and events. Men have walked on the moon while others were shot in the streets—to both we have asked "why?" The past five years have taught to cherish that development.

Janice Davis, Westwood, Mass. English.  
Eternal, five years, exams, deadlines, two-day vacations, slamming lockers, morning traffic, whizzing by to go nowhere, moist springs, engagements, sticky summer, disengagements, solitary fall mornings chilled by an early frost, performances, masque of change, broken thoughts utterances of a fool. Teaching, ecological and universal concern, a promise of an unfulfilled future.

Philip Davis, Boston, Mass. Civil Engineering.  
"Lux Veritus Virtus"—Soap Truly Cleans.

Vincent Davulis, Boston, Mass. Mechanical Engineering.  
Nothing new can be said about the past, we've been there. But it's the future we must plan for. This generation must gain political power and change our system to one that will inherently function for the benefit of all its citizens.

Vincent L. DeBiase, Poughkeepsie, N.Y. Marketing.  
The past few years have been proud and memorable ones in the cause of peace. Our fate in the years ahead lies in the boldness and energy of youth. I believe good fortune will favor youth over age, for youth tends to be more dynamic and commands fate with greater audacity.

William Richard DeCoste, Phoenix, Ariz. Mech. Eng.  
End  $F = ma$ ; Boston  $a = v^2/R$ ; Vietnam  $P = my$ ; LBJ  $V = dx/dt$ ; Israel  $x = at^2/2$ ; Arabs  $C = dQ/dT$ ; Free  $E = w^2 p A^2/2$  Love  $T = AB \sin J$ ; West 3.1415; politics  $f(x) = y'' + y$ ; life  $b_j = b + V^2/agg$ ; Nixon  $To = S > OR$ ; Draft  $E = RI$ ; Wife  $d^2 = nq(1 - q)$ ; Vote  $J = W - N \cos gt$ ; Change  $a = \tan V^2/gp$ ; Mope  $g = -KAdt/dx$ ; Peace?  $hd/K = 141$ ; Son  $u = mdv/dx$ ; begin;

Gaspar G. DeGaetano, Old Bethpage, NY. Electrical Eng.  
Thanks a lot to some really great teachers who helped me learn and who gave me the inspiration to want to learn more.

John M. Degnan, Concord, N.H. Economics.  
Life is too short to do what you do not want to do.

Donald J. Demoy, Waltham, Mass. Marketing.  
The individual must realize the full potential of oneself. If not then he is hurting those who come in contact with him and the rest of mankind has lost a little something. Peace.

Robert J. DePasqua, Brockton, Mass. Mechanical Eng.  
Some people say we are what we eat.  
Others claim we simply are what we are.  
As students, we are committed—committed to peace.  
As graduates we are responsible—responsible for peace.  
If we are to remain what we were, there is hope  
If we remain what we ate, I'm a lemon  
meringue pie.

Geoffrey De Young, Westfield, N.J. Mechanical Eng.  
My music teacher once said, "Everyone thinks they live in the worst era; well this time I think we've got it."  
What hasn't changed? The parking problem, Dodge Library and the war.  
What has changed? Men's hair, smoking habits and tuition.

Robert A. DiCenso, Braintree, Mass. Marketing.  
Probably the most important change I've noticed is the awareness of the incoming freshmen during the past four years. Each incoming class seems to be more aware and concerned about society in the aggregate than just being concerned about themselves or their microscopic worlds.

David L. DiPietro, Haverhill, Mass. Electrical Eng.  
1966—The war is in Vietnam  
Watts is somewhere out west  
Newark is near New York  
King and Kennedy  
Kent and Jackson State (Americans did it)  
1971—The troops are coming home  
(or is it the war)

Joseph DiSabato, Bristol, Conn. Industrial Eng.  
The past half decade has been a period of growth—both intellectual and social. It has been a time of listening, learning and ultimately committing myself to ideals, ideas, and people. It has been an invaluable experience.

Mary E. Dmoch, Lynn, Mass. Mathematics.  
Apathy reigned at Northeastern from September 1966 to May 1970. The student strike, however, successfully evoked varying reactions and opposing opinions from the majority of students. Hopefully it indicated a turning point for increased involvement, awareness, and concern not only for university events but also for national affairs.

Donna K. Doherty, Bradford, Conn. Journalism.  
... a time of sporadic violence, some of it felt more deeply than others, unity for a peaceful mission (Moratorium); death for an unknown reason: RFK, Martin Luther King; a never-ending fight for equality among men.

Ronald W. Dorman, Bethel, Conn. Electrical Eng.  
From the initial confusion of freshman year and through the following four years I have witnessed and learned much. I have been well schooled in my major and have developed a new awareness of myself and the people around me. Now in the last year, I express my wish that we all use our education to better the conditions that exist and that we will see the results of our efforts.

Douglas W. Downs, Ashaway, R.I. Mechanical Eng.  
In the animal kingdom, only two animals will fight until death. One is the wolverine, the other is man. I fail to see how we can call ourselves civilized until we consent to join this silent majority.

William D. Duckworth, Pawtucket, R.I. Industrial Eng.  
The impact of the changes in our traditions and values has brought to light two guidelines to follow. We must allow ourselves to be open about and flexible to change but, at the same time, we must be strong enough to be individualistic in determining our commitments.

Robert M. Dunn, Natick, Mass. Mechanical Eng.  
The solution to the world's problems lies within psychology. The basic human nature of man has to be changed.

Nancy Ellen Durning, Molden, Mass. Nursing.  
Choose life—only that and always and at whatever risk. To let life leak out, to let it wear away by the mere passage of time, to withhold giving it and spreading it is to choose nothing.

—Kelley

Vernon Eldringhoff Jr., Dorchester, Mass. Civil Eng.  
To define myself in terms of the mood of the last half of the decade in the allotted space of 40 words or less granted me here, seems quite impossible.  
I only hope that I have not just been educated during these five years, but that I have learned and become aware.

Howard L. Epstein, Mattapan, Mass. Electrical Eng.  
As people find their priority not to be the realization of as much personal material gain possible; when they concern themselves with fellow man, and desire sharing equally all gains among all people, this is when lasting peace will be achieved.

Eugene P. Esposito, Milford, Conn. Management.  
Today, as yesterday, we feel inclined to be both critical and cynical of both our academic and social environments. But to those who work and strive for a better tomorrow, we find our hope. My education has just begun and I hope we can all learn each day a little more for our own sake.

Nancy Farwell, Wakefield, Mass. Physical Therapy.

Being a transfer student from Vermont College I have had the experience of attending a small country school and a large city university. I have enjoyed the program here and I am looking forward to working in this field after graduation.

Robert J. Feltovic, Ansonia, Conn. Chemistry.

College has meant more than the mere accumulation of classroom knowledge. The world that our generation will inherit will be both confusing and confused; and the duty will be ours to meet its challenges, remedy its ills and eventually reap its joys. I only hope that I have prepared myself to offer a worthwhile contribution.

Charles John Ferreira, Taunton, Mass. Management.

A half decade of turning up the lights to get a clearer view of our responsibilities to each other—flashes of lightning spark the establishment to thunder toward an attempt to "committee" our problems. Success? Switch the lights on in another hundred years for the answer. Hope = Us! We must communicate our willingness and readiness to correct the abuses of our society.

Michael Fine, Hull, Mass. Journalism.

LBJ—Vietnam—Gemini—Ho—Mao—Baird—Israel—Napalm—Arabs—Red Sox—DMZ—Apollo—Titicut—Dow—Greece—Referendum—Pueblo—Hue—Dr. King—De-escalation—RFK—HHH—McCarthy—Nixon's the One—Czechoslovakia—Moon—Mets—Thailand—Spiro—Chappaquiddick—Namath—Cambodia—Moratorium—Hayakawa—My Lai—Bruins—Kent—Hijacks—Vietnam—These were a few of my favorite things.

Lawrence K. Fink, Flushing, N.Y. Civil Engineering.

The five years spent at Northeastern have been formative one for both myself and the world. The effect these years will have: only time can tell.

Cheryl Lea Flater, Baltimore, Md. History.

"Well, something's lost but something's gained  
In living every day.  
I've looked at life from both sides now,  
From win and lose  
And still somehow  
It's life's illusions I recall.  
I really don't know life at all."

—Joni Mitchell

James Fong, Boston, Mass. Mechanical Engineering.

An attitude of change for the better prevailed in my years at Northeastern, and it was this attitude, I feel, that motivated the mechanical engineering department to initiate several major changes. The new curriculum will benefit the department immeasurably in the future.

Shirley M. Forbes, Dedham, Mass. Nursing.

"If a man does not keep pace with his companions, perhaps it is because he hears a different drummer. Let him step to the music which he hears. However measured or far away."

—Henry David Thoreau

**Bertrand L. Forest Jr., Manchester, N.H. Electrical Eng.**  
In my five years at Northeastern, I have seen a change in the average college student. He has begun to shed his usually passive social role, and developed an awareness of those outside his educational sphere. He must now channel his creative abilities to exploit his new ideals.

**John Forlizzi, East Boston, Mass. Electrical Engineering.**  
These past five years have given me the opportunity to be able to view more than one side of situations. I cannot pinpoint the exact factor which accomplished this but it must include the fraternity to which I belong, other students and people I have come in contact with; I know that there would be a large void in my life if I had not come to a university.

**Stephen B. Fox, Brighton, Mass. Mathematics.**  
As a freshman, I believed "college" to be "the academic institution" devoted solely to booklearning. But I quickly learned it was a way of life: making new friends, pledging a fraternity, getting elected to Class Board, becoming totally involved in the microcosm. College would have been in vain if I had not learned to bridge the gap to involvement in the world outside. Work for peace.

**David Freed, Newton, Mass. Civil Engineering.**  
I'd like to see America reach a happy medium and eventual solution to our problems by having the far right and the far left give way to each other's desires. Then there will be happiness and love for all. My happiness and love is with Arlene, August 29, 1971.

**Alexander S. Frisch, Chestnut Hill, Mass. Marketing.**  
"Student Government." Interpersonal relationships are gaining increasing priority in the hierarchy of human values. Resource allocations must be adjusted to allow individuals a healthy self concept. Failure to carry through these changes can only lead to the emotional collapse of our species.

**Herbert A. Fuchs, Hempstead, N.Y. Accounting.**  
"Compromise"—fight and win the war or withdraw immediately and abolish the military; support the establishment or tear it down and let everyone "do their own thing." When there are arguments like these, there is only one solution—compromise. Both sides must bend to meet each other. Until this happens nothing is gained.

**Carolyn Garofano, Medford, Mass. Education.**  
Although we, as college students have been labeled "radicals" by our elders, we have learned to be courageous in non-conforming and open-minded in considering the opinions of others. Our college years have been rewarding not for our own academic certificate alone but more importantly a great learning experience of life.

**James L. Gaudet, Cambridge, Mass. Electrical Eng.**  
It's been a strange journey. Half-man, half-boy. Where freedom approaches responsibility, that's where I've been. I like to think I see things clearer now.

Lee Geoffrion, Manchester, N.H. Industrial Relations.  
The theme has been the giving of one's self. But can we offer less than everything and still call it love? Can destruction be properly substituted for change? If we believe this, our time here has been wasted. May God find our ideals sincere.

Lois Geremonte, Arlington, Mass. Nursing.  
We were all messy rooms at times, out of order. We often tried to hide it. At times we couldn't hide it. That's because we needed faith, love, peace—each other.

Harvey Gershman, Pawtucket, R.I. Mechanical Engineering.  
The Student Strike of Spring '70 was a time when my texts were dropped and my slide ruling stopped. I became aware of Nixon's war, Black America's plight and the Silent Majority's long winter nap. The involvement, the education, and the frustration of being part of a minority that tried to awake this country. I felt that I tried to do something, I tried hard, but failed, not knowing why!

Jonathan S. Gerson, Chestnut Hill, Mass. Civil Engineering.  
The more we study, the more we know. The more we know, the more we want to know more. The more we want to know more, the more we study. Why is it, with all this knowledge, we don't know how to live?

Lorna Dale Goldberg, Gloucester, Mass. Nursing.  
Life is what one makes it. The more one gives of oneself, the more one receives.

Marshall Goldberg, Randolph, Mass. Accounting.  
Perhaps the most significant occurrence for me in this past half-decade has been experiencing life. The happiest moment has been my wedding night. Without a doubt the event having the greatest impact on the world has been the Vietnam War.

Steven A. Goldberg, Milton, Mass. Chemical Engineering.  
The advanced technology of today's world has moved ahead of people who have developed it. We have allowed ourselves to become self-destructive through environmental deterioration. But people are escaping from their individual worlds to help the entire society. We have left the everyday existence for an awareness of the future and a liveable world. Class Pres. 4,5, Tau Kappa Epsilon 2,3,4,5, Inter-Class Council 4,5.

Irene K. Gorczyca, Wethersfield, Conn. Industrial Eng.  
One-half-decade is like another—Somewhere discoveries are made, somewhere wars rage—Everywhere people and pollution increase; 1966-71 is no different. Unique, however, is the effort on my life—for I received an education in both engineering and people. This knowledge I prize above all my possessions and I am eternally grateful to my parents who worked so hard to give all this to me.

Ronald Louis Grasso, E. Boston, Mass. Electrical Eng.  
The past half-decade has really awakened me to the world. As a high schooler I would read about events and happenings in the world and would not really believe them. Now, as a college graduate, I find myself in the middle of these events and happenings and learning more about the world as it is today.

Jason Grossman, Chestnut Hill, Mass. Biology.  
We are amidst a revolution against past standards. Repression is no longer tolerated. We must "let it all hang out." Yet, none of these objects of protest are new. They are just enlarged reflections of the past.

Jerrold Jay Greenberg, Clifton, N.J. English.  
There have been size and stature changes in Northeastern in the past five years. My organization (WRBB-FM) has also expanded. As station manager, I have been exposed to change in the attitudes of students and administration concerning our largest issue: Student Protest of the Southeast Asia War. The culmination was Nixon's Cambodia decision. I hope the polarization is stopped.

Robert E. Grover, Melrose, Mass. Civil Engineering.  
Man has reached the moon, but not the community; he has filled the air with missiles and other debris. Small steps are being taken but giant steps in the right direction are needed.

Regina Gurfinkiel, Mattapan, Mass. Modern Languages.

Peter W. Haggerty, Arlington, Va. Physics.  
Our five years as undergraduates at Northeastern can only be judged to be of value if, some 30 years from now, we can truthfully make the comment: "I can still make 30 per cent of the statements that I made as an undergraduate, and I still hold and believe in 30 per cent of the ideals that I believed in as an undergraduate."

Nancy Hall, Augusta, Me. Marketing.  
More important than the academia in which we have revolved was our exposure to outside forces. We have witnessed the assassination of leaders, been directly confronted with a real war, and seen the forceful impetus of dissenting minority groups. The result—we have learned to relate ourselves realistically to the changing world we will enter—now!

Marc Hamilton, Summit, N.J. Journalism.  
Regardless of motivation or expression, the past five years are witness to the growth of an intense concern. It focused on the college and university and expanded to the problems of humanity in every realm. That is behind us, but the concern we developed and displayed must be carried along. Its continuance is the insurance for our future and that of those to come.

Lorraine A. Hanna, Waldoboro, Me. Political Science.  
My college life has been most influenced by the Vietnam War and the women's liberation movement. The war caused my first participation in the American political process which is now being replaced with concern for equal rights for women.

Richard J. Harding, Melrose, Mass. Industrial Eng.  
Rifle Club 1. Beta Gamma Epsilon 2,3,4,5. I.F.C. Sports. Alpha Pi Mu 4,5. A.I.I.E. 2,3,4,5 (Pres.) Delegate to Regional and National Conventions 3.  
After I entered the university scene in 1966, I perceived what was later termed the "Silent Majority," but as I leave in 1970 I recognize healthy trends toward constructive participation.

Eric Warren Hanson, Hingham, Mass. English.  
The recent years' hard feelings between people so neatly (and impossibly) labeled members of the establishment and the young liberals, has made us in America quite proficient at hurling and fielding maledictions and violent response. It's sadening that we can't take some council on tolerance from a Shakespearean charlatan named Parolles who says "There's place and means for every man alive."

John Kevin Hayes, Somersworth, N.H. Civil Engineering.  
Education in the period 1966-71 has lead to these thoughts. Become involved in America and her problems, trying to better democracy. Let the ideas presented to us in the past five years lead us to the achievement of the goals in the future.

Jonathan B. Hedman, Braintree, Mass. Mechanical Eng.  
Looking back at the last five years, marked by violence, immorality, insecurity, dishonesty, pollution and materialism, I believe we still will be part of a better world in the future. Youth needs a firm faith, a strong challenge and opportunity to serve his fellow man.

Harry Herman, Woonsocket, R.I. Marketing.  
Today our rapidly changing environment requires that the socio-industrial relationship be closer and more effective in solving the economic, social, and physiological problems of today's man and tomorrow's environment. For neither will society or industry thrive in a threatening atmosphere detrimental to the basic ingredients of life itself.

Deborah E. Hogan, Cambridge, Mass. English.  
Fortunately, reactions to different life styles have become looser and more tolerant. The development of the mind has become, rightly so, more important than the cultivation of pre-digested data.

Deborah Hollman, Hanson, Mass. Education.  
"When you educate a man,  
you educate an individual;  
When you educate a woman,  
you educate a family."

"A winner never quits,  
And a quitter never wins."

Frederick Ray Hunt, Worcester, Mass. Management.  
These five years mark the beginning. The younger generation will no longer passively accept a world of darkness. Poverty, prejudice, pollution and hate must end if there is to be light. The first star has begun to shine.

William Paul Huntley, Meriden, Conn. Electrical Eng.  
The 1960's marked the beginning of the "not so silent spring." The last five years have demonstrated our increasing frustration and discontent with society morally, politically, and humanely. The question we keep asking ourselves is "Can we make the future better?" I only hope our generation continues to try.

Patrice Hurley, Chestnut Hill, Mass. Education.  
Northeastern, new friends, roommates, Dirty Gurdy, love, problems, co-op, exams, Sam, "Schnodgrass," cooking dinner, a bottle of wine, tears, good-bye, hello. If I must say something about my short, but beautiful twenty-two years, I would borrow the words from a song: "I Did It My Way," and I have no regrets.

Charles Iannaccone, Woburn, Mass. Chemical Eng.  
Through the events of the past five years, I am firmly convinced that the U.S. should take a good long look at its own domestic problems. Instead of spending billions fighting a futile war in Vietnam, or implementing an unnecessary ABM system, this money could be put to positive use; for instance, poverty, housing, education, and urban renewal.

Attilia A. Iannarelli, Providence, R.I. Biology.  
Life is a strange phenomena. It is impossible to grab it by my hand. It is a moment of contradiction in reality. We, like fish, try to fly in vain, jumping from the calm sea, wanting to be shone in the sunset. It is the joys and sorrows brought by experiencing others . . . and finding oneself.

Steven P. Irving, Randolph, Mass. Biology.  
The apotheosis of human greed is a major factor contributing to the ecological and social crisis with which we are faced. If life on this planet is to survive, we must re-evaluate our values and our goals. That is, we must reach a compromise with our physical and social environment.

Ralph L. Jacobs, Belmont, Mass. Civil Eng.  
To take a single experience or event and attempt to explain the transition of my life during the past five years would be impossible. For behind this social maze of love, hate, war and prejudice, is one most significant personal event . . . that I as an individual have found myself.

Richard J. Jennings, Wakefield, Mass. Education.  
Martin Luther King . . . senseless; Chicago defendants and Judge Hoffman . . . who is (are) the pig(s); Weathermen . . . why?; ROTC . . . why not?; Richard M. Nixon in 1968 . . . I'm sorry; RFK . . . another one?; Quadrangle "Massacre" . . . according to whom? . . . Too bad N.U. doesn't give courses in people!!

Dwight S. Johnson, Spruce Head, Maine. Electrical Eng.  
The past five years of school have shown me that of all my impressions there is only one which really stands out far above the others. This one impression is obvious yet seldom recognized. It is simply that we have been—

Lesley Johnson, Natick, Mass. Education.  
"And like the baseless fabric of this vision,  
The cloud-capped towers, the gorgeous palaces,  
The solemn temples, the great globe itself—shall dissolve  
And, like this insubstantial pageant faded,  
Leave not rack behind. We are such stuff  
As dreams are made on, and our little life  
is rounded with a sleep."

—Shakespeare

Ronald B. Johnson, Windsor, Conn. Management.  
Changes in life styles, people and places, from apathy to protest, beer to grass, death to resurrection within a half decade of my life. Constant war within and between peoples with peace hovering above and yet unable to prevail. The future looks bright if man can survive the next half-decade.

Peter A. Jones, Norwood, Mass. Political Science.  
I view my years at the university as a period of realization. Prior to it, topics of great concern, which include world and domestic peace, the population explosion, pollution, social equality and the generation gap were present but, it seems not realized. Today it appears that these topics will now be identified and acted upon to bring about a true brotherhood of mankind.

David R. Jose, Marlborough, Conn. Mechanical Eng.  
Changes made at record speed; minds rejecting society's molds; a time filled with fear; more people aware and caring than ever before; but always the hope for a better tomorrow.

Edmond R. Joyal Jr., Waltham, Mass. Political Science.  
In the past five years political assassination—and sometimes genocide for political reasons—has become commonplace. This has had an effect upon me that is to make me more committed to making this world a better place in which to live.

Paul G. Joubert, Wilbraham, Mass. Accounting.  
"What this university meant to me,  
—One degree  
and a wife-to-be."

Rachelle Kahalas, Norwood, Mass. Political Science.  
Our college years were ones of great emotion—but not of despair—for we learned to "dream things as they never were and say, why not" and try things never tried and say, "I can."

Gerald Kalenderian, Watertown, Mass. Management.  
The past five years at Northeastern have made me realize how little I actually know; but this realization has encouraged me to learn more about myself and the things around me.

Pauline Kantos, Brookline, Mass. Education.  
The past half-decade has had its emphasis on youth. More than ever older people have had to talk, listen and try to understand youths. We are all children born in a different world. Violent changes and happenings have made us this way. We began to question the system. We exist in an uptight society. Everyone is uptight about something. But if we all get together we can make it an even better world for our children . . . Peace.

Karen Kearney, Melrose, Mass. Nursing.  
Five years somehow sounds like less time than a past half-decade. Although I had become involved in some school activities, my sorority Alpha Omicron Pi being a major part, so many things have happened during these past five years both inside and outside of the university to really get into, including the October Moratorium and the Strike of this past year.

James J. Keilty, Dorchester, Mass. Finance.  
The years '66-71 were the years when the word "priorities" became so common. Priorities, a system of goals, must first be established. If, then, we strive hard enough and work long enough we can achieve whatever goals we set.

James M. Keirstead, Framingham, Mass. Chemical Eng.  
Over this past half-decade we have seen a war continue to rage in Vietnam, while we are promised peace. Now as violence erupts, we must work for immediate peace and end the violence before it destroys what we have worked so hard to achieve. Peace.

Kathleen Kellogg, Wyckoff, N.J., Education.  
City life, lights, concerts and plays. Easter, N.Y.C.—J.W. Thompsons. Then was the summer of sunshine and sailboats. Beautiful skiing at Loon Mountain; transport at Tufts NEMCH and living on Symphony Rd. Teaching in New Jersey. Skiing with the Hus-skiers.

H. Allan Kidd, Elmont, N.Y. Electrical Eng.  
Awareness; Martin Luther King; Vietnam; devious Richard; war; marijuana; stereo; headphones; light show; colors; Yellow Submarine; lots of freaks; Woodstock; Peace Corps; VISTA; Strawberry Fields Forever; bust; Eugene McCarthy; RFK; the silent majority is fucked up. Peace! Love! Happiness!

Dale King, Attleboro, Mass. Journalism.  
The University has developed into an institution of total involvement. As a Northeastern News staffer, I saw the college campus merge with the community bringing knowledge to a world torn by misunderstanding. Our generation will spread peace throughout all nations.

Terry R. Kishbaugh, Unadilla, N.Y. Mechanical Eng.  
For many decades to come, man, if he continues to exist, may truly wonder at the idiocy of the late '60's. Why must our daily lives be filled with war, poverty, racism, fear, hatred, ignorance and violence. We are one people inhabiting one world; can we not live by the principles of universal love, brotherhood, compassion and individual freedom?

Ronald A. Koven, Albany, N.Y. Management.  
We as seniors have watched five years of social change. In essence change has been the watchword of our society. It is evident in everything we've done. There has been a change in breaking down of barriers between the students themselves. In the future barriers between students and administration must drop for the betterment of the entire university.

Carol Kramer, Manchester, Conn. Physical Therapy.  
Being suddenly caught up by the frenzied events of the campus and the world, I have, gratefully learned from those around me; both of differing and similar views. With the direction their call as have given me, I hope to make my way through the turbulence.

Leslie Jean Kramer, Naval Hospital, Chelsea, Mass. Biology.  
Today freedom is equated with unrestrained license. Never before has such a system prevailed, where those who know the least are actively, and with some success, dictating the conduct of society. Could it be that the "enlightened" generation is most dedicated?

Richard F. Kramer, Baldwin, N.Y. Civil Eng.  
We have learned enough now to know  
That we need to learn much more.

Lawrence M. Krupnick, Athol, Mass. Accounting.  
Turmoil and lack of remedial action have beset our times. Strikes and demonstrations have done much to aggravate the awareness of problems, but little to offer operable solutions. Callous self-goals and lack of true friendships have hindered our making a better nation.

Henry C. Kubli Jr., Pittsfield, Mass. Electrical Eng.  
The world-wide problems of hunger, environmental pollution and population increase have become curtly apparent to us all. As a result, the peoples of the world have begun to realize that if mankind is to survive, hatred, war, and nationalistic pride must be replaced by love, peace and mutual respect.

Ronald F. Ladner, Holden, Mass. Industrial Eng.  
AIIE 3,4,5; Joint Eng. Council 4,5; Tau Beta Pi 3,4,5; Alpha Pi Mu 3,4,5; Vice-President 4; President 5; Freshman's Honor List; Dean's List 2,3,4,5.

Mary Lam, Boston, Mass. Pharmacy.

This half-decade have vividly marked a time for change in our society. The young people have taken strides to try to form a more real society, so each of us may live in an authentic way and thereby be happier. New life styles with new ideas are gradually replacing the old ones, for it is the times they are changing.

David R. Lambert, Wethersfield, Conn. Electrical Eng.

Let everyone do their own thing and you do yours—  
If it has to do with the ocean, I'm all for it—  
Activities: Underwater Club, Sports Car Club, IEEE.

Carl E. Landrum, Roslindale, Mass. Electrical Eng.

The young people have overridden the old American principle of "going along with the system" and decided to voice their disapproval of the way our society exists and the direction our leaders are taking us. This change in tempo has had a part in determining our future.

Nancy J. Lavender, Bayonne, N.J. English.

For every great achievement during the last five years there seemed to arise twice as many stumbling blocks. Man can replace a worn out heart, and he has touched the moon, but he has not solved the problem of strife. Maybe someday when man begins to truly understand, he will learn to love, and when his love is understood, there will be everlasting peace.

David I. Larson, Belmont, Mass. History.

"It was the best of times, it was the worst of times; it was the Age of Wisdom, it was the Age of Foolishness; it was the epoch of belief, it was the Age of Incredulity . . .

—Charles Dickens

Jack Lee, Boston, Mass. Mathematics.

The last five years at Northeastern have been frustrating ones. This frustration results from overt inability to change our social, political or environmental ills. This frustration is affecting individuals in different manners, ranging from indifference to violence. Both of these are dangerous. We must have change—soon.

Pauline E. Lee, Taunton, Mass. Nursing.  
Transition and volatility set the stage for our five years. As freshmen we saw the demise of the silent, accepting college student role. To us belonged the turbulence of the '60's and '70's—war, assassination, political upheaval and social unrest. We became aware and active. We sought to accept and demand of ourselves a measure of responsibility. We are a new generation of Americans.

Robert C. Lesuer, Waltham, Mass. Civil Eng.  
The right of peaceful dissent should be protected always, the necessity of violent dissent, encouraged never. I pray that people will no longer meet death, either in the service of their country or in the pursuit of those ideals they hold sacred.

James H. LeTourneau, Somerville, Mass. Mechanical Eng.  
My college years widened my view to real life through acquaintances with others and especially the cooperative program. By actually entering the industrial field while studying I found book knowledge to be of little significance when compared to knowledge gained on how to think.

Stanley J. Lewis, Somerville, Mass. Marketing.  
From high school history to studying Afro-American relations. From watching war movies to joining ROTC. From personal resentments to taking part in nationwide student strikes. From being sheltered to having the world at my hands. My years at Northeastern—they changed me.

Philip N. Littlefield Jr., Arlington, Mass. Physics.  
I believe the Manned Space Program, and its culminating lunar landing to be the greatest achievement of the 60's, if not of all time, for it demonstrated the intrinsic positive nature of technology. It now rests with the humanists to use what science has provided for the improvement of human kind.

Robert W. Lothrop, Roslindale, Mass. Electrical Eng.  
The past five years have shown vast changes in the attitudes of students toward the society that surrounds them. Today's students are concerned with morality, sex, drugs, ecology, war, and even the integrity of our government. At last students are waking up and asking "Why?"

Debra Lynn Lubin, Chelsea, Mass. Sociology.  
What made the most intense impact upon my thinking and beliefs during the past years has been the assassination of Bobby Kennedy, especially because it occurred when it did. I had felt that he was the hope for the future of the country and I see no such new hope arising soon.

Bernard D. Lucey, Quincy, Mass. Civil Engineering.  
Hour by hour we stood by the flame  
melting the earth and star,  
re-shaping the mold.

The casting in hand,  
we step to the exit.

Paul L. Lucerto, Winthrop, Mass. Accounting.  
In the past half-decade the accent has been on youth. I feel that Northeastern's program of work and study will become increasingly more important because it is more functional to the young.

Joan Edith Lund, Everett, Mass. Nursing.  
One significant change I have seen during my nursing education is the absence of individuality. There is disintegration of minds and bodies by drugs taken to cope with personal, national, and international problems. Such momentary relief has led to historical despair for both the users and the abstainers.

Anne Lupo, Newtonville, Mass. History.  
The past five years have seen an unending war, assassination, protest, and death. We, as young people directly affected, have felt shock and despair. Despite the attention focused on us—our efforts at change—we have been a misunderstood generation.

Donald Ross MacDonald, Roxbury, Mass. Accounting.  
"Mon ami tremble d'horreur à évoqués souvenirs," embodies my opinion of the past half-decade. Our country is undergoing a period of change in morals and ideas. I hope that the end result will be constructive change to benefit all. "Listen carefully to the sounds of silence." Treasurer—Beta Alpha Psi.

Richard J. MacDonald, Salem, Mass. Electrical Eng.  
The past half-decade brought with it an awareness in man that he must learn the meaning of true communication and commit himself to meaningful interaction with others for the purpose of survival.

William MacDonald, Rockland, Mass. Chemical Engineering.  
The past half-decade has been one of constant change and reorganization. The attitudes of some people have changed radically with their extreme beliefs on bombing and taking the law into their own hands. Much has to be done politically and socially to improve our society and our lives.

Walter Maciejowski, Everett, Mass. Marketing.  
During my years at Northeastern, I have witnessed world problems grow to almost unbelievable proportions. In summing up these past five years, I can only say that we are now closer to a possible world cosmocide.

Robert E. MacKay, Dorchester, Mass. History.  
1966-1971: Interesting times.

Thomas B. Mackey, Lynn, Mass. Industrial Engineering.  
As we leave Northeastern, we find an American torn by war and violence. Let us resolve to build a better world, not as the masters of that world, but as the servants of all men.

David F. Mahoney, Framingham, Mass. Biology.  
The awareness, shown by college students at this university and others, has been acute. Never before has the student shown more concern of events, domestic and foreign, taking place about him. Although the methods of response may have been unwarranted, he has shown a genuine interest in trying to solve problems in our society.

Cheryl A. Mansfield, E. Weymouth, Mass. Mathematics.

Nicholas Mariani, Waltham, Mass. Civil Engineering.  
The past half-decade for me has been a world full of frustrations and uncertainties. The frustrations evolved from the constant and unrelenting pressure of the academic requirements. The uncertainties emanated from the Vietnam War, rioting and the polarization of the people.

Robert L. Martino, Shelton, Conn. Electrical Eng.  
The most fruitful lesson of the last five years was to see the need to question the events taking place around us and to try and do something about them. We see the need of the underprivileged and repressed, understand their position, and their dependence on external help. We should plan our future with these examples in mind.

Donald I. Martin, Lynn, Mass. Industrial Eng.  
Freshman—Confusion, numbers, and IBM cards.  
Sophomore—Cook's cook book and Gold's engineered money.  
Middler—What is the probability of Gold leaving?  
Junior—O.R.—the simple Simplex; Cambodia—missed Strike.  
Senior—What senior paper?  
Is it really over, or is this just the beginning?

Francis J. Masciarelli, Milford, Mass. Electrical Eng.  
We should all work for a better world. Some have worked within the system and some have not. Those who did not must be ready to pay the price. They may suffer but we may benefit and the system may improve.

Mary Ellen Mattox, New York City, N.Y. Nursing.  
In the recent past, the students' attitude toward their universities and society has changed. They have become increasingly more interested in their physical world (evidenced by Earth Day) and with the problems of their country and the world (Moratorium and Strike). This change has been long in the coming and it is here to stay and help reform.

Phyllis B. Mazzarella, Revere, Mass. Political Sci.  
The school, the nation and the world have been dramatically changed over the past five years. This change affects all of us for better or for worse. Many of our values and ideals have been changed. Many have been broken. Do we really have a future? Did we get what we wanted or have we gotten more than we bargained for.

Robert R. McAuslan, Seekonk, Mass. Fin. & Ins.  
The greatest single change that we have witnessed during the past half-decade has been the focus of attention on the problems of limiting the population, and conserving the environment. This will be the most important campaign of the seventies.

Elizabeth A. McCarthy, Worcester, Mass. Psych.  
In the past half-decade the university has been influential in uncovering the need for concern with "now." Regardless of the past, "today" is the first day of the rest of our, therefore, we must look to the future.

Thomas McDonough, Malden, Mass. Management.  
In the past five years, the college scene has observed that have affected the college in many ways. Curriculum has changed to suit the times. Students have had a larger part in college life. Unrest is prevalent. One of the most shocking of tragedies was the deaths of Ohio Students.

Robert O. McIntyre, Brighton, Mass. Soc. Studies.  
The pursuit of peace has been valid and worthwhile. True peace will come when all men decide to give something to their fellow man.

Judy Ann McLaughlin, Boston, Mass. Philosophy.  
Northeastern has taught me to beware of definitions. As a freshman, I needed to be a perfect person. As an upperclassman, I needed to be a person. As a graduate, I need to BE.

Alan John Meister, Rockland, Mass. Accounting.

A movement of growing concern is the younger generation's drive against the establishment, not only to correct wrongs and evils, but to strengthen their own moral and social standards. The flag my country has fought so hard to wave is often forgotten and the enemy's flag is waved. Death to traitors! My country tis of thee!

Richard Mellitz, Milford, Conn. Electrical Eng.

When there is someone, we don't need anyone.  
When there is no one, we need only someone.

Michael J. Menzie, Westfield, N.J. Electrical Eng.

We must strive to preserve the freedom and privacy of the individual rather than sacrifice our will to those who would "help" us in spite of ourselves, and we must see to it that government begins to serve the people and stops serving itself.

David S. Miller, Brighton, Mass. Electrical Eng.

From our modern buildings, I can see the poverty across the railroad tracks. Thus, Northeastern has let me see first-hand where our national priorities have gone. Tau Beta Pi, 3,4,5/ Eta Kappa Nu, 3,4,5/ Chapter vice president, 5/ IEEE, 2,3,4,5.

Herman J. Miller, Mattapan, Mass. Mech. Eng.

These past years have seen greater tension in our society arising from the polarization of the races, and radicalization of many students. It was a period of widespread campus unrest and protest, stimulated by frustration over the Vietnam War and the inability to bring about changes in our society fast enough.

Lawrence E. Miscowski, Woburn, Mass. Mech. Eng.

Donald K. Mitchell Jr., Dorchester, Mass. Mgmt.

I feel the last half of the '60s has shown sharp awareness the college generation has for themselves and their environment, both philosophical and ecological. It is my hope that we will be able to incorporate this awareness into constructive improvement through the system of government we now have.

Joel B. Mittler, Commack, N.Y. Industrial Eng.

"I am, I think, I will . . . What must I say besides? . . . And now I see the face of God, and I raise this god over the earth, this god who men have sought since men came into being, this god who will grant them joy and peace and pride. This god, this one word: I."

—Ayn Rand

Thomas J. Monaghan, Brockton, Mass. Education.  
Northeastern: Sheila, Walpole, Kappa Delta Pi, peace, effete, shoes, friends, foosball, yomechas, Kit Cat, laughing, write-on, Blue Hill Ave., despair, Kent, palsies, Mash, hopes, Peter B., Dolly, whalers, Andre, Hair, qpa, oi, smile. Thank you, God Bless.

Brian C. Monahan, Wellesley, Mass. Journalism.  
The '70s are here, and for this generation of graduates, the most vociferous of late, it is time to put rhetoric, high idealism and exuberant energies to the test. It may take decades to prove the stamp of "effete" was wholly inappropriate. President, Journ. Society & Sigma Delta Chi/Student Advisory Committee & L.A. Library Committee.

Timothy E. Moore, Tewksbury, Mass. Electrical Eng.  
Northeastern's Ecology Day helped to bring about an awareness of the immense problem that pollution presents. Man must learn to conserve his natural resources and to recycle his wastes which are currently polluting the land, the air and the sea.

Martin Edward Morse, Wells, Maine. Management.  
The past five years have been the most interesting but frustrating years of my life. I think I have developed a true awareness of my environment. When observing a problem objectively, there is no easy clear-cut answer. Beware of people with simple solutions to complex problems.

Amy Louise Moskowitz, New York, N.Y. Phys. Ed.  
Life is a sport that few of us can play skillfully enough to win. Learn to love a challenge or lose your chance to compete.

Thomas William Mullen, Dedham, Mass. Pol. Sci.  
The past half-decade was a period of flux, of gestation. Certain institutions, heretofore sacrosanct, were pressured to the breaking point. Excesses and provocations were indulged in by all sides. Perhaps the next decade will be one of congealing, the practicing of valid goals by valid means.

Gregory P. Murphy, Marblehead, Mass. Management.  
What has impressed me most over the last five years is the involvement of America's youth in national affairs. Unfortunately, youth's claim to an opinion that is morally and legally theirs is being suppressed by the more narrow-minded.

Thomas J. Murphy, North Andover, Mass. Civil Eng.  
The past five years have been spent learning how to build a better world. Let's hope we do a better job than the people who built those years.

Viet Cong  
Women use  
Their GUNS  
TO SMASH  
U.S. Imperialism

John P. Mustonen Jr., Walpole, Mass. Mechanical Eng.  
My years at N.U. have been spent in the atmosphere of a world struggling for survival. The history of these years bears witness to the urgent need for dedication, on the part of new graduates, to the pursuit of excellence in their chosen professions and tranquility in their inherited society.

George F. Nelson, Boston, Mass. Accounting.  
Introspect thyself and appreciate the change. A large part of college, aside from the learning process, is interaction with people. These relationships imprint lasting influences on all of us. Go from the grey brick walls and live meaningful lives free from anxiety and tuition increases.

Nell Naideth, Pasadena, Calif. Education.  
Man has the power to be a determiner rather than a victim of his fate. It is time for him to use that power both individually and jointly to cease killing himself through violent and subtle means.

Nancy M. Newell, Bedford, N.H. Nursing.  
My college life was an experience of bitter reality, a never ending party and next week we study. Never before nor after are you so close to reality. There is the joy and ecstasy, the love that spills over and pours down the avenues of your life filling me with a peace that no cathedral or poem could ever give. These five years will be re-lived time and time again.

William J. Newman, Saugus, Mass. Electrical Eng.  
While at Northeastern I have witnessed in myself and my generation a continuing shift in emphasis from materialism to humanism. Hopefully this will lead to a day when brotherhood, love and other ideals which until now have been paid only lip service, will become living realities.

Edward J. Niemiera, Perth Amboy, N.J. Political Science.  
The past half-decade ushered in an era of increasing concern among students black and white, of the social, political and economic problems existing in the United States. This concern brought about increased militancy and unfortunately violence, which in turn, has brought about a conservative reaction.

Dennis J. Nightingale, Garden City Park, N.Y. Electrical Eng.  
For me the past half-decade was a period of unwarranted assassinations, a time of mass demonstrations and a time of uncalled for violence. It was the time of the so-called "youth movement" I would sum up this period in one word . . . confusion.

Vincent P. Nobrega, Fairfield, Conn. Electrical Eng.  
The most important occurrence of the past half-decade was the unification of students for the purpose of bringing peace to Vietnam. I believe the reductions in U.S. military strength in Vietnam are a direct result of this unification.

Richard Noce, Rocky Hill, Conn. Mechanical Eng.  
Young people working for changes, not sure what the changes should be. Coming out of school with technical but little social knowledge, wanting to help the world, but confused on what my next step should be. In ten years?

Michael F. Noonan, Wakefield, Mass. Finance.  
"I'm quite sure that I have no race prejudices, and I think I have no color prejudices . . . Indeed I know it. I can stand any society. All that I care to know is that a man is a human being . . . that is good enough for me; he can't be any worse."

—Mark Twain

Deborah B. Novick, Richmond, Mass. Industrial Relations  
My college years were a change to mature. Just being away from home, getting active in school life, and making new friends have helped to achieve this feeling. Probably my biggest impression during the past five years has been the evolution in women's dorm life and the participation of N.U.'s students in the strike against Nixon's involvements in Cambodia.

Thomas B. O'Donnell, Lynn, Mass. Electrical Eng.  
As a direct result of world events in the past five years I find myself emerging from a cocoon of apathy into a new awareness of my surroundings and regarding my life and its relevance in a new disquieting manner. The advantages of university life, which I regarded unconsciously as somewhat of a retreat into oneself, have instead caused me to be shoved into the turmoil of a new age of social concern.

Thomas M. Osborne, Allston, Mass. Electrical Eng.  
Those in the university who develop ideas and form theories about the structure of society should not condemn those in the community at large who do not agree.

Pamela A. Pandolfo, Revere, Mass. Math.  
Change is at the core of growth. Yet, change is not total rejection of the "old." It involves choosing the best of the "old" or "established" and the best of the "new." If we totally reject the "old" our "new" can be nothing but shallow.

Jean M. Panepinto, Braintree, Mass. Electrical Eng.  
The past half-decade at Northeastern has made me aware and concerned with the problems of our country and the world, as well as given me a broader view of life.

James W. C. Parker, Brookline, Mass. Electrical Eng.  
Northeastern has been a place where I have matured, through classroom education, but more important at my co-op job. My co-op job taught me what outside competition is like, and that there is no teacher like experience.

Pashion P. Payton, Buffalo, N.Y. Pharmacy.  
The past five years have provided an interesting experience which will last forever. Social change has finally recognized the Black student and events such as the Dr. King assassination made one question his existence as a human being.

Roger D. Perham, Lynn, Mass. Electrical Eng.  
Martin Luther King has shown us that peaceful persuasion does work. He has demonstrated that it is possible to change a person's mind by quiet talk in a friendly manner rather than by harsh threats in a loud voice.

Robert J. Piantedosi, Holbrook, Mass. Mechanical Eng.  
The ideologies and life styles of men such as Robert Kennedy, Cassius Clay and Martin Luther King, impressed and influenced me the most. The sacrifices and tribulations these men had to suffer through because of their beliefs instilled in me a rekindling of hope for the future of mankind.

Roger Pierce, Reading, Mass. Education.  
The university as a microcosm of the world; very confusing. The letter of the law rather than truth reigns supreme. Needed: constructive changes until we have Woodstock on a universal level. More patience and tolerance. Less repression. Love people, not things.

Pamela Genie Pittman, Dorchester, Mass. Nursing.  
The past half-decade has been healthy for most Blacks politically working in the system. The expression of civil disobedience has brought new laws—Civil Rights Bill, etc.—but the tactic of violence is at an end. The relevancy of the Black nurse excites me—working for the short-range health needs of her community to insure a healthy start for Black and White youths to join the struggle.

Lauren (Ketchen) Potter, E. Weymouth, Mass. Education.  
"Women and men (both little and small)  
cared for anyone not at all  
they sowed their isn't they reaped their same  
sun moon stars rain"

—e.e. cummings

Barbara F. Poulter, Boston, Mass. Nursing.  
Changes have taken place and will continue to take place as long as individuals remain free-thinking and work together to achieve a society that is free, equal and concerned with the welfare of its people.

Albert Raymond Quinn, Weymouth, Mass. Civil Eng.  
Students have become more responsive to the outside world. They no longer are primarily socially orientated as they are socially and politically concerned.

Edward Paul Raccio, Hamden, Conn. Chemical Eng.  
It has been a time of change. The youth of today has become keenly aware of the existing problems. By working to solve them, hopefully with as little violence as possible, we will discover a new and more peaceful world.

James M. Rafferty, Reslindale, Mass. Management.  
The past five years have not, by any means, been happy ones for the people of the United States. The Vietnam War has divided the greatest country in the world to an extent to which it has never been divided. We can only hope for the strong leadership needed to end this war.

Elizabeth Rand, East Patchogue, N.Y. Physical Therapy.  
"Life is all encompassing." We should live it as it comes—day by day, and try not to destroy ourselves by over-population, pollution, war and hatred.

Susan Rand, Woodcliff Lake, N.J. Physical Therapy.  
As a dormitory counselor and therefore part of the "establishment," I have frequently overlooked rules because I didn't believe them valid anymore. Three years ago I did.

Stephen C. Raphael, Canton, Mass. Mathematics.  
In any half-decade we are exposed to many people—consider each to be good until proven bad; and indeed, if some prove to be bad—treat them good, and who knows . . . perhaps peace.

James W. Rathbun, Quincy, Mass. Education.  
"Gentlemen, it took you 184 words to ask me to use "40 words or less" to sum up 5 years of experience.  
You couldn't do it and neither can I."

Ronald Reed, Melrose, Mass. Accounting.  
In the pursuit of affluence we have created a corporate state whose foundations are based upon exploitation and expediency. A reordering of our priorities and reallocation of our resources are the only solutions to the crises we now face.

Thomas J. Regan Jr., Charlestown, Mass. Mech. Eng.  
The United States will continue to regress until its citizens and leaders shed their amazing indifference to the slaughter in Vietnam and the killings of students at Kent State and Jackson State.

Steven L. Remillard, Lynn, Mass. Industrial Eng.  
In five years, we've all matured five generations. We've created an awareness of social injustice as well as showing a need for population and pollution control. Our corrupt environment can only create a corrupt society.

Scott L. Reynolds, Waban, Mass. History.  
"I have made a ceaseless effort not to ridicule, not to bewail, nor to scorn human actions, but to understand them."

—Spinoza

Linda Kay Riccio, Newton, Mass. Education.  
The past decade has been a time of change, antagonism, hate—a time of people tenaciously clinging to a past ideas and institutions, and people rejecting the past completely. More people should be understanding and sensitive to others, take an outside view of ideas, construct instead of destruct, truly promote love and understanding and peace.

Edward Rice, Owings Mills, Md. English.  
At Dawn's sudden light,  
A thought-enslaved Steppenwolf spirit  
Begins to prow! an Afternoon.  
Tactful tea environment, a place  
Seemingly ensnared by the presence of  
Social pretense, and then continues  
An enraged search for viable words  
Devoid of Blackness in meaning.

Carl Rich, Gloucester, Mass. Mechanical Engineering.  
As there are more and more humans and they are closer and closer together physically, they get farther and farther apart. Crowding leads to irritation, fear, and hate. Each man must find his own room to survive. Personally I prefer sea gulls.

Susan Ann Robertson, Westwood, Mass. Nursing.  
It was the best of times; it was the worst of times; *and* it was five years of my life!

Douglas R. Roeck, Troy, New York. Chemical Eng.  
Woodstock—symbol of truth, happiness, love and peace. What good is a silent majority? "Easy Rider"—some people refuse to change with the times. "MASH"—cannibus, Maine, Bruins, Margy—good! Agnew, assassinations, Chicago (convention and trial), Vietnam—very very bad.

Barbara Rose, Marblehead, Mass. Elementary Ed.  
The past five years at Northeastern, both in school and on my various co-op jobs, has given me immeasurable experience and knowledge that will certainly shape my future as no other single event has during the past half-decade.

Ken Rowland, Melrose, Mass. English.  
Five years of learning and forgetting; waiting and doing; of watching and failing; of hoping. Five years looking to five more years and remembering:  
one often works for meanial's hire,  
only to learn dismayed,  
that any wage asked of life,  
life will willingly pay.

Ronald Carl Roy, Biddeford, Maine. Accounting.  
The past five years have been a time for growth. Not a physical growth, but the growth of friendships, better understandings of some things and in other cases, misunderstandings of people and things.

Edward Rubin, Hyde Park, Mass. Modern Language.  
I came. I saw. I did not like what I saw. I learned. My world fell down around me. I learned. Now I go out to build a better world than the one I learned about. And hope for peace.

Richard Vernon Rude, Reading, Mass. Modern Lang.  
These past five years have witnessed a great change on the national as well as the academic scene. Social awareness has assumed a prominent place in our value systems. With a continuation of the present humanitarian trend, many of the problems extant in our society may finally be rectified.

W. Russell Rylke, Hyde Park, Mass. Education.  
The past has afforded us with that precious unknown, "time," upon which we can plan and recollect; a commodity that the future can only offer but can't promise a given quantity to anyone being or object . . .

Kalman Saffran, Chelsea, Mass. Physics.  
The past five years have bred an atmosphere of change. Good change, bad change, peaceful change, revolution . . . change. Beneficial change can only be accomplished by people, all people, united.

Robert Sandell, Westbury, N.Y. Marketing.  
The university is the citadel of man's learning and of his hope for further self-improvement and is the special guardian of this heritage. Those who work and study on the campus should think before the risk its destruction by resorting to force as the quick way of reaching some immediate goal.

John Sarni, Melrose, Mass. Electrical Engineering.  
The past half-decade has made me aware of the changes that are urgently needed in the world. I realize that we must stop fighting wars, stop polluting, change our educational systems, control population and redirect our priorities. My responsibility is to work toward their solution now.

Herbert Paul Sathan, Mattapan, Mass. Elec. Eng.  
"Before man chokes on his own garbage, he has to combine legislation and technology to clean up the world he has fouled."

Joseph Savy, Peabody, Mass. Accounting.  
I feel it is not the system of any matter which determines it as bad or good. It is by whom and how it is run. Governments on paper can be very good but Russia had Stalin, and the U.S. has its cheap politicians that care less about the people they serve and care more about being in office. Blind voters without looking at the issues but at the pretty faces are to blame.

Richard P. Schuit, Wyckoff, N.J. Accounting.  
In all the time spent at Northeastern, no one influenced my life or helped me more than Jesus Christ. In this time of continuous change, he is the "constant" who was, and will always be, my source of strength and guidance.

Paula Elaine Lebel Schultz, Peabody, Mass. Nsg.  
May events such as college, co-op, riots, students strikes, elections, etc., have changed my life and increased my maturity. Most important to me, though, is my knowledge of people and how to react to them and communicate with them and accept them and their social setting. I can't pinpoint any particular events, but each has had an impact.

Alan Michael Schwadron, Merrick, N.Y. Management.  
It's all so discouraging, looking back . . . We did it all before and we'll do it again. Will we ever see the tragedy? Will we ever learn any lessons from it?

Deena (Gorin) Segal, Randolph, Mass. Spch. & Hrng.  
History can repeat itself. It has shown the paradoxical side of the U.S., a nation that can send men into space and control them on earth, but can't control a war. I feel that my education and the people I have met have helped me to accept and cope with each human being for what he is, not for what he isn't.

Larry Shapiro, Saratoga Springs, N.Y. Economics.  
Five years of one's life—a capsule account. The war, the draft, the war, more finals, protests, politics, Johnson, Nixon, McNamara, Boston, the war, the draft, bigots, violence, burn, baby burn, keep the faith, baby, the war, school. I don't like it all, but It's happened.

Robert L. Sheppard, Jr. Winthrop, Mass. Mathematics.  
During my years at Northeastern, the Yacht Club celebrated its most rewarding seasons. As Commodore, my association with people in the yachting world helped me develop the confidence and assurance which are vital in the coming years.

Helen L. Shotwell, Medford, Mass. Nursing.

Walter Sivigny, Hamden, Conn., Electrical Eng.  
Five years of emotions flowing constantly from despair to hope and back, punctuated by the regularity of weekly body counts. The world has aged five years and I ten times five. There's a chance peace will come in my life.

Paul Sjöberg, Moulton, Maine. Psychology.  
Life for the college student in the past half-decade has proven that the scholar should not only concern himself with academics but should voice his opinions concerning events happening in his world. How this function is performed depends upon the individual student's rearing, association of friends, social values and future outlook on life.

George J. Soukaros, Hyde Park, Mass. Education.  
Our society seems to thrive on change and improvement. The younger generation reflects it, many attend college to obtain it, and even wars are fought because of it. I hope this "improvement" is worth the price we are paying for it.

Winthrop Staples III, Randolph, Mass. Biology.  
The paradoxical realities of these times are best expressed by the following sarcastic remark:  
"Blessed are the peace-makers  
They keep me in business."

—Maj. Myron Dydurk, 7th Air Calvary, US Army  
Advisor to Northeastern Counter-Guerrilla group '67-'69.  
Killed in Vietnam April 1970, but Gary Owen still lives.

Marc J. Stern, Hull, Mass. History.  
Education and change is the story of five years at Northeastern . . . activism, war, peace, a library which never materialized. Man's glory at its highest on the moon, at its lowest with the treatment of the poor. Five years ago everything was "normal", but what of today . . . tomorrow?

Douglas W. Stevens, Brockton, Mass. History.  
An ever widening, engulfing, embittering, dividing war forcing we seniors to become cynical, defiant, less conservative, more dissatisfied with the political and social American system as it has been imposed on us, one which has seen our leaders, countrymen and fellow students slain. For WHAT?

Jeffrey Stohn, Malden, Mass. Political Science.  
The past half-decade, I believe, has been featured by national and international ferment generated by certain crucial events and by influential statesmen. Our college years will be remembered as a time when men sought peace at a price of war.

Pamela A. Stone, Newport News, Va. Education.  
These are the days of conflict—within the society and within the individual. Perhaps the resolution of the struggle within each individual for peace of mind is a vital prerequisite to world peace.

Robert P. Suarez, East Rutherford, N.J. English.  
This seemingly ever-present slice of years, holding such an impact on our lives, our times and our society, will soon enter into the pages of history and succumb to mankind's eternal desire to release the past and prepare for the future.

William F. Sullivan, Woburn, Mass. Mathematics.  
As the years moved on the violence grew and civil disorder thrived. People have become aware of the world around them, and their own capabilities. Great strides are made in the field of medicine to save lives, and yet the Vietnam War continues and young people destroy themselves with powerful drugs.

Arthur Suskevich, Nashua, N.H. Business Adm.  
The past five years have seen a great deal of change in the college way of life, where demonstration has become an action through which much good/evil has been done. I am proud to have taken part in this change of Northeastern, where it is being done in an intelligent and responsible manner. It is the process of building a better school not destroying a believed inadequate one.

Charlie Swartz, Marblehead, Mass. Education.

My education has caused me to believe life should be viewed with as much emphasis on means of accomplishments as goals. We should help people to help themselves become responsible by providing them with hope, a will to improve, and the needed education.

Robert P. Tardiff, Manchester, Conn. Accounting.

The last five years have seen the birth of a period of social awareness, initiated largely through the efforts of those of us in college. I hope we will all continue to work for solutions to the problems of this country, rather than become members of the "silent majority."

Bernard Tautkus, Whitman, Mass. Management.

During the past five years social unrest has predominated in our society. Created by the striving for equality by minority groups and a heightened awareness and involvement by the "younger generation." I feel that this unrest, although sometimes violent, is the catalyst which will eventually bring the problems of this nation into focus and final resolution.

Peter M. Testagrossa, New London, Conn. Mathematics.

These years were a time when students rose up and voiced their opinions on almost everything which caused great upheaval all over the world. I have gained a lot from being part of it all. I only hope that society has been affected as much as I have.

Richard J. Thorton, Saugerties, N.Y. Civil Eng.

The action taken by the university and many other colleges and universities in the spring of 1970 cannot help but bring to our attention that this nation is in trouble. It is a time that America do more for Americans.

Bruce Tis, Boston, Mass. Electrical Eng.

From my limited observation of individuals, whether singularly or collectively as a society, I have ascertained that the most progress occurs when selfish, materialistic, sensual thoughts and actions are replaced with a more spiritualized state of thought, which results in an unselfish love for all mankind.

Richard B. Tourangeau, Middletown, Conn. English.

To change the presently outrageous conditions of government and society, knowledge must be gained of these laws and institutions. We have been lied to long enough. If the pen is really mightier than the sword I will do my part until THEY no longer sell ink. "Sometime you just have to put yourself out."

—me 1970

John D. Trachy, Franklin, N.H. Finance & Insurance.

The past five years have been characterized by change. The deaths of Kennedy and King plus the war have caused us to become concerned and involved. A social consciousness has been acquired that is now a guiding factor in our lives.

Sarandos N. Traggis, New London, Ct. Mechanical Eng.  
The last five years have taught me to try to use every freedom I have to the fullest, while letting others do the same. Only in this way will I always have these freedoms.

James E. Trant, Somerville, Mass. Civil Engineering.  
During the past five years, the most moving thing of importance was the Peace Movement. While I concur with the thoughts I do not agree with the methods. The violence of these years can never be forgotten. It should stand as a model not to be repeated.

Mary Ann Tricarico, Millbury, Mass. History.  
"Look to this day,  
For Yesterday is only a vision;  
But today well-lived  
Makes every yesterday  
A dream of happiness.  
And every tomorrow  
A vision of hope."

—The Sanskrit

Gregory L. Triplett, Bluffton, Ohio, Elec. Eng.  
The years 1966-71 have been an educational experience. Book learning, although important, has not been as valuable as learning to think, to work, and to live with others.

H. Hugh Troutman, Harpswell, Me. Fin. & Ins.  
The recent past has had still undefined and unlimited impact. And what is more revealing than physical confrontations; only to inevitably demand inner examination and hopefully reality.

Arthur L. Vaillancourt, Dracut, Mass. Accounting.  
Campus life has changed to a great extent the same way life in general has changed. People are more concerned with what a person contributes to society than with his appearance. People are more free to say what they feel they must. More people are willing to listen to the suggestions of others before giving their own views.

Donna Marie (Battista) Vallee, Billerica, Mass. Ed.  
"A time to be born, a time to die . . .  
A time to laugh, a time to weep . . .  
A time to dance, a time to mourn . . .  
A time to build up, a time to break down . . .  
A time to love, a time to hate . . .  
A time for war, a time for peace . . .  
A time we may embrace, I swear its not too late."

Frank Orlando Verni, Pert Chester, N.Y. Pharmacy.  
For the most wealthy nation in the world, we spend more money on promoting mass murder such as wars, germ warfare, chemical warfare, then on fighting man's most dreaded enemies: cancer, heart disease, etc. But, this is the disposition of man.

Frank M. Vieira, Cambridge, Mass. Fin. & Ins.  
The event I feel most important is the sometime violent, sometimes peaceful social revolution characteristic of this period. The result has been a strong and often violent polarization of the members of our society. I hope in the end we will all live in harmony no matter what our race, religion, or national origin, or political conviction.

Joseph J. Vitaliano, Long Beach, N.J. Biology.  
My whole outlook on life has changed since I have been at Northeastern. College has expanded my way of life and helped make some decisions. My studies, my relationship with people of different backgrounds have helped me greatly. But college was also an experience—the War in Viet Nam, pollution, violence, our political system—that showed me what the world is.

Robert E. Vogel Jr., Burlington, Mass. Mech. Eng.  
Conservatively liberal. Northeastern—Burlington. Country Club, ROTC, computers, soaring, Boston, SDS 4Q, mountain climbing, liberalization, Viet Nam, McCarthy, Chicago, Oct. 15, Canada, Peace-Now!, AMC N.H. 4000, Draft, 239-Mar. 20, Why Biafra? Why Vietnam? Why? Metaphysics, radicalization, Where Now? Why? Apathy, Effort, Agnew, Frustration.

Richard B. Votapka, Oceanside, N.Y. Civil Eng.  
Recapitulation (1966-71)  
Society of American Military Engineers, Silver Masque Stage Crew, Your Father's Moustache Banjoist, Deaths of Robert Kennedy, Martin Luther King, Eisenhower, Moon Landing, Mortatorium, Mets, American Civil Engineers, Earth Day, National Student Strike, Graduation.

James A. Vrabel, Wilsonville, Conn. English.  
I learned on the road where it's only what you know;  
Now I'm afraid in the streets of the city.  
I'm going out while the hard rain's falling—  
Lord, Lord, don't take away my highway shoes.

Randal G. Wagner, Allentown, Pa. Electrical Eng.  
Maybe I'm amazed.

Michael A. Wajer, Baltimore, Md. Power Systems.  
Borrowing from Thoreau, my life as a student is not completed.  
My purpose is not to "play" life or "study" it but rather to "live"  
it earnestly from now until the end.

Joel L. Warsof, Millis, Mass. Electrical Engineering.  
Since these five years have been hectic for me, I can say that an  
episode of "Mission Impossible" has ended and a new one  
begins.

Virginia Weidel, Freeport, N.Y. Accounting.  
To merely say it's been an experience is not enough. It's been  
more than an academic education—it's been an education about  
myself, other people and the world. In the microcosm of the  
large university we have seen politics at play, riots, social  
unrest, racial problems and more. Hopefully, from this, we have  
gained an awareness that we did not possess five years ago.

David Weiner, Medford, Mass. Management.  
The biggest achievement I have witnessed in the last half-decade  
is my getting through Northeastern's five year co-operative  
work-school program. One of the big changes noticeable has been  
the conservative to liberal life-styles of college people.

Leonard D. Weiner, Lowell, Mass. Marketing.  
The past five years American society has been severely tested.  
The needs for greater interaction and understanding between  
groups, constructive not destructive participation, protection of  
individual rights, and a government that realizes its obligation  
to young and future generations are imperative.

Kenneth E. Weise, Trumbull, Conn. Electrical Eng.  
Out of the turmoil and relative uneasiness at the last half-  
decade, some people are beginning to examine closely the forces,  
events and institutions which have seemingly automatically de-  
termined their lives. Relevancies and priorities are being es-  
tablished and hopefully, in the coming decades, solid and con-  
structive change, long overdue, begin.

Richard T. Westcott, Quincy, Mass. Civil Eng.  
 Suppression breeds violence. There are definitely policies and priorities which must be changed. The government and other people in power are obligated to heed those calls whether they are unpleasant or not. A country grows old and stagnant when it tries to suppress unrest. Everyone suffers from stalling ideas which could pave the way for a more moral and just society.

Allan Noah Williams, Waban, Mass. History.  
 The evolution of man is a series of reactions to or against beliefs, institutions, and ways of life, not merely an evolving of events and ideas. New eras build on past experiences but are often responses of dislike for existing ways. Hence, the hypocrisy of our social order has created reactions of frustration and hatred directed toward the standing social order.

Arthur L. Wing, Auburn, Me. Accounting.  
 The change for the better in social concern is in danger of being slowed by Agnew and the Silent Majority.  
 "Come mothers and fathers, throughout the land,  
 And don't criticize what you can't understand.  
 Your sons and your daughters are beyond your command,  
 The old world is rapidly aging..." —Bob Dylan

Michael Winter, Hyde Park, Mass. Marketing.  
 In five years we have seen a progression of war both exterior and interior that has divided our nation. Our values have drastically changed, we despise our system, yet we exploit it. The Revolution has changed our society, but the latter will destroy it.

Paul R. Winters Jr., Belmont, Mass. Management.  
 Educated in a period of crisis one comes to realize that only through sincere and orderly dissent can one search for truth and understanding concerning the problems of man.

Ira Winthrop, Revere, Mass. Mechanical Engineering.  
 The past five years have been a time of great social and political change in the country. This is reflected by the college students' new and increased involvement in the society in which he lives. Hopefully, the student and society will benefit from it.

Brian James Wyman, Lowell, Mass. Political Science.  
 Violence has played a major part in the history of the past five years. Assassin's bullets and revolutionary's bombs have done little to alleviate social ills. The country has become divided and polarized.  
 "We are the unwilling  
 Led by the unqualified,  
 To do the unnecessary,  
 For the ungrateful."

Sally Yardley, Andover, Mass. Nursing.  
 My reaction to the events of the past half-decade is one of anxiety, despair and hope—Anxiety over the countless unreasoned murders; Despair that change is often ignored if realized; Hope that our generation will continue to strive for peace and love, not only in relation to themselves but also others.

—a Vietnam veteran

Alan A. Aldrich, Quincy, Mass. Economics.

The years 1966-1971 have been hardest years for the youths of this country. Having an unwanted war hanging over their heads with no end in sight; and watching those leaders they could identify with being killed or persecuted. I hope that in the very near future that a leader will emerge to bring this country back together.

Larry M. Beinema, Whitinsville, Mass. Management.

The obsession by the United States with the Indo-China War from 1965-1970 and more than 40,000 battlefield deaths profoundly effected the thinking of college students such as myself. Although rapid social change was evidenced many problems seemed intensified on the college campus, such as racism, drug culture, crime, and political expression.

Susan Bernstein, Linden, N.J. Sociology.

New faces, new friends . . . New England winters . . . Jan. 14, 1967 . . . The passing of Martin Luther King . . . frustrating academics . . . friends and more friends . . . The passing of Robert F. Kennedy . . . astronauts on the moon, poverty on the earth . . . an evening with S. Hiyakawa . . . Kent State . . . STRIKE . . . Vietnam . . . more exams . . . graduation at last . . . June 26, 1971.

Kent D. Bradley, Sturbridge, Mass. Mathematics.

The youth movement in America is a Communist plot. Unless something is done soon to curb the reactionary repression by the Establishment, the Communists will emerge victorious.

James J. Brennan, Quincy, Mass. Journalism.

It was the worst of times,  
It was the best of times,  
War did not cease,  
But we worked for peace.

Ralph G. Brown, Braintree, Mass. Electrical Eng.

There's were the themes of a half-decade: Assertions of love and expressions of hatred; dipoles of Woodstock and Chicago, McCarthy and Agnew, hippy and hardhat, sexual freedom and social concern; napalm, hydrogen bombs, polarization, uncertainty. Northeastern University 1966-1971.

Allan W. Cameron, Milford, Mass. Finance.

College has provided an opportunity for learning about ourselves, our environment, and, above all, about the imperfection of man and his institutions. Let us seek reformation through perfection of ourselves; our institutions will follow. Let's improve, not destroy the traditions our forefathers have bestowed upon us.

David Amiralian, Burlington, Mass. Education.

"There's something happenin' here. What it is ain't exactly clear . . . There's battle lines being drawn. Nobody's right if everybody's wrong. Young people speaking their minds. Gettin' so much resistance from behind." Our generation must finally solve the domestic problems that have been passed from father to son.

Ellen Jill Berkowitz, Lake Mahopac, N.Y. Education.

The past half-decade has enabled me to see America as it really is. The assassinations of such men as Bobby Kennedy, and Martin Luther King, the mass murders in Vietnam, the shooting of students who were exercising their right of dissent, were events which had great significance for me. It has been gloomy!

John H. Blackburn, Uxbridge, Mass. Mechanical Eng.

Students have become a major driving force of efforts seeking reform. Campus reactions to events, however, have all to often been spontaneous and violent. If we are to improve our society we must learn to temper our knowledge with wisdom.

Robert D. Brautigam, East Williston, N.Y. Drama.

What's her face  
Simplicity and Absurdity  
Theatre

Christine Brisbon, Somerset, Mass. Biology.

The past half-decade has been a time of radical change brought about by awareness. This awareness has been exemplified by the students of our time in reaction to the Vietnam War, Kent State murders, racial integration, and increased crime rates. Campus unrest has been the students' way to demonstrate his protest against the happenings of our time.

Richard H. Brown, Wayland, Mass. History.

Escalating the war, Nixon and Agnew have failed to defeat the Vietnamese, who persevere in fighting for their independence. These two demagogues, as AGENTS PROVACATEUR, are doing everything in their capacity to discourage peaceful solutions to domestic issues.

Paul N. Campus, Ipswich, Mass. Modern Languages

Reflecting upon the past half-decade of oppressions and turmoil in American society, it makes me wonder whatever happened to the right to life, liberty, and the pursuit of happiness. Neither can I look to the future with optimism.

Arnie Cann, So. Essex, Mass. Accounting.  
After over 1750 days and \$6500 it has reached an end. All hail Northeastern?

Paula A. Cardran, Haverhill, Mass. Psychology.  
The past decade has been one of immense change. More people have become disillusioned with the idea that problems will work themselves out . . . Action has been made a vital part of all groups wishing to see progress. Perhaps the black movement, their struggle to attain "inalienable rights," began the "revolution" against existing conditions. Repression has helped people realize our government is only practicing equality for the few.

Enzo Carrara, Framingham, Mass. Industrial Eng.  
Within the past five years, my ideas and attitudes on life have changed considerably. The atmosphere which surrounds me is one of perplexity and turmoil. I have become aware and also appreciate the simple patterns of life. At the same time, I realize that we ourselves have made confusion out of this simplicity.

Ronald L. Capaln, Waba, Mass. Management.  
After five years of hearing new answers to old questions, I pray five years from now the new way will prove to be the right way, for there will be no turning back.

Paul C. Cargill, Higham, Mass. Management  
"So many Gods, so many creeds, so many paths that wind and wind, while just the art of being kind is all the sad world needs."

Frank J. Casasanto Shrewsbury, Mass. Electrical Eng.  
When the violence of hunger, unemployment, pollution, insufficient housing and education has ended. When the violence of exploitation and oppression of the peoples has ended. Then we will have achieved true equality, freedom, and peace.

Candace Susan Chung, Fall River, Mass. Psychology  
Five years. It seems like a long time. But is it really? We have discovered that there is a need to bring every problem out into the open—not only to accept the beautiful, but the ugly also.

Thomas F. Codyer, Acton, Mass. Psychology.  
Nothing can justify the violence in Man's history, ancient or new. Perhaps if he learned from his mistakes, it might be justified. But, as the last few years have shown, man has not learned from his violence.

Michael S. Cogan, Saugus, Mass. Electrical Eng.  
Who, what, when, where, how, why? These questions must be answered before one can take his place in society. College answers what and why. Co-op answers when and how. Society dictates where. The latest social upheavals are concerned with who.

Janice Leslie Cohen, Revere, Mass. Journalism.

1. Live and let live.
2. You could say "we" want to be free. I can say some day "we" will be.
3. Hope helps us pass the days, brings sunshine, gives courage to go on, gives the young spirit. But does tomorrow come for those who do not believe?

Kenneth A. Cohen, Taunton, Mass. Chemical Eng.

We students at Northeastern, like other students all over the nation, have participated in a movement—somewhat vague and undefined. Yet its idealistic axiom of creating a better world has somehow survived. It is still a dream, time will tell how much a reality we can make it. Things cannot be changed overnight, but eventually . . .

Angela Cristini, Palisades Park, N.J. Biology.

Incongruities: 1966-71—Halt the bombing . . . Send more troops to bring peace . . . napalm . . . Invade Cambodia for its own protection . . . radio active waste dumped in ocean . . . peanut, peanut, the university supports the war . . . Bobby Seale bound and gagged in a court of law . . . morality and conscience . . . the girl at Kent State screamed . . .

Richard T. Curley, Whitman, Mass. Political Sci.

These years have been an awakening of sorts for all of mankind. Our globe is tiny, still we have reached the moon. Man has not yet learned to reach his fellow man. Let us all devote ourselves to this task.

Thomas Doran, Lexington, Mass. Sociology.

I wasn't going to bother writing this  
it's been said too many times before  
it even sounds trite writing it  
but even the ones you thought heard it  
didn't  
and the other ones didn't even try  
but that's a selfish attitude  
that has no place in the world  
one must find their own way  
but I still don't understand why

William N. Duffey Jr., Bedford, Mass. Mkt.

"The time has come, the walrus said, to speak of many things. Of shoes and ships and sealing wax, of cabbages and kings."—Lewis Carroll

So much was promised and talked about in the sixties. It hurt most to lose the Kennedys, and the boys overseas—when will that bullshit stop? So much promised, but . . . maybe the walrus is right?

Michael Thomas Doran, Lexington, Mass. Ind. Rel.

The beginning of wisdom is a just appraisal of one's ignorance. This familiar quotation is the best answer I have to the questions of these past five years. I only hope that all people and all nations reflect on this quotation and help one another.

Paul F. Doucette, Braintree, Mass. Phys. Ed.

The past five years have been a good time to be in college—to be exposed to the questioning and uprooting of the philosophies, life styles and traditions. To me the 60's have been the "complacency" years. In the 70's will be confrontation; discussion and I hope understanding between men of ideas.

David Eastwick, Proctor, Vt. Electrical Eng.

Stop the Vietnam War! Will this war ever end? The Moratorium is the answer! What good did that do? Ecology . . . surely everyone wants a clean environment . . . stamp out pollution! Why isn't anyone listening?

Leslie (Finn) Feldman, Quincy, Mass. Soc.

The past half-decade has been one of new awarenesses. People are becoming concerned with the ills of the society which they have created. Some are seeking to ameliorate it, as I am, others to destroy it. Only when these factions join will they be able to bring about change and the betterment of the society.

Scott Charles Ferguson, Salem Mass. Education.

Teaching high school students about their own environment is what I will do, or social working if teaching does not work out. Thoreau had his Walden Pond and I shall have my own high school in which to create my own destiny.

Jane E. Firth, Brookline, Mass. Recreation.

These five years will be remembered for events ranging from two assassinations, the continuation of a useless war which led to an all-college strike, and meaningless deaths to scientific breakthroughs such as man's landing on the moon. These events and others have emphasized the worthlessness of prejudice and war and a stronger desire for peace and togetherness.

Tony L. Edger, Harrisburg, Ky. Pharmacy.

From the Bluegrass of Kentucky to the Blue Hills of Boston, a Southern Liberal sums up his Northeastern experiences, per se: Quote: "In all matter of opinion, our adversaries are insane."

—Samuel Langhorne Clemens

Shaun G. Figgleson, Framingham, Mass. Mgt.

Why does the richest and most highly educated nation continue to carry on senseless war which threatens to tear it asunder? Why does this same country polarize itself on all issues? Why does emotion rule over love and intelligence?

Richard L. Elkins, Brattleboro, Vt. Pol. Sci.

Reactions—In a university everyone chooses the same subjects, without verbs or predicates, and the subjects endure: glorious past, unlimited opportunity, challenging future, dedication, inspired leadership, enlightened followership, rededication, moral fibre, spiritual values, outer space, inner man, higher ideals...

Frank E. Federman, Peabody, Mass. Elec. Eng.

"Politics, war and social upheaval pervade this period, but the widespread realization that we must stop the waste and pollution of our environment's resources is to me the most significant occurrence of the past five years.

Nancy (Fraser) Ferguson, Amherst, N.H. Nursing.

These past five years have been an experience of learning; knowledge of technicalities and of people. It has been a leading out to a new way of life, to an awareness of other concerns rather than just my own. As journeying through life, I have learned to live by the way.

Gerhard Fichtl, Hauppauge, N.Y. Chem. Eng.

These past five years have been filled with happiness and sorrow, war and no peace, Johnson and Humphrey, Nixon and Agnew, Kennedy and King, and Mary and Me. Obviously times of mixed emotions.

Leslie Forman, Malden, Mass. Management.

I feel over the past five years there has emerged a greater awareness of the troubles that have confronted society. The answers are not to be found by radical action, but rather a peaceful method of working to improve the system, which has given us the freedom to change it.

Thomas C. Gaputis, Roslindale, Mass. Chemical Engineering.  
Change, merely for the sake of change, secures destruction and promises nothing. The foundation is solid. Let us rebuild upon that foundation, and thus insure the integrity of the structure.

Donna Gatnarek, Wallington, New Jersey English.  
Recent events assure me the world is a gigantic cauldron. Waters and oils are hopelessly spun about by the elusive ladle of human nature. The mixture is doomed because barely an ingredient understands the properties of another.

Sara Griffin, Schenectady, N.Y. Physical Education.  
The times will change  
but pray the times  
will never change the now

William M. Hall, Dewitt, N.Y. Mechanical Eng.  
The most significant thing of the past decade was the way a small group of students took the Cambodian issue and duped most of the rest of us into thinking we had had our constitutional rights infringed upon and that we were revolutionaries out to set things right. All we succeeded in doing was losing six weeks of class.

Richard A. Heath Jr., Waltham, Mass. Sociology.  
The people demand an end to the war in Vietnam, but it goes on. They demand an end to oppression, but it continues. They demand a government responsive to their needs, but it remain responsive only to corporate interests. What happens next?

Michael A. Hickox, Boston, Mass. Philosophy.  
These years have been headlined by war and violence. Yet love survives and relentlessly tries to make the world a place of joy. I pray we can help to bring celebration into the world and that I may read this in the year 2020 and be glad.

Alan L. Hooker, Laconia, N.H. Mechanical Eng.  
I came wanting to be an engineer.  
I leave wondering if I will ever be one.

Glenn Edward Gately, Weymouth, Mass. Marketing.  
The most significant thing about my five years at Northeastern was the amazing awareness that the student world had for what surrounded it. I'll never forget the cries of injustice and the attempts and suggestions that my contemporaries made. In years to come these words I have written may seem foolish but only time will tell.

Aloysius Richard Geelhaar, Baltimore, M.D. Math.  
The past half-decade has been one of hope. There have been beginnings in a total search for peace, especially among the young. Racial barriers have shown evidence of falling, although the cost has been tremendous. I can only hope that these trends continue in the future, and that we obtain our goals of peace and brotherhood.

Mark L. Grossman, Framingham, Mass. Management.  
I am very thankful to be involved in a university during the years in which the world recognized youth not merely as a resident but as a productive being with contributions to make to society. I am proud to be part of the "Woodstock" nation where youth from a variety of backgrounds proved to the world that 400,000 human beings could live together in peace.

Nancy Hailey, Woburn, Mass. Psychology.  
As a freshman, I entered college seeking the answer. As a senior, I am leaving college seeking the question.

Monroe Heyman, Boston, Mass. Psychology.  
In 1966, students wanted reform, today complete change. The leaders of youth have been eliminated either by assassination or by political maneuvering. The war in Vietnam has been extended into Cambodia. Civil rights are still in the 1950's. The system's promises have not come true. In the last five years, I have grown tired of peaceful protest.

William Hoag, Cranston, R.I. Industrial Eng.  
After one hundred and ninety five years of existence, America's "melting pot" has yet to feel the presence of a flame.

Richard W. Hunter, Abington, Mass. Electrical Eng.  
Awareness of our social ills has become increasingly manifest over the past decade. From civil unrest to open revolt, this concern has been prominent display. Awareness alone, however, does not necessarily assure meaningful reform. The events of the next decade will determine whether this awareness will bring about a mere harmonious state, or one crippled by the forces of anarchy.

Peter Hutchinson, Nashua, N.H. Mechanical Eng.  
The sixties will go down in history as an age of revolution. The young, as well as many others, will continue to revolt to build a better world, a more pleasant environment, a more just social order, and greater freedom for the individual.

Henry Jabzanka, Lowell, Mass. Psychology.  
The last half of the preceding decade and the beginning of the present decade mark the time during which a substantial number of people realized that it was time for a change. Social, political, and economic change is the answer; but these changes must be brought about within the present system if the nation is to survive and be of benefit to all.

Harbo P. Jensen, Needham, Mass. Chemistry.  
Although all of our problems are not purely technological, the solutions will probably involve a large usage of technology. In evaluating possible solutions, we must also consider new problems which the solutions may create. It is sometimes easier to prevent an anticipated problem than it is to solve the problem after it has arrived and become implanted.

James F. Keaney, Allston, Mass. Spanish.  
The sole accomplishment of one who overturns the applecart is to throw good and bad apples on the ground. Selective separation and adequate disposal of the bad—while maintaining the transport vehicle's stability—is the best means to satisfactory reform.

William C. Hutnick, Malden, Mass. Marketing.  
The years 1966 to 1971 will always mean education to me. Not only what I have learned from books and professors, but also from simply existing and perceiving. I feel the most important principle I learned is that education, money, and power are only part of one's experience and peace, love, and freedom are also matters of real consequence.

Michael D. Jacques, Somerville, Mass. Marketing.  
A time for us  
there will never be,  
when hate and greed have left this world  
for love that's free.  
A time when peace abounds on earth, and flourishes  
with true people  
who now must hide.  
They who work for death  
instead of peace.

Susan E. Karlin, W. Roxbury, Mass. Physical Therapy.  
I feel non-violent protest is probably the only tactic that will allow us to reach peace. The grape pickers used it and in 5 years accomplished their goals. If we could all get together and work non-violently for change we could do it too.

James T. Kelly, Jr. Roslindale, Mass. Accounting.  
Concern for ecology, the environment, population must result in action if man, who is now the endangered species is to survive . . . the quest will cost handsomely in both money and sweat. Some say it is impossible . . . We should not forget two important things. WHO WE ARE and HOW WE GOT HERE. In short, this is America—nothing is impossible.

Kenneth C. Keyser, Burlington, Mass. Chemical Eng.  
Northeastern has been a stepping stone of life, but though the stone may have a strong, time-enduring base, it has a many generation-worn surface. The stone needs replacing. Man's long history indicates the next stepping stones will suffer the same problem.

Chester A. Kobierski, Salem, Mass. Management.  
The last five years have been years of drastic changes. Hopefully these changes are pointed toward progress? This question will only be answered by carrying on with these changes, and by individually trying to change ourselves for the better. The last five years at Northeastern has had a major role in my personal development, the direction will again hopefully be for the better.

Kathleen Kleponis, Hyde Park, Mass. Nursing.  
Five years of studying, working and becoming more aware of mankind's problems is but small preparation in the process of gaining the courage and social and moral consciousness necessary to make improvements in this life.

Jeffrey A. Kubrick, Roslyn Hts., N.Y. Economics.  
The past half-decade has been one of great social, economic and political change. The enlightenment of many people to present situations and their increased participation in various causes will show America is a progressive society and can cope with its many problems.

Fred LaSelva, Quincy, Mass. Marketing.  
The experience of this university has only proved that a factory does not produce anything by stereotyped non-individual beings. It is the time put into living that develops an educated man. And this analysis is a little silly.

Pamela (Hunters) Leonard, Roslindale, Mass. Sociology.  
My reaction to the past five years has been a growing disrespect to those dissenters who do not allow dissent, who try to impose their ideals upon others and ridicule those who do not agree with them.

Fred Lehtonen, East Sandwich, Mass. Biology.  
I feel that in becoming the greatest nation in the history of the world, we have destroyed the quality of life in the United States. I think we have become a nation of ideologies rather than a nation of people.

Laurence S. Liebson, Boston, Mass. Industrial Engineering.  
The most significant events of the last five years are manifested in the changing attitude of the academic community. Students have become keenly aware of the environmental and sociological needs of our society. Future classes will continue which I am proud to say, we initiated.

James A. Lloyd, Norwell, Mass. Management.

Life at Northeastern has not only broadened my concepts of social behavior but it has also helped prepare me to experience a more meaningful relationship with the people and events in the environment. If these were the only values of college life, which of course they are not, then it would undoubtedly be a worthwhile venture. I believe all of us have learned from our experiences at Northeastern and that's what it's all about.

David Allan Ludden, Abington, Mass. Industrial Engineering.

The shifting of personal ideas and beliefs from suppression to expression has created a reaction that encompasses the entire range of human emotions. The results will emerge when we in turn must judge our children.

Maureen T. Lynch, Dedham, Mass. Nursing.

The last half decade has witnessed a shift in the emphasis of education: as freshmen institutions filled us with fact and opinion; as seniors we are educated to seek fact and form our own opinions.

Ronald W. Mansulis, S. Boston, Mass. Economics.

I entered college awed by the efficiency of the human system of organization. I leave fearful that technology has thrust that system or organization beyond its capacity to function, and convinced that the reassertion of man's personality, his humanity, is our imperative need.

Walter R. McCowat, Manasquan, N.J. Management.

The past 5 years have probably been the most troubled half-decade that the U.S. has ever endured. The violent deaths of Martin Luther King and Robert Kennedy, the 1968 Democratic Convention in Chicago, the Student Strike, and of course S.E. Asia. Probably the most meaningful event for me was the Strike in which virtually every college student across the nation banded together to say, "Just give peace a chance."

Stephen J. McGrail, Wakefield, Mass. Management.

In the past decade this country and the world have changed greatly. There still, however, must be more changes made if we expect to live in peace and harmony with our neighbors. The events that have acted as catalysts to bring about these changes have been the assassination, Vietnam, and the much-needed Civil Rights Act.

Steven W. Miles, Auburn, Me. Electrical Eng.

In the past five years of college at NU, I have learned many things—some in examinations, some on my co-op assignment, and some in my everyday school life. I think that the most important thing that I have learned in these five years is to never stop learning.

Robert D. Lovett, Canton, Mass. Marketing.

It is the era of hypocrites. People scream against discrimination, but demand discrimination in different forms. Cries are heard of lack of concern, when those who cry are the least concerned. It is time to become honest with ourselves.

John J. Lynch, Cohituate, Mass. Electrical Engineering.

The dominant feature of the past half-decade has been the rate at which the world has been changing. Today we seem on the verge of even greater change. Our responsibility should be to see that it is peaceful rather than violent.

Joseph L. Manfredi, Newton, Mass. Management.

I feel that the past few years have changed my life in such a way that I realize now that the war, civil rights and many of our other problems have to be solved by working together and not by violence.

Robert P. Mazzarino, Saugus, Mass. Civil Engineering.

The Paths of glory lead but to the grave.

Robert L. McCrensky, Lexington, Mass. Management.

The troubles of the world have often played upon the minds of NU students and faculty. Some go left, some go right, while I have chosen the attributes of both in order to maintain a flexible position and a flexible mind.

Warren C. McLean Jr., Somerville, Mass. History.

Today youth holds the key to the future of the world. They are concerned and willing to take action against the many problems which beset the world from war to pollution. I think the world will be in good hands.

Joseph Mitola III, St. Laurel, Md. Electrical Eng.

Israel Vietnam  
The Red Guard Marx Mao Ho Safeguard Martin Bobby John  
The Pueblo and N. Korea are drowning Alexander Dubcek NO  
OH LSD SALT STP  
and with everyman

"doing that which is right in his own eyes i repented and became a son of man i died now here i am again; so should you"

Stephen J. Mosher, St. Piesque Isle, Me. Accounting.  
The last five years might be characterized as one long search for easy victories over the nation's problems. The problem for the next half-decade is to change the national priorities before it's too late to win victories.

Jean L. Packard, Stoughton, Mass. English.  
1966-1971: Beatles, Dylan, Led Zeppelin; King, Kennedy; Johnson, Nixon, Agnew; Hash, Grass, Pollution; Poetry; Blacks, Indians, Women; Vietnam, Middle East; Minis, Midis, Bell-bottoms; Demonstrations, Riots, Strikes; SDS, YAF, ROTC, PAX; Blois, Wilmarth, Sanders, Michaels; Grey Brick, Greenhope, Great change.

David L. Pair, Dorchester, Mass. Psych.  
I have observed black and white men and women spearhead the process of social change. Some have been for the betterment of mankind, some have caused the deterioration of society to set in. This society functions on systems. If a negative change is asked for in the system, it means the system is inadequate.

John Richard Parnagian, Roslindale, Mass. Econ.  
During my life at Northeastern, I believe above all I have learned how to think rationally. This skill has helped me first take a better look at Vietnam, Kent State and the Student Strike, then to discover my real feelings. Northeastern and time together have given me something that will stay for the rest of my life.

Lynn Phillips, Bronx, N.Y. Sociology.  
We see the power of the bomb and preach love. We see limited resources and were concerned about ecology. We see our parents' materialism and with it their emotional barrenness and we reject wealth if we must wager our souls.

Roger L. Pilotte, Manchester N.H. Mktg.  
Times change and so do people, college has helped me see that. Co-op has subjected me to different people and systems, made me realize constructive work can be done through those systems. Life is what you make it. My college education has broadened my ability to cope with changes and challenges.

Paul Rapo, Southbridge, Mass. Economics.  
"I will study now, for someday my time will come."  
—Abraham Lincoln  
Northeastern has provided an urban atmosphere for understanding the social crisis that plagues this nation. Someday our time will come to confront the issues that have plagued us—war, racism and repression.

William F. O'Neil Jr., Somerville, N.J. Political Sci.  
The American student has come of age; he has become a political activist in the same tradition as his European counterpart. As a result of his activism social values have and are being reappraised. Our time has been called the Age of Aquarius; it should be the Age of Awakening. Turtle races went out of vogue; the race to save the world from ecological starvation became real and important.

Richard B. Packard, Duxbury, Mass. Finance & Insurance.  
During the past five years, national and local events and vastly different groups have been changing our way of life at an increasingly rapid rate. As participants of these events, we must take time to reflect on their usefulness to ourselves and to our fellow man.

David M. Palmieri, Roslindale, Mass. Mgt.  
Looking back on the past half-decade, I realize that it is not from what man has descended that is important, but rather to what he has descended that has created the state our world is in. For education and technology are only as good as the way they are used.

John Philbrook, No. Quincy, Mass. English.  
My high school yearbook motto, lightly tossed off, has deepened with meaning through my college years to become too true: "Life is a farce."

David G. Phinney, Eatontown, N.J. Mktg.  
It will be satisfying to look back and know that Northeastern and the cooperative education contributed to a more worldly and pragmatic youth and not to the ranks of those who, over idealistic, impractical, and destructive, hindered those desiring constructive change.

Robert D. Player, Cambridge, Mass. Physics.  
The last five years: hypocrisy—the Vietnam War, the Draft and the Vote; society—militant, corrupt and sick; yourself—the awakening and realization of yourself, good or bad, life or death. Peace.

T. Jay Ribaga, Brockton, Mass. Ind. Relations.  
"I do my thing, and you do your thing.  
I am not in this world to live up to your expectations;  
And you are not in this world to live up to mine.  
You are you and I am I.  
And if by chance we find each other, it is beautiful."

Joseph Riendeau, Cambridge, Mass. Acct.

I am dismayed by the violence that is prevalent throughout the world, war in Vietnam, Cambodia and the Mid East, violence in the classroom and race riots in the streets. Where will it end? Can we find peaceful co-existence among men? The future—if war doesn't put an end to man, pollution may. Peace.

Susan Silver, Brookline, Mass. Phys. Therapy.

The past five years have brought social, political and economic upheavals. The disturbances caused the college campus to change from a hard-shelled protective "other world" to a hotbed of unrest and disillusionment. Let's hope the Class of 1976 can look back on their college years as peaceful.

Richard B. Sims, Chelsea, Mass. Mech. Eng.

The mid-segment of the 20th century will be marked as man's confrontation with conflicts long avoided: the individual vs. the group; man vs. his environment; man vs. God. He finds the stock answers no longer satisfy. Man cannot solve his problems by entreating powers outside his own realm.

William D. Sheehan, Woonsocket, R.I. Ct.

The times forced me to have a long overdue sense of awareness. It violently demonstrated that individual complacency is intolerable in our society—that the U.S. is not godly in all its efforts. Most important it developed my personal free expression, which regardless of dissenting tones, is the basis for democracy.

John E. Silvia, Somerset, Mass. Economics.

Do not look here for profound statements.  
You will not find any.  
Only a true one.  
Good-bye.

Mark I. Smith, Boston, Mass. Fin. & Ins.

The most challenging, interesting, maturing and dynamic period of my life is now coming to an end. I have witnessed this century's greatest change not only in our academic community, but in society as a whole. Change has been important but I hope future classes do not use it recklessly.

Karen Stable, Beverly, Mass. Education.

Carl Mario Sutera, Boston, Mass. Mech. Eng.

In the past half-decade I've seen a remarkable change in the reception of feelings and attitudes of the young by the old. Unfortunately in my own estimation, the opportunity afforded by such a favorable change has, by and large, been wasted on immature violence and hotheaded extremism of all sorts.

Warren H. Talbot, Medford, Mass. English.

"All skill ought to be exerted for universal good; every man has owed much to others, and ought to repay the kindness that he has received."

—Samuel Johnson

Marshall Toback, Newburge, N.Y. Finance and Insurance.

Since I came to Northeastern, many tragic events have happened. There has been three major assassinations namely (two Kennedy's and Martin Luther King). There have been large numbers of Americans killed in Vietnam. Let us all stop and think of what these men have given their lives for and strive to make this a better world to live in.

Robert Torbin, Methuen, Mass. Mechanical Engineering.

Attitudes towards life and love have changed drastically during my years at Northeastern. People were more open with their love yet more apprehensive towards life. Old standards are challenged, new ones are being established. I think for the best.

Raymond Tuller, Boston, Mass. Management.

Surviving in these dynamic yet troubled times has made people adhere to many things, yet has produced many followers merely because it is easier to adhere than to dissent. Much of my generation needs desperately to adhere to something that adults sometimes fail to see—idealism. I hope that we will realize what is crystalizing in the rising generations and respond in a positive way.

Roger Thomas Tierney Jr., Dedham, Mass. I.D.

After five of the most harrowing yet meaningful years of my life, I look optimistically to the future and hope that the mistrust and misunderstanding among people will pass into eternal oblivion, never again to haunt mankind.

John Toohil Jr., Waltham, Mass. Mechanical Engineering.

The years 1966-1971 were ones of violent turmoil and change. Changes for better, for worse; women's liberation, abortion, use of drugs, police riots, student riots, student-faculty committees, strikes, and course changes. I am a participant and an observer, mostly I hope a participant, on the right side not necessarily the winning side, or the side which draws the most attention.

Steven Trehub, Chestnut Hill, Mass. Management.

Someone poked a small hole in the balloon that surrounds us. And minds rushed out and saw the boundaries that had contained them. The hole has gotten bigger, the balloon is collapsing. A lot of minds will be blown out.

Arthur W. Tunnell, Southampton, N.Y. Industrial Relations.

The pendulum swings: They say "when will you take up your responsibilities?" We pause, wondering "What are my responsibilities?" They say, "Look at me, I'm successful." And we say, "But you don't understand your children." They say, "Grow up it's a cruel world" And we say, "If I grow up like you it will always be so." They say, "Don't be so idealistic—you can't change human nature." But all progress was once only an idea.

Jeffrey M. Vichnick, Bronx, N.Y. Phys. I.d.  
I feel the world has not changed, merely the views of its inhabitants. The world in its gross physical state is the product of each man's individual state of mind. A university such as ours has allowed us to look at our world with a better focus than we previously had.

Marc Webb, Waltham, Mass. Economics.  
(Five years) . . . realizations of alternatives to what is . . . assuming the freedom to change people and institutions . . . attempting to stop the change on all levels . . . frustration, frustration, frustration . . . more determination for deeper change . . . attempts to build institutions of change . . . frustration, repression, nevertheless need for change.

Benjamin L. Weiner, Malden, Mass. Civil Eng.  
The years between 1966-71 saw an increasing involvement of people participating in outward demonstrations of their feelings. The "silent majority" was fictional since everyone took stands on war, racial, political and economic issues. I was changed from a sit-by-and-watch-attitude to a get-out-and-do-something attitude during and after the Student Strike. Peace.

Stanislaw A. Wejtunik Jr., New Bedford, Mass. Elec. Eng.  
It is known that systems attempt to remain static. Any forces used to attempt change will cause an equal force from within to stop the change. It is therefore easier and more beneficial to change the system from within.

Kevin W. Wynn, Presque Isle, Me. Chemical Eng.  
In my five years at Northeastern, I've seen a lot of changes in myself and society. Most of these changes were met by resistance or repression. I give this advice: "Don't let the bastards wear you down."

Henry Ziewacz, Hartford, Conn. Psychology.  
The study of academic psychology has convinced me that undesirable personality traits such as nervousness and quick temper to a cause as vague and undefinable as "human nature." Equipped with such knowledge one can trace the causes of such habits; and with enough patience one can effect changes in one's personality.

David E. Walsh, Belmont, Mass. Marketing.  
Although youth may still be misunderstood, there has been for the first time an attempt, made out of fear and necessity, to interpret them.

Bruce D. Weeks, N. Weymouth, Mass. Philosophy.  
"Most people do not take heed of the things they encounter, nor do they grasp them even when they have learned about them, although they suppose they do." "Much learning does not teach understanding."

—Heraclitus—fragments 57 & 6

Susan Werner, Hamden, Conn. English.  
We are now entering the era of the videosphere where fact is the enemy of truth. The spiraling system of life will eventually bring us around to a great age of compromise.

Alan F. Wurdeman, Nashua, N.H. Journalism.  
Inverse Reaction, a time of Ups and Downs:  
The cost of education went up while the quality went down, the price of war rose, the country heads for depression, one Eagle landed on the moon while on earth another shook soot from its feathers.

Harry Targehn Yuan, Tappita, Liberia (West Africa) Elec-Eng.  
The sensitivity of students to local and international issues has been astonishingly heart warming. Continued concern demonstrated positively could channel technology for non-destructive services to mankind, and make the Earth peaceful and better. I therefore salute the concerned generation—my fellow students.
